## Mac OS X 10.5 Leopard Essential Training

with: [Christopher Breen](#)

With the release of the Leopard operating system for Macs, Apple has added or updated more than 300 features. In *Mac OS X 10.5 Leopard Essential Training*, Macworld senior editor Christopher Breen explores each of Leopard's vital features. He walks viewers through the installation, then goes over how to use the interface and navigational elements, work with the Dock's stacking feature, and take advantage of the iLife applications, Safari, and Mail. These tutorials are designed for people who are new to the Mac or who are upgrading to the Leopard operating system.

- Modular videos help to learn specifics
- Self paced learning
- New training courses added monthly
- Access to all training for one price!
