Mac OS X 10.5 Leopard New Features

with: Christopher Breen

In *Mac OS X 10.5 Leopard New Features*, Macworld senior editor Christopher Breen discusses the key changes

and upgrades in Leopard. From interface and desktop changes to new and updated organizational features such

as Stacks and Spotlight, Christopher shares insight into Leopard's functions. He discusses both the new

operating system and the applications that work with it, including Safari, Mail, and Photo Booth.
