Clear Key
Clears Message Number
FN Key Enables:
Decimal Point and Del

The Chyron Keyboard is designed specifically for use with graphics systems running Lyric software. The location and function of dedicated keys are similar to those on iNFiNiT! Family keyboards. Dedicated keys simplify frequently-used composition functions, minimizing necessity of using the system's mouse. Some of these keys double as commonly used Windows keys. The traditional Windows functions appear on the front of each of these keys in RED. These functions can be activated by pressing the red Fn key, located immediately to the left of the Shift key.

2a02122 Revision B May 2008

Shortcut	Action	Shortcut	Action	Shortcut	Action
CTRL+N	Open new Canvas	CTRL+ALT+UP ARROW	Shift page up	SHIFT+F10	Right-click
