

K2 Summit Production Client Quick Start Guide

071-8722-04 October 12, 2012

Before you begin, unpack the following items.

Locate the documentation you need on the Recovery Flash Drive or download from http://www.grassvalley.com/dl/k2_summit

Documentation path to install K2 Summit system with internal storage

Documentation path to install K2 Summit systems with SAN or direct-connect storage

*Cabling Guide packed with RAID primary chassis

1. Make cable connections

Standard bi-directional channels

Each channel (C1, C2, etc.) can be an input (record channel) or an output (play channel). Connect video/audio IN and OUT to each channel, as appropriate for your intended use.

1 Make SDI connections on each channel

SDI connections

| | IN1 | IN2 | IN3 |
|------------------------|---------------|------------------------|--------|
| Standard | Active | | |
| Multi-Cam* | Video1 | Video2 | |
| 3D/Video + Key record* | Video (L eye) | Key (R eye) | |
| Super Slo-Mo* | Phase1 | Phase2 | Phase3 |
| | OUT1 | OUT2 | |
| Standard | Active | Active Duplicates OUT1 | |
| 3D/Video + Key play* | Video (L eye) | Key (R eye) | |
| Super Out* | Active | Super Out info | |

2 Connect network cables to Ethernet ports

Ethernet cabling

Internal or direct-connect storage:

- Port 1 - Control network
- Port 2 - FTP/Streaming
- Ports 3 & 4 - Not used

Shared iSCSI storage basic:

- Port 1 - Control network
- Port 2 - Media (iSCSI) network

Shared iSCSI storage redundant:

- Port 1 & 4 - Control network
- Port 2 - Media (iSCSI) network A
- Port 3 - Media (iSCSI) network B

Shared FC storage basic:

- Port 1 - Control network

Shared FC storage redundant:

- Port 1 & 4 - Control network

*Some SDI connections require special licensing and configuration. Refer to the *K2 AppCenter User Manual*.

Make other connections as needed. Refer to the *K2 System Guide* for complete instructions.

- 5 Connect power cord
- Optional Fibre Channel card for connection to standalone direct-connect storage or shared Fibre Channel storage.
- 3 Connect keyboard and mouse
- 4 Connect VGA monitor
- 5 Connect power cord

2. Start up

- 1 Before power on, take note of the chassis serial number, located behind the bezel/fan.
- 2 Identify the Recovery Flash Drive, which is labeled with this unit's serial number. Make sure it remains stored with this specific unit.
- 3 Replace the bezel/fan and identify the following: Standby switch, Power LED, Service LED
- 4 Press the standby switch to power on.
- 5 Log on with the default Windows admin account: -Username: Administrator -Password: adminGV!
- 6 On the Windows desktop, check the system tray. When the network icon indicates connectivity, the K2 Summit Production Client is operational.

Normal startup sequence

Power LED goes on and stays on. Service LED stays off.

3. Configure network and, if necessary, storage

1 Use SiteConfig as appropriate for your K2 system and on-site networking.

- **Stand-alone internal or direct-connect storage** – Install SiteConfig on a control point PC, discover the K2 Summit Production Client, and configure network interfaces.
 - Configure Control Team for the control network.
 - If desired, configure Media Connection #1 for the FTP/Streaming network.Refer to *K2 Release Notes* for instructions.

Default network settings

DHCP is enabled and the chassis serial number is the hostname.

Ethernet connection names

| This rear panel GigE port... | Is named this in Windows Network Connections... |
|------------------------------|---|
| 1 | Control Team (Control Connection #1) |
| 2 | Media Connection #1 |
| 3 | Media Connection #2 |
| 4 | Control Team (Control Connection #2) |

2 Configure network name resolution via host files or otherwise, as required by on-site networking. FTP/Streaming network hostnames must include “_he0” suffix.

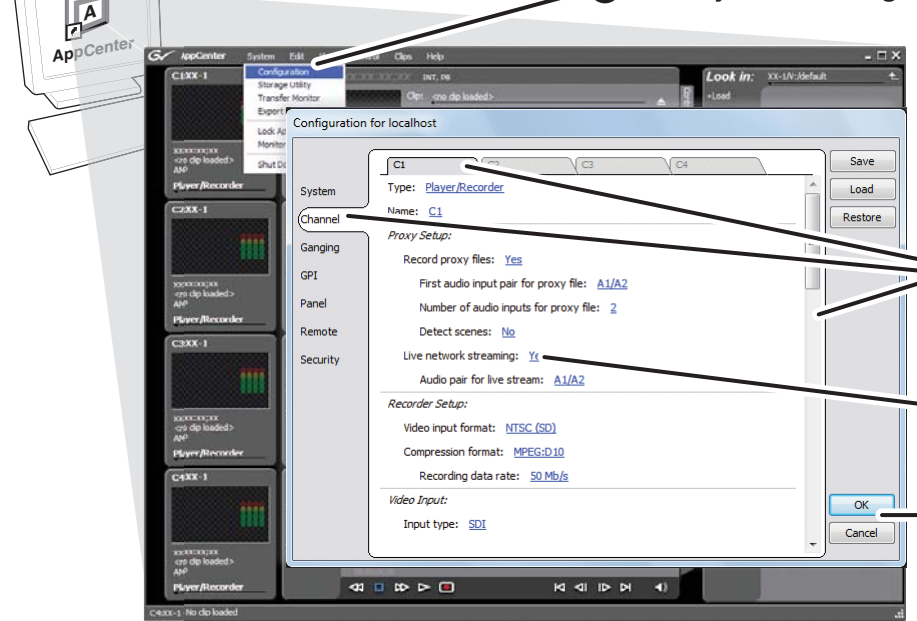

3 Configure storage as follows:

- **Internal storage** – No storage configuration is necessary. Storage is pre-configured.
- **Direct-connect storage** – Use Storage Utility to Bind RAID disks and make file system. Refer to the *K2 System Guide*.
- **Shared storage** – Use the K2 System Configuration application to add the K2 Summit Production Client to the K2 SAN and configure it on the SAN. Refer to the *K2 SAN Installation and Service Manual*.

4. Configure channels

1 Open AppCenter and logon with the administrator account (User Name=Administrator/Password=adminGV!). If a licensing message appears, refer to *K2 Release Notes*.

2 Click **System | Configuration**.

3 Click tabs, buttons, and scroll bar to locate settings.

4 Select from drop-down lists to make settings.

5 Click **OK** and **Yes** to save settings.

Continue with Quick Start procedures on the reverse side.

5. Record and play

Bi-directional channels
A channel becomes an input channel when you begin recording. The same channel becomes an output channel when you load a clip for playback.

1 Select a channel

2 Begin record

3 Stop record

4 Drag a clip into the channel

5 Adjust audio level as needed

6 Play the clip

Timecode for Record
On the AppCenter menu, click **Control | Options**. On the Options dialog box click **Timecode** and select the timecode for recording and display.

6. Create a playlist

1 Select Playlist

2 Drag clips into the channel

3 Play the list

Refer to the AppCenter Help menu for complete information about playlist functionality and other operations, such as editing subclips.

7. Monitor

Click **View | Video Monitor**

- ✓ Toolbar
- Full Screen
- Video Monitor

Video monitor support
The VGA resolution must be 1024 x 768 x 32 or greater to support live (moving) video monitoring.

8. For more information...

In AppCenter, click **Help | AppCenter Help Topics** and read the complete documentation for operating and configuring K2 Summit Production Client channels.

Go to <http://www.grassvalley.com/support> and find solutions to problems.

Find the complete documentation set for K2 products in the K2/Stratus Doc Set zip file on the Recovery Flash Drive or by downloading from http://www.grassvalley.com/dl/k2_summit.
