

NV9000 Security Update

Introduction

Certain NV9000 system controllers might have been infected with the "Conficker" virus.

You can obtain a patch for this virus from Microsoft at:

http://www.microsoft.com/en-us/download/details.aspx?id=3205

Download the patch, copy it to a clean USB stick, and run the installer on the NV9000 system controller.

Download

1 Go to http://www.microsoft.com/en-us/download/details.aspx?id=3205:

Click 'Download'.

NV9000 Security Update

2 A dialog appears:

Click 'Save File'.

A window appears in which you can navigate to the folder in which you want to save the file. Save the file. Its name is WindowsXP-KB958644-x86-ENU.exe.

3 Copy the file to a USB device in preparation for installing the patch on each NV9000 system controller.

Installing the Patch

Login on the NV9000 system controller.

- 1 Insert the USB device in a USB slot. Open the folder into which you copied the patch installer.
- 2 Double-click the patch installer. The initial window appears:

Click 'Next'.

3 A license agreement window appears:

License Ag	reement

┌ Details	
Creating restore point	
< Back Finish	Cancel

5 When the installer has finished, it presents its final window:

Check 'Do not restart now' if you do not want to restart your controller immediately. Click 'Finish' to complete the installation.

6 Eventually you must restart the controller for the patch to take effect.

More Information

More information (and installers for other OS applications) can be obtained from Microsoft at this address: http://technet.microsoft.com/en-us/security/bulletin/msØ8-Ø67
