This Field Modification Note relates to the Kalypso Menu panel. An older screen driver caused problems that occasionally caused Blue Screen failures. Use this kit to install ELO version 3.10c Touchscreen Driver, which will correct the problem.

**Note** The ELO Version 3.10c Touchscreen Driver has been incorporated into Kalypso system software version 3.0.0.

## Software

The ELO version 3.10c Touchscreen Driver software is provided on floppy disk and is also available for download at <ftp://ftp.grassvalley-group.com/pub/switcher/Kalypso/FieldModNotes>. The file to download is MMNT310C.EXE.

## Instructions

### To Uninstall the Old Driver

1. Exit the Kalypso or Omnibus window if either is currently displayed.
2. Connect a keyboard and a mouse to the back of the Kalypso Main panel.
3. Logon as administrator:
  - a. Press **Ctrl/Alt/Del** simultaneously.
  - b. When prompted, hold down the **Shift** key, select **Logoff**, select **OK**, and continue holding the **Shift** key until the logon screen displays.
  - c. Logon as administrator (password: kalypso).
4. If displayed, exit the Kalypso Main Menu by clicking in the upper right corner.
5. Uninstall the older ELO version 3.0 Touchscreen Driver (MonitorMice for Windows NT):
  - a. In the Windows taskbar, select:  
**START > SETTINGS > CONTROL PANEL > ADD/REMOVE PROGRAMS**
  - b. Select **MONITORMICE FOR WINDOWS NT** and click **ADD/REMOVE**.

- c. Follow the prompts for the uninstall process.
- 6. Restart the system when prompted to do so. You will be logged on as administrator (password: kalypso).

**Note** You are automatically logged on as administrator only if you logged on in [Step 3](#) using the administrator password (kalypso) supplied to you when you received your system. If you changed the default password since receiving your system, you will not be automatically logged on.

### To Install the New Driver

- 7. Close the Kalypso Main window and Omnibus Main window (if running).
- 8. Insert the floppy disk containing the new driver file into the Kalypso panel floppy drive.
- 9. Access the A drive and double-click on the file MMNT310C.EXE to extract the driver.
  - a. Make sure the **Overwrite Files Without Prompting** and **When Done Unzipping Run: NOTEPAD README.TXT** boxes are checked.
  - b. Select **UNZIP**.
  - c. Accept the default to extract the installation files to the **C:\Elont** directory.
  - d. If you choose not to read the Readme.txt file, close it.
- 10. Install the new driver:
  - a. Access the **C:\Elont** directory.
  - b. Double-click on Setup.exe.
  - c. Follow the installation prompts and accept all defaults.
  - d. When prompted to restart your computer, remove the floppy from the Kalypso floppy drive and click **Finish**.
- 11. After system restart (still logged on as Administrator), set the calibration by following the instructions in the **CALIBRATION** menu display.
- 12. Following calibration, logon as Kalypso:
  - a. Press **Ctrl/Alt/Del** simultaneously.
  - b. When prompted, select **Logoff**.
  - c. Press the **Shift** key until the logon screen displays.
  - d. Logon as Kalypso (password: Kalypso).

Following installation of the new driver, perform random tasks on the Kalypso Menu panel. If no Blue Screen failure occurs, the software update successfully corrected the problem. Should the Kalypso Menu panel exhibit a Blue Screen failure following this procedure, the Menu panel processor should be replaced. Contact Field Service should processor replacement be necessary.
