This guide provides a list of key features and commands, and their location in the documentation suite.

Applicable products

This guide applies to these products:

Aruba 2530 Switch Series (J9772A, J9773A, J9774A, J9775A, J9776A, J9777A, J9778A, J9779A, J9780A, J9781A, J9782A, J9783A, J9853A, J9854A, J9855A, J9856A, JL070A)

Aruba 2540 Switch Series (JL354A, JL355A, JL356A, JL357A)

Aruba 2920 Switch Series (J9726A, J9727A, J9728A, J9729A, J9836A)

Aruba 2930F Switch Series (JL253A, JL254A, JL255A, JL256A, JL258A, JL259A, JL260A, JL261A, JL262A, JL263A, JL264A, JL557A, JL558A, JL559A, JL692A)

Aruba 2930M Switch Series (JL319A, JL320A, JL321A, JL322A, JL323A, JL324A, R0M67A, R0M68A)

Aruba 3810 Switch Series (JL071A, JL072A, JL073A, JL074A, JL075A, JL076A)

Aruba 5400R zl2 Switch Series (J9821A, J9822A, J9850A, J9851A, JL001A, JL002A, JL003A, JL095A)

Switch prompts used in this guide

Examples in this guide are representative and may not match your particular switch/environment. Examples use simplified prompts as follows:

Prompt	Explanation
switch#	# indicates manager context (authority).
switch>	> indicates operator context (authority).
switch(config) #	(config) indicates the config context.
switch(vlan-x) #	(vlan-x) indicates the vlan context of config, where x represents the VLAN ID. For example: switch(vlan-128) #.
switch(eth-x) #	(eth-x) indicates the interface context of config, where x represents the interface. For example: switch(eth-48) #.
switch-Stack#	Stack indicates that stacking is enabled.
switch-Stack(config) #	Stack(config) indicates the config context while stacking is enabled.
switch-Stack(stacking) #	Stack(stacking) indicates the stacking context of config while stacking is enabled.

Table Continued

Prompt	Explanation
switch-Stack(vlan-x) #	Stack(vlan-x) indicates the vlan context of config while stacking is enabled, where x represents the VLAN ID. For example: switch-Stack(vlan-128) #.
switch-Stack(eth-x/y) #	Stack(eth-x/y) indicates the interface context of config, in the form (eth-<member-in-stack>/<interface>). For example: switch(eth-1/48) #

NOTE: For the latest ArubaOS-Switch documentation, visit the Networking Support website at www.hpe.com/networking/support.

Switch documentation

Look for this switch documentation available on the Networking Support website:

- *ArubaOS-Switch Access Security Guide*: Explains how to configure access security features and user authentication on the switch.
- *ArubaOS-Switch Advanced Traffic Management Guide*: Explains how to configure traffic management features such as VLANs, MSTP, QoS, and Meshing.
- *ArubaOS-Switch Basic Operation Guide*: Describes how to use the switch interfaces and introduces basic operations.
- *ArubaOS-Switch Event Log Message Reference Guide*: Provides a comprehensive description of event log messages.
- The Installation and Getting Started Guide for each switch: Explains how to prepare, install, and connect the switch.
- *ArubaOS-Switch IPv6 Configuration Guide*: Describes the IPv6 protocol operations that are supported on the switch.
- *ArubaOS-Switch Management and Configuration Guide*: Describes how to configure, manage, and monitor basic switch operation.
- *ArubaOS-Switch Multicast and Routing Guide*: Explains how to configure IGMP, PIM, IP routing, and VRRP features.
- Switch Software Release Notes: Describes new features, fixes, and enhancements that become available between revisions of the main product guide.

Guide name abbreviations are as follows:

ASG: Access Security Guide

ATMG: Advanced Traffic Management Guide

BOG: Basic Operation Guide

IPv6: IPv6 Configuration Guide

MCG: Management and Configuration Guide

MRG: Multicast and Routing Guide

Table 1: Software features

Software features	ASG	ATMG	BOG	IPv6	MCG	MRG
802.1Q VLAN Tagging		X				
802.1X Port-Based Priority					X	
802.1X Multiple Authenticated Clients Per Port	X					
802.3bt					X	
Access Control Lists (ACLs)	X					
Access Control Lists (ACLs) (IPv6)				X		
access-list logtimer	X					
Active / Active Support	X	X				
Airwave Controller IP configuration commands					X	
Application Certificate Enrollment using EST	X					
Aruba Central integration					X	
AAA Authentication	X					
Authentication order, priority, and fallback	X					
Authorized IP Managers	X					
Authorized IP Managers (IPv6)				X		
Authorized Manager List (Web, SSH, TFTP)	X					

Table Continued

Software features	ASG	ATMG	BOG	IPv6	MCG	MRG
Automatic CA Certificate Download with ClearPass	X					
Auto MDIX Configuration					X	
BOOTP					X	
Border Gateway Protocol (BGP)						X
Captive-portal commands	X					
Class commands					X	
Config File			X			
Console Access			X			
Consolidated Client View					X	
Copy Command					X	
Core Dump					X	
CoS (Class of Service)		X				
Debug					X	
Device Fingerprinting	X					
Device Profile					X	
DHCP Configuration					X	
DHCPv6 Relay				X		
DHCP Option 82						X
DHCP Snooping	X					
DHCP/Bootp Operation					X	
Diagnostic Tools					X	
Diagnostics and Troubleshooting (IPv6)				X		
Distributed Trunking						X
Downloading Software			X			
Dynamic ARP Protection	X					
Dynamic Configuration Arbiter	X					
Dynamic Segmentation					X	
Dynamic IP Lockdown	X					
EAP-TLS Fragmentation	X					
Easing Wired/Wireless Deployment feature integration					X	
Eavesdrop Protection	X					

Table Continued

Software features	ASG	ATMG	BOG	IPv6	MCG	MRG
Equal Cost Multi-Path (ECMP)						X
Event Log					X	
Factory Default Settings			X			
Flow Control (802.3x)					X	
File Management					X	
File Transfers					X	
FQDN support for RADIUS Server	X					
Friendly Port Names					X	
Guaranteed Minimum Bandwidth (GMB)					X	
GVRP		X				
Hibernate mode				X		
IMC (Network Management)	X		X		X	
IGMP						X
Interface Access (Telnet, Console/Serial, web)				X		
IP Addressing				X		
IPv6 Addressing					X	
IP Preserve (IPv6)				X		
IP Routing						X
IPsec for Zero Touch Provisioning					X	
IPsec Tunnel to Secondary Controller					X	
IP SLA					X	
IPv6 Static Routing					X	
Jumbo Packets					X	
Key Management System (KMS)	X					
LACP					X	
LACP Minimum Active Links					X	
LLDP	X					
LLDP-MED	X					
Local User roles	X					
Lock a MAC to a port-VLAN pair	X					

Table Continued

Software features	ASG	ATMG	BOG	IPv6	MCG	MRG
Log IP address of an ACL match	X					
Log violation of Blackhole route						X
Loop Protection		X				
MAC Address Management					X	
MAC Lockdown	X					
MAC Lockout	X					
MAC-based Authentication	X					
Management VLAN		X				
Management Security (IPv6)					X	
Meshing		X				
MLDv1/MLDv2					X	
Monitoring and Analysis						X
Multicast Filtering	X					
Multiple Configuration Files			X			
Net-destination and Net-services	X					
Network Management Applications (SNMP)						X
Object tracking for Uplink Failure Detection						X
Out-of-Band Management (OOBM)						X
OSPFv3					X	
Passwords and Password Clear Protection	X					
PAP Support for MAC Authentication	X					
Ping						X
Policy-based Routing (PBR)		X				
Policy commands						X
Port Configuration						X
Port Monitoring		X				
Port QoS Trust Mode		X				
Port Security	X					
Port Status						X
Port Trunking (LACP)						X

Table Continued

Software features	ASG	ATMG	BOG	IPv6	MCG	MRG
Port-Based Access Control (802.1X)	X					
Power over Ethernet (PoE and PoE+)					X	
Protocol Filters	X					
Protocol VLANs		X				
Proxy Server						
PTP (Precision Time Protocol) IEEE 1588					X	
Quality of Service (QoS)		X				
RADIUS Authentication and Accounting	X					
RADIUS-Based Configuration	X					
Rate-Limiting					X	
RIP						X
RMON 1,2,3,9					X	
Routing						X
Routing - IP Static						X
Route Redistribution						X
RPVST+ Ph-2		X				X
SavePower Features					X	
Secure Copy					X	
Secure Copy (IPv6)				X		
Secure FTP (IPv6)				X		
Secure Radius (RadSec)	X					
Secure Syslog over TLS	X					
sFlow					X	
SFTP					X	
SNMPv3					X	
SNMP (IPv6)				X		
SNMP Trap Throttling				X		
Software Downloads (SCP/SFTP, TFPT, Xmodem)					X	
Source-Port Filters	X					

Table Continued

Software features	ASG	ATMG	BOG	IPv6	MCG	MRG
Spanning Tree (STP, RSTP, MSTP, RPVST+)		X				
SSHv2 (Secure Shell) Encryption	X					
SSH (IPv6)					X	
SSL (Secure Sockets Layer)	X					
Stacking		X				
sys-debug acl	X					
sys-debug destination	X					
Syslog						X
System Information			X			
TACACS+ Authentication over v6	X					
Telnet Access			X			
Telnet (IPv6)					X	
TFTP						X
Time Protocols (TimeP, SNTP)						X
Time Protocols (IPv6)				X		
Traffic Mirroring						X
Traffic/Security Filters	X					
Troubleshooting						X
Tunneled node						X
Tunneling (6in4)				X		
Uni-Directional Link Detection (UDLD)						X
UDP Forwarder						X
USB Device Support						X
User-role Enhancement	X					
v6 Per User Tunnel Node						X
Virus Throttling (Connection-Rate Filtering)	X					
VLANs		X				
VLAN commands						X
VLAN Mirroring (1 static VLAN)		X				
Voice VLAN		X				

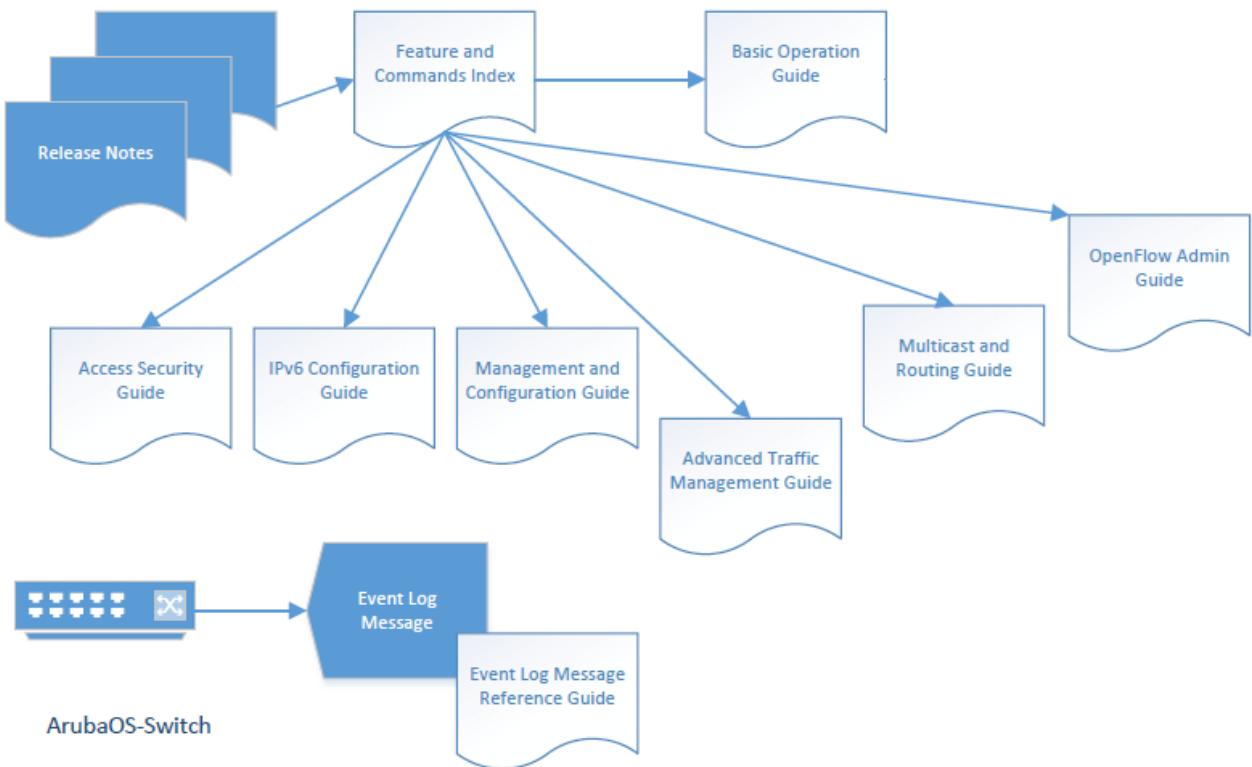

Table Continued

Software features	ASG	ATMG	BOG	IPv6	MCG	MRG
Web Authentication RADIUS Support	X					
Web-based Authentication	X					
Web UI			X			

ArubaOS-Switch documentation includes the following:

- Release Notes
- *ArubaOS-Switch Feature and Commands Index*
- *ArubaOS-Switch Basic Operation Guide (BOG)*
- *ArubaOS-Switch Access Security Guide (ASG)*
- *ArubaOS-Switch IPv6 Configuration Guide (IPv6)*
- *ArubaOS-Switch Management and Configuration Guide (MCG)*
- *ArubaOS-Switch Advanced Traffic Management Guide (ATMG)*
- *ArubaOS-Switch Multicast and Routing Guide (MRG)*
- *ArubaOS-Switch OpenFlow 1.3 Administrator Guide*
- *ArubaOS-Switch Event Log Message Reference Guide*

Figure 1: Reading path for ArubaOS-Switch documentation

This chapter indicates which of the ArubaOS-Switch guides to consult for specific commands.

IMPORTANT: This chapter lists commands for all ArubaOS-Switch products. Certain commands may not apply to all products. For further information or command verification, see the guides for your specific switch.

Guide name abbreviations are as follows:

ASG: Access Security Guide

ATMG: Advanced Traffic Management Guide

BOG: Basic Operation Guide

IPv6: IPv6 Configuration Guide

MCG: Management and Configuration Guide

MRG: Multicast and Routing Guide

‘A’ commands

‘A’ commands	ASG	ATM G	BOG	IPv6	MCG	MRG
aaa accounting rest-uri	X

Accessing Hewlett Packard Enterprise Support

- For live assistance, go to the Contact Hewlett Packard Enterprise Worldwide website:
<http://www.hpe.com/info/assistance>
- To access documentation and support services, go to the Hewlett Packard Enterprise Support Center website:
<http://www.hpe.com/support/hpesc>

Information to collect

- Technical support registration number (if applicable)
- Product name, model or version, and serial number
- Operating system name and version
- Firmware version
- Error messages
- Product-specific reports and logs
- Add-on products or components
- Third-party products or components

Accessing updates

- Some software products provide a mechanism for accessing software updates through the product interface. Review your product documentation to identify the recommended software update method.
- To download product updates:
Hewlett Packard Enterprise Support Center
www.hpe.com/support/hpesc
Hewlett Packard Enterprise Support Center: Software downloads
www.hpe.com/support/downloads
- To subscribe to eNewsletters and alerts:
www.hpe.com/support/e-updates
- To view and update your entitlements, and to link your contracts and warranties with your profile, go to the Hewlett Packard Enterprise Support Center **More Information on Access to Support Materials** page:
www.hpe.com/support/AccessToSupportMaterials

IMPORTANT: Access to some updates might require product entitlement when accessed through the Hewlett Packard Enterprise Support Center. You must have an HPE Passport set up with relevant entitlements.

Customer self repair

Hewlett Packard Enterprise customer self repair (CSR) programs allow you to repair your product. If a CSR part needs to be replaced, it will be shipped directly to you so that you can install it at your convenience. Some parts do not qualify for CSR. Your Hewlett Packard Enterprise authorized service provider will determine whether a repair can be accomplished by CSR.

For more information about CSR, contact your local service provider or go to the CSR website:

<http://www.hpe.com/support/selfrepair>

Remote support

Remote support is available with supported devices as part of your warranty or contractual support agreement. It provides intelligent event diagnosis, and automatic, secure submission of hardware event notifications to Hewlett Packard Enterprise, which will initiate a fast and accurate resolution based on your product's service level. Hewlett Packard Enterprise strongly recommends that you register your device for remote support.

If your product includes additional remote support details, use search to locate that information.

Documentation feedback

Hewlett Packard Enterprise is committed to providing documentation that meets your needs. To help us improve the documentation, send any errors, suggestions, or comments to Documentation Feedback (docsfeedback@hpe.com). When submitting your feedback, include the document title, part number, edition, and publication date located on the front cover of the document. For online help content, include the product name, product version, help edition, and publication date located on the legal notices page.
