

Title: Addition of ESD Ground Stud

Product: RCP-MLTP2 (Desk Mount)

Date: October 4, 1999

ECO No.: 3439

Issue:

To ensure compliance with EN61000-4-2 Electrostatic Discharge (ESD) Requirements, this product requires a chassis ground.

Solution:

A #4-40 ground stud has been added to the rear panel as shown in Figure 1 below. The customer is responsible for providing the wire and terminal lug for use with this ground stud.

The ground wire should be installed in accordance with the ESD grounding standard applicable in the country of use.
