

ADAM & ADAM-CS Analog Input/Output Card (AIO) Component Layout

Crystal "X-3" = 22 Mhz for Adam & 16 Mhz for Adam-CS. ADAM I/O cards may be used in ADAM-CS frames only if **all** AIO cards have the 22 mhz crystal. If speeds are mixed, then no audio will pass on AIO card. Slow ADAM-CS AIO cards are **NOT** usable in ADAM frames.
