OPERATION MANUAL   English
1st Edition

WARNING

To reduce the risk of fire or electric shock, do not expose this apparatus to rain or moisture.

To avoid electrical shock, do not open the cabinet. Refer servicing to qualified personnel only.

AVERTISSEMENT

Afin de réduire les risques d'incendie ou d'électrocution, ne pas exposer cet appareil à la pluie ou à l'humidité.

Afin d'écarter tout risque d'électrocution, garder le coffret fermé. Ne confier l'entretien de l'appareil qu'à un personnel qualifié.

WARNUNG

Um die Gefahr von Bränden oder elektrischen Schlägen zu verringern, darf dieses Gerät nicht Regen oder Feuchtigkeit ausgesetzt werden.

Um einen elektrischen Schlag zu vermeiden, darf das Gehäuse nicht geöffnet werden. Überlassen Sie Wartungsarbeiten stets nur qualifiziertem Fachpersonal.

For the customers in the U.S.A.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

All interface cables used to connect peripherals must be shielded in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

For the State of California, USA only

Perchlorate Material - special handling may apply, See
www.dtsc.ca.gov/hazardouswaste/perchlorate
Perchlorate Material : Lithium battery contains perchlorate.

For the customers in Taiwan only

廢電池請回收

**For laser-related devices
(HDC1500R/1400R only)**

CLASS 1 LASER PRODUCT
LASER KLASSE 1 PRODUKT
LUOKAN 1 LASERLAITE
KLASS 1 LASERAPPARAT

This HD Color Camera is classified as a CLASS 1 LASER PRODUCT.

Laser diode properties
Wave length: 1310 ± 40 nm
Emission duration: Pulse Modulation
Laser output power: 141^{+37}_{-29} µW

Daten der Laserdiode
Wellenlänge: 1310 ± 40 nm
Emissionsdauer: Pulsmodulation
Laser-Ausgangsleistung: 141^{+37}_{-29} µW

Egenskaber for laserdiode
Bølgelængde: 1310 ± 40 nm
Strålingsvarighed: Pulse Modulation
Afgivet lasereffekt: 141^{+37}_{-29} µW

Laserdiod - Egenskaper
Våglängd: 1310 ± 40 nm
Strålningens varaktighet: Pulsmodulering
Lasereffekt: 141^{+37}_{-29} µW

Egenskaper for laserdiode
Bølgelengde: 1310 ± 40 nm
Strålingsvarighet: Pulsmodulasjon
Utgangseffekt for laser: 141^{+37}_{-29} µW

CAUTION
The use of optical instruments with this product will increase eye hazard.

CAUTION
Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

For the customers in Europe

This product with the CE marking complies with both the EMC Directive and the Low Voltage Directive issued by the Commission of the European Community.

Compliance with these directives implies conformity to the following European standards:

• EN60950-1: Product Safety

• EN55103-1: Electromagnetic Interference (Emission)

• EN55103-2: Electromagnetic Susceptibility (Immunity)

This product is intended for use in the following Electromagnetic Environments:

E1 (residential), E2 (commercial and light industrial), E3 (urban outdoors), E4 (controlled EMC environment, ex. TV studio).

The manufacturer of this product is Sony Corporation, 1-7-1 Konan, Minato-ku, Tokyo, Japan.

The Authorized Representative for EMC and product safety is Sony Deutschland GmbH, Hedelfinger Strasse 61, 70327 Stuttgart, Germany. For any service or guarantee matters please refer to the addresses given in separate service or guarantee documents.

Pour les clients en Europe

Ce produit portant la marque CE est conforme à la fois à la Directive sur la compatibilité électromagnétique (EMC) et à la Directive sur les basses tensions émises par la Commission de la Communauté Européenne.

La conformité à ces directives implique la conformité aux normes européennes suivantes :

• EN60950-1 : Sécurité des produits

• EN55103-1 : Interférences électromagnétiques (émission)

• EN55103-2 : Sensibilité électromagnétique (immunité)

Ce produit est prévu pour être utilisé dans le senvironnements électromagnétiques suivants : E1 (résidentiel), E2 (commercial et industrie légère), E3 (urbain extérieur) et E4 (environnement EMC contrôlé, ex. studio de télévision).

Le fabricant de ce produit est Sony Corporation, 1-7-1 Konan, Minato-ku, Tokyo, Japon.

Le représentant autorisé pour EMC et la sécurité des produits est Sony Deutschland GmbH, Hedelfinger Strasse 61, 70327 Stuttgart, Allemagne. Pour toute question concernant le service ou lagarantie, veuillez consulter les adresses indiquées dans les documents de service ou de garantie séparés.

Für Kunden in Europa

Dieses Produkt besitzt die CE-Kennzeichnung und erfüllt die EMV-Richtlinie sowie die Niederspannungsrichtlinie der EG-Kommission.

Angewandte Normen:

• EN60950-1: Sicherheitsbestimmungen

• EN55103-1: Elektromagnetische Verträglichkeit (Störaussendung)

• EN55103-2: Elektromagnetische Verträglichkeit (Störfestigkeit)

Für die folgenden elektromagnetischen Umgebungen:

E1 (Wohnbereich), E2 (kommerzieller und in beschränktem Maße industrieller Bereich), E3 (Stadtbereichim Freien) und E4 (kontrollierter EMV-Bereich, z.B. Fernsehstudio).

Der Hersteller dieses Produkts ist Sony Corporation, 1-7-1 Konan, Minato-ku, Tokyo, Japan.

Der autorisierte Repräsentant für EMV und Produktsicherheit ist Sony Deutschland GmbH, Hedelfinger Strasse 61, 70327 Stuttgart, Deutschland. Bei jeglichen Angelegenheiten in Bezug auf Kundendienst oder Garantie wenden Sie sich bitte an die in den separaten Kundendienst- oder Garantiedokumenten aufgeführten Anschriften.

Table of Contents

Overview

The HDC1500R, HDC1550R, HDC1400R, and HDC1450R are 2/3-type high-definition portable video cameras equipped with CCD for 2,200,000 pixels. They incorporate the latest pickup elements and digital signal-processing LSI to yield higher picture quality and higher stability in image creation while maintaining conventional popular functions and operability.

The differences among the models are shown below:

	HDC1500R		HDC1550R		HDC1400R		HDC1450R	
	JN4/SYL models	**CED/E33 models**	**UC7 model**	**CED model**	**JN3/JN4 models**	**CED/E33 models**	**UC7 model**	**CED model**
Operation panel	SY type	European type	SY type	European type	SY type	European type	SY type	European type
Control connector	Fiber		Triax		Fiber		Triax	
Video format coverage	1080/50i, 1080/59.94i, 1080/23.98PsF, 1080/24PsF, 1080/25PsF, 1080/29.97PsF, 720/50P, 720/59.94P, 1080/50P, 1080/59.94P		1080/50i, 1080/59.94i, 1080/23.98PsF, 1080/24PsF, 1080/25PsF, 1080/29.97PsF, 720/50P, 720/59.94P		1080/59.94i, 720/59.94P	1080/50i, 720/50P	1080/59.94i, 720/59.94P	1080/50i, 720/50P

Features

High picture quality and high performance

The new 2/3-type Progressive IT CCD for 2,200,000 pixels conforms to driving formats up to 1080/59.94P, achieving high sensitivity and low smear. In addition, the 14-bit A/D converter and a unique signal-processing LSI provide picture quality of optimal grade.

Multiple formats

The HDC1500R covers ten video formats, HDC1550R covers eight video formats, and HDC1400R and HDC1450R covers two video formats. With the HDC1500R, signal output of 1080/50P and 59.94P from the camera head is also possible via the Dual Link interface.

Newly designed integrated unit with low center of gravity

A stylish appearance with low-slung design has been adopted. When used in combination with the HDLA1500- series Large Lens Adaptor, it permits the viewfinder to be mounted at a low position, making the viewfinder position closer to the optical axis of the lens.

Optimized handle shape and VF slide mechanism for stable shooting

A new handle design has been adopted. A slight protrusion of the upper front part of the handle enables stable holding of the camera while you are shooting, by holding the front part of the handle.
Furthermore, the movable range of a front-rear slide mechanism for the viewfinder attachment has been widened. Any difference in weight balance caused by having a different lens attached can be counteracted by adjusting the viewfinder attachment position, in combination with the movable shoulder pad position. This provides the best balance for shooting with the camera on your shoulder.

Swing handle

The swinging structure of the handle enables the large viewfinder mounted on the HDLA1500-series Large Lens Adaptor to be shifted forward, giving it the same total longitudinal size as a standard studio-use camera, for operability equivalent to that of a standard studio-use camera.

Position-adjustable shoulder pad

The position of the shoulder pad can be adjusted for stable shooting according to the build of the camera operator, the type of lens in use, or the shooting style.
A low-repulsion shoulder pad (position fixed) is available as an option (Part No.: A-8286-346-A).

Function-assignable switches

The camera has a switch to which various functions can be assigned on the side panel. You can activate your desired function, such as electronic color-temperature conversion, instantly when shooting by assigning it to the switch in advance. Switches on the handle are also available as function assignable switches.

Auto Lens Aberration Compensation function

The Auto Lens Aberration Compensation function (ALAC) is provided with this camera. This automatically reduces chromatic aberration of magnification when a lens that supports auto aberration compensation is attached.

For details on lenses supporting auto aberration compensation, contact a Sony sales representative or Sony service representative.

Focus assist functions

The VF detail function and focus assist indicator function facilitate focusing.

VF detail

Various functions are provided for the VF detail signal, which can be added only on images on the viewfinder screen in order to facilitate focusing in various situations: Functions for coloring the VF detail signal, flickering the VF detail signal by adding modulation, thickening the VF detail signal, and automatically compensating the VF detail level according to the zoom position.

Focus assist indicator

The focusing level indicator on the viewfinder screen provides a guide for focusing. The best focus setting can be easily determined by observing fluctuation of the level indicator as a guide.

"Memory Stick" [1] operation

The camera is equipped with a "Memory Stick" port, which enables setup data storage and software upgrading using a "Memory Stick."

1) Memory Stick and ▬▬ MEMORY STICK ™ are trademarks of Sony Corporation.

Various color-reproduction functions

Selection of multiple gamma tables

Seven types of standard and 4 types of hyper gamma tables are provided with this camera. The hyper gamma values enable cinemalike image creations with wide dynamic range, which are different from those achieved with conventional video gamma.

HZC-UG444 User Gamma Application Software

Installing the HZC-UG444 User Gamma Application Software enables the camera to support CvpFileEditor™ and RGB4:4:4 outputs (HDC1500R only).

For details, refer to the HZC-UG444 Operation Manual.

Multimatrix color correction

In addition the standard 6-axis matrix function, the camera has a multimatrix function that permits you to adjust the hue and chroma for color components in 16-axis directions independently. This is quite useful in color matching among multiple cameras.

Knee saturation

Change of hue and decrease in chroma that occur in highlighted areas can be compensated.
This enables reproduction of natural skin tones under strong lighting.

Low key saturation

Hue and saturation in low-key zones can be compensated. Thus, compensation for color reproduction in all zones is enabled in combination with matrix color compensation and knee saturation functions.

Versatile detail control functions

Skin-tone detail function

This function allows control (emphasis or suppression) of the detail level for just a certain hue or chroma area in the image, by creating a detail gate signal from color components of your specified hue, such as skin tones. The detail levels of three hues can be adjusted independently at the same time.

Detail boost-frequency control

The boost frequency can be adjusted from 20 to 30 MHz. This allows the detail thickness to be set appropriately for the subject, thus enabling more subtle image expression.

H/V ratio control

The ratio between horizontal and vertical detail can be adjusted.

White/black limiter

The white and black details can be limited independently.

Easy menu-based setting

Selections and settings for viewfinder display items, safety-zone marker [2] or center marker,[3] screen size marker, etc. can be made quickly and easily, using setup menus displayed on the viewfinder screen or an external monitor.

2) Safety zone marker:
   A box-shaped marker displayed on the viewfinder screen which indicates 80%, 90%, 92.5%, or 95% of the total screen area
3) Center marker:
   A cross-shaped marker which indicates the center of the viewfinder screen

Wide variety of viewfinder display options

Along with items such as operation messages, a zebra pattern,[4] a safety-zone marker, and a center marker, camera settings may also be displayed on the viewfinder screen. Furthermore, there are other indicators arranged above and below the viewfinder, such as a tally lamp, battery warning indicator, and an indicator to tell you that one or more settings are other than standard. This makes it simple to check the status of the camera.

4) Zebra pattern:
   A stripe pattern displayed on the viewfinder screen which indicates the portions where the video level is above about 70% or 100%. Used to check the video level of the subject.

Optical digital transmission (HDC1500R/1400R)

The camera uses electro-optical coding cable for 1.5-gigabit digital optical transmission between the camera and a Camera Control Unit.

High-resolution monochrome and color multiformat viewfinders (optional)

The HDVF-20A/200 multiformat 2-type monochrome CRT viewfinders and the HDVF-C35W (3.5-type) / HDVF-C30WR (2.7-type) multiformat color LCD viewfinders are available as options to cover various applications.

Prevention of electrical shock

When the power connection is unsafe, the power supply from the connected Camera Control Unit will be shut off.

System Configuration

Peripherals and related devices for the cameras are shown in the figures on the subsequent pages.

Note

Production of some of the peripherals and related devices shown in the figures has been discontinued. For advice on choosing devices, please contact your Sony dealer or a Sony sales representative.

Maximum cable run with Triax cable

The maximum Triax cable length between the HDC1550R/1450R and the HDFX100 or between the HDFX100 and the HDTX100 depends on the type of cable.

For details, refer to the Operation Manual of the HDFX100/HDTX100.

Notes

- The viewfinders function as monochrome viewfinders when monitoring a return video using the HDFX100 and the HDTX100.
- The skin gate signal is superimposed on the camera video signal. When tally becomes ON, the skin gate signal is forced to OFF.

Precautions

Note on laser beams

Laser beams may damage the CCDs. If you shoot a scene that includes a laser beam, be careful not to let a laser beam become directed into the lens of the camera.

Do not subject to severe shocks

Damage to the case or internal components may result.

When finished using

Set the power switch to OFF.

Operation and storage environment

Store in a level place with air conditioning.
If the unit gets wet, make sure it is completely dry before storage.
Avoid use or storage in the following places:
• Extremely hot or cold places
• Places with high humidity
• Places with strong vibration
• Near strong magnetic fields
• In places where it receives much direct sunlight, or near heating equipment

Condensation

If you move the camera from a very cold place to a warm place, or use it in a damp location, condensation may form on the lens or inside the camera.
The camera has no built-in condensation indicator. If you find condensation on the body or lens, switch the camera off and wait for the condensation to disappear for about one hour.

Phenomena Specific to CCD Image Sensors

The following phenomena that may appear in images are specific to CCD (Charge Coupled Device) image sensors. They do not indicate malfunctions.

White flecks

Although the CCD image sensors are produced with high-precision technologies, fine white flecks may be generated on the screen in rare cases, caused by cosmic rays.
This is related to the principle of CCD image sensors and is not a malfunction.

The white flecks especially tend to be seen
• when operating at a high environmental temperature
• when you have raised the master gain (sensitivity)
This product has a compensation function and the problem may be alleviated by automatic black balance adjustment *(see page 26)*.
Smear

When an extremely bright object, such as a strong spotlight or flashlight, is being shot, vertical tails may be produced on the screen, or the image may be distorted.

Aliasing

When fine patterns, stripes, or lines are shot, they may appear jagged or flicker.

Locations and Functions of Parts

Accessory Attachments

❶ VF connector

❷ Shoulder strap fitting post

❸ Accessory shoe

❹ Viewfinder left-right positioning ring

❺ Viewfinder front-rear positioning lever and lock knob

❻ Lens cable clamp

❼ Lens fixing lever

❽ Lens mount cap

❾ Lens mount

❿ LENS connector

⓫ Tripod mount (bottom)

⓬ Shoulder pad

❶ **VF (viewfinder) connector (20-pin)**
Connect the cable of the viewfinder (not supplied).

❷ **Shoulder strap fitting post**
Attach one end of a shoulder strap (not supplied) to this fitting post, and the other end to the fitting post on the other side of the camera.

❸ **Accessory shoe**
To attach an accessory using a 1/4-inch screw.

❹ **Viewfinder left-right positioning ring**
Loosen this ring to adjust the viewfinder position towards the left or right.

❺ **Viewfinder front-rear positioning lever and lock knob**
Loosen the lever and knob to adjust the viewfinder position towards the front or rear.

For details on adjusting the viewfinder position, see "Attaching a Viewfinder" on page 21.

❻ **Lens cable clamp**
To secure the cable of the lens (not supplied).

❼ **Lens fixing lever**
To secure the lens in the lens mount.

❽ **Lens mount cap**
The cover can be removed by moving the lens fixing lever upwards. Always keep the lens mount covered with this cap when a lens is not attached.

❾ **Lens mount**
To attach a lens (not supplied).

➓ LENS connector (12-pin)
Connect the lens cable. The camera can control the lens functions through this cable.

➒ Tripod mount
Attach the VCT-14 Tripod Adaptor when mounting the camera on a tripod.

➓ Shoulder pad
You can adjust the position so that you can get the best balance for shooting with the camera on your shoulder.

For details, see "Adjusting the Shoulder Pad Position" on page 24.

Controls and Connectors

Front right

➊ INCOM (intercom 1) button
The intercom 1 microphone is turned ON while this button is held pressed.
You can also assign other functions to this button, using the menu displayed on the viewfinder screen.

➋ RET 1 (return video 1) button
The return video 1 signal from the camera control unit is monitored on the viewfinder screen while this button is pressed. It function the same as the RET 1 button on the side (*page 15*) and that on the operation panel on the rear of the camera (*page 17* or *18*).

You can also assign other functions to this button, using the menu displayed on the viewfinder screen.

➌ Assignable switch
You can assign a function using the menu displayed on the viewfinder screen.

➍ Filter select buttons

HDC1500R/1550R
You can switch the built-in ND and CC (color temperature conversion) filters by pressing the selectors while holding the FILTER LOCAL button depressed.

Pressing the left button selects the available ND filters (clear, 1/4ND, 1/8ND, 1/16ND,1/64ND) in sequence. Pressing the right button selects the available CC filters (cross, 3200K, 4300K, 6300K, 8000K) in sequence.

HDC1400R/1450R
You can switch the built-in optical filters (clear, 1/4ND, 1/16ND,1/64ND, cross) by pressing either of these buttons while holding the FILTER LOCAL button depressed.

❺ **FILTER LOCAL button**
While holding this button depressed, press either of the filter select buttons to select the built-in optical filters.

❻ **AUTO W/B BAL (white and black balance automatic adjustment) switch**
To automatically adjust white and black balance when the camera is used in standalone status without connecting to the camera control unit.
WHT: Automatically adjust white balance.
BLK: Automatically adjust black balance.

❼ **GAIN switch**
To select the gain of the video amplifier based on lighting conditions when the camera is used in standalone status without connecting a camera control unit.
When shipped from the factory, the values set are $L = 0$ dB, $M = 6$ dB, and $H = 12$ dB.

❽ **OUTPUT (output signal selection)/AUTO KNEE switch**
To select the signal (color bar signal or camera's video signal) to be used as output to a VTR, the viewfinder or a video monitor when the camera is used in standalone status without connecting a camera control unit.
When the camera's video signal is being used as output, the auto knee function may be used.
The relationship between the switch setting and the output signal and auto knee function is shown in the table below.

OUTPUT	AUTO KNEE	Function
BARS	OFF	Output is a color bar signal.
CAM	OFF	Output is the camera's video signal. The auto knee circuit is disabled.
CAM	ON	Output is the camera's video signal. The auto knee circuit is enabled.

❾ **WHITE BAL (white balance memory selection) switch**
To select the white balance adjustment method or the memory used to store the adjusted value when the camera is used in standalone status without connecting a camera control unit.
PRST (preset): White balance is adjusted to a preset value corresponding to a color temperature of 3200K.

A or B: Selects memory A or B.

❿ **DISPLAY switch**
The functions of the DISPLAY switch are as follows:
ON: Characters and messages showing the camera settings and operating status may be displayed on the viewfinder screen.
OFF: Status messages will not appear on the viewfinder screen.
MENU: Menus for camera settings will be displayed on the viewfinder screen.

⓫ **CANCEL/STATUS switch**
CANCEL: When a menu is displayed on the viewfinder screen, you can cancel any changed settings or return the display to the previous menu.
STATUS: When no menu is displayed on the viewfinder screen, the status information of this camera is displayed.

⓬ **"Memory Stick" section**
A slot to accommodate a "Memory Stick" and an access lamp are provided behind the panel.
The access lamp lights in red while writing or reading data to/from a "Memory Stick."

Note

When the access lamp is lit, do not insert/remove the "Memory Stick" or turn off the camera.

⓭ **MENU SEL (menu select) knob/ENTER button (rotary encoder)**
To select settings from menus displayed on the viewfinder screen (by rotating the knob) and to confirm settings (by pushing the button).

Note

When a camera control unit or a remote control device, such as MSU-900/950 and the RCP-700/900-series Remote Control Panel, is connected, the functions of ❻ to ❾ are controlled from the external control device and the controls on the camera are disabled.

Front left
① RET 1 button
② MIC 1 IN connector
③ MIC power switch
④ SHUTTER switch
⑤ INTERCOM LEVEL control
⑥ RET 2 button

➊ RET 1 (return video 1) button

The return video 1 signal from the camera control unit is monitored on the viewfinder screen while this button is pressed. It function the same as the RET1 buttons on the handle (*page 13*) and that on the operation panel on the rear of the camera (*page 17* or *18*).

You can also assign other functions to this button, using the menu displayed on the viewfinder screen.

➋ MIC 1 IN (microphone 1 input) connector (XLR 3-pin)

Connect a microphone.

This connector and the AUDIO IN CH-1 connector (*page 20*) on the operation panel on the rear of the camera are alternately activated with the CH1 audio input select switch (*page 20*).

➌ MIC (microphone) power switch

+48V: To supply a power of +48 V to the connected microphone.

OFF: Not to supply a power to the connected microphone.

➍ SHUTTER switch

For setting the electronic shutter functions when the camera is used in standalone status without connecting a camera control unit.

OFF: The electronic shutter does not function.

ON: The electronic shutter is activated.

SEL: The shutter speed and shutter mode change each time the switch is set to this position.

For details, see "Setting the Electronic Shutter" on page 28.

➎ INTERCOM LEVEL control

To adjust the intercom/earphone volume level.

The intercom level adjustment is enabled when the INTERCOM 1 and 2 LEVEL/MIC switches (on the SY-type operation panel, *page 17*) or the LEVEL switch (on the European-type operation panel, *page 18*) on the rear of the camera are set to "FRONT."
➏ RET 2 (return video 2) button

When this button is pressed, the picture on the viewfinder screen changes to the return video signal selected with the RET 2 select switch (*page 17* or *18*) on the operation panel on the rear of the camera.

You can also assign other functions to this button, using the menu displayed on the viewfinder screen.

Rear

The figure shows HDC1500R.

2 Tally lamp and switch

Shoulder strap fitting post (*page 12*)

Operation panel (*page 17*, *page 18*)

3 CCU connector (HDC1500R/1400R)
HDCU/HDFX connector
(HDC1550R/1450R)

4 SDI 1 connector (HDC1500R only)

5 PROMPTER2 connector
(HDC1500R only)

Connector panel (*page 19*)

6 CALL button

1 CAMERA POWER switch

1 CAMERA POWER switch
CCU: Power supply will be received from the camera control unit.
EXT: Power supply will be received through the DC IN connector.

2 Tally lamp and switch
ON: The tally lamp lights when a tally signal is input to the connected camera control unit or a call signal is generated in response to pressing of a CALL button.
OFF: The tally lamp is prevented from lighting.

3 CCU (Camera Control Unit) connector (optical/ electrical multi-connector) (HDC1500R/1400R)
Connect a camera control unit using an optical electro-composite cable.

3 HDCU/HDFX (HD Triax CCU) connector (Triax connector) (HDC1550R/1450R)
Connect the HDFX100 HD Triax CCU Adaptor using a Triax cable. A camera control unit can be connected via the HDFX100.

4 SDI 1 (serial digital interface 1) connector (BNC type) (HDC1500R only)
For HD-SDI signal output

5 PROMPTER2 connector (BNC type) (HDC1500R only)
For prompter 2 signal output.
This operates only when a camera control unit having a prompter 2 input is connected.
6 CALL button
When you press this button, the red tally lamp of the RCP-700/900-series Remote Control Panel or the MSU-900/950 Master Setup Unit, will light. Use to call the operator of the RCP or MSU.

Operation panel

SY type: For JN3/JN4/SYL/UC7 (USA, Canada, East Asia and other countries) models (for NTSC areas)
For details on the differences among models, see "Overview" on page 5.

❶ **INTERCOM1 and INTERCOM2 controls and switches**

❷ RET 1 button and select switch

❸ RET 2 button and select switch

❹ LIGHT switch

PGM1 control

PGM2 control

Line select switch

INCOM level control

LEVEL/MIC switch

❶ **INTERCOM1 and INTERCOM2 controls and switches**

There are PGM1 and 2 controls incorporated with a line select switch, a LEVEL/MIC switch, and INCOM level control each for intercom line 1 and 2.

PGM1 (program 1) control
Adjust the audio listening level of program 1.

PGM2 (program 2) control
Adjust the audio listening level of program 2.

LEVEL/MIC switch
REAR/ON: The intercom headset microphone is turned on. The intercom audio listening level is adjusted with the INCOM level control.
REAR/OFF: The intercom headset microphone is turned off. The intercom audio listening level is adjusted with the INCOM level control.
FRONT/OFF: The intercom headset microphone is turned off. The intercom audio listening level is adjusted with the INCOM level control and the INTERCOM LEVEL control on the front of the camera *(page 15)*.

INCOM level control
Adjust the intercom audio listening level.

Line select switch
Select the intercom line.

PROD: Producer line
ENG: Engineer line

❷ **RET 1 (return video 1) button and select switch**
The return video signal selected with the switch is displayed on the viewfinder screen while the button is pressed.

❸ **RET 2 (return video 2) button and select switch**
When other return video systems are used in addition to return video 1, you can monitor the signal selected with the switch on the viewfinder screen while pressing the button.
Note

The RET 1 button has priority over the RET 2 button if both buttons are pressed.

❹ **LIGHT switch**
Set to ON to illuminate the operation panel.

European type: For CED (Europe) and E33 (China and South Asia) models (for PAL areas)

For details on the differences among models, see "Overview" on page 5.

❶ INTERCOM1 and INTERCOM2 controls and switches

The reception level controls are common to intercom 1 and intercom 2. The talk lines can be set independently for intercom 1 and intercom 2.

ENG (engineer line) control:
Adjust the intercom audio listening level of the engineer line.

PROD (producer line) control
Adjust the intercom audio listening level of the producer line.

PGM1 (program 1) control
Adjust the audio listening level of program 1.

PGM2 (program 2) control
Adjust the audio listening level of program 2.

TRACKER control
Adjust the intercom audio listening level at the TRACKER connector (*page 19*) on the connector panel when using the connector for intercom.

MIC LINE1 (intercom microphone line 1) switch
Select the talk line for intercom 1.
PROD: To talk over the producer line
OFF: To turn off the headset microphone for intercom line 1.
ENG: To talk over the engineer line

MIC LINE2 (intercom microphone line 2) switch
Select the talk line for intercom 2.
PROD: To talk over the producer line
OFF: To turn off the headset microphone for intercom line 2.
ENG: To talk over the engineer line

LEVEL switch
REAR: The intercom audio listening level is adjusted with the controls on this panel.
FRONT: The intercom audio listening level is adjusted with the INTERCOM LEVEL control on the front of the camera.

❷ RET 1 (return video 1) button and select switch
The return video signal selected with the switch is displayed on the viewfinder screen while the button is pressed.

❸ RET 2 (return video 2) button and select switch
When other return video systems are used in addition to return video 1, you can monitor the signal selected with the switch on the viewfinder screen while pressing the button.
Note

The RET 1 button has priority over the RET 2 button if both buttons are pressed.

❹ LIGHT switch
Set to ON to illuminate the operation panel.

Connector panel

The figure shows HDC1500R.

① EARPHONE jack

② RET CTRL connector

③ CRANE connector

④ TRACKER connector

⑤ DC OUT connector

⑥ DC IN connector

⑦ INTERCOM1 and 2 connectors

⑧ REMOTE connector

⑨ GENLOCK IN/RET IN/PROMPTER connector and switch

⑩ TEST OUT connector

⑪ SDI 2 connector (HDC1500R) SDI connector (HDC1550R/1400R/1450R)

⑫ AUDIO IN CH1 and CH2 connectors and switches

---

❶ EARPHONE jack (stereo minijack)

For connecting an earphone or headset to hear the intercom audio.

❷ RET CTRL (return control) connector (6-pin)

For connection to a CAC-6 Return Video Selector.

❸ CRANE connector (12-pin)

For external interface, such as viewfinder (and external data with HDC1500R/1400R).

❹ TRACKER connector (10-pin)

For external interface, such as intercom and tally.

❺ DC OUT (DC power supply output) connector (4-pin)

To supply power to devices such as a wireless receiver (optional).

❻ DC IN (DC power supply input) connector (XLR 4-pin)

Used for connection to the AC-DN10 AC Adaptor to supply power to the camera.

❼ INTERCOM1 and 2 (intercom 1 and 2) connectors (XLR 5-pin)

Used for input and output of intercom audio signals if an XLR 5-pin headset is connected.

The INTERCOM 1 connector can be used for communication over the engineer line even when the power is off, as long as the power LED is lit in red.

❽ REMOTE connector (8-pin)

For connection to an RM-B150/B750 Remote Control Unit, RCP-700/900-series Remote Control Panel, or MSU-900/950 Master Setup Unit.

Note

When the camera is connected to a CCU, do not connect any remote control device, such as RCP and MSU, to this connector.

❾ GENLOCK IN/RET IN/PROMPTER (external gen-lock signal input/return video signal input/prompter 1 signal output) connector (BNC type) and switch

Set the switch according to the signal at the connector.

GENLOCK IN: For input of an external gen-lock signal (VBS or 3-level sync) when the camera is used without a camera control unit connected

RET IN: For input of the return video signal when the camera is used without a camera control unit connected.

The connector accepts analog HD signals only. SDI signals are not acceptable. Supply a signal of 1080i (720P is not acceptable).

The signal supplied to this connector cannot be fed as RET OUT from the TEST OUT or SDI OUT connector.

PROMPTER: For output of the prompter 1 signal (valid only when a camera control unit is connected). When a camera control unit having two prompter inputs is

connected, the signal of input 1 is output from this connector.

❿ TEST OUT connector (BNC type)
To output the analog signal.
This also supplies the VBS signal, an HD signal nearly equal to the signal output from the VF connector, an HD-SYNC signal, or an SD-SYNC signal depending on which of these you have selected on the menu.

For details on the output signals, see "Setting the Camera Outputs" (page 31).

⓫ SDI 2 (serial digital interface 2) connector (BNC type) (HDC1500R)
For HD-SDI or SD-SDI signal output.

For details on the output signals, see "Setting the Camera Outputs" (page 31).

**⓫ SDI (serial digital interface) connector (BNC type) (HDC1550R/1400R/1450R)**
For HD-SDI or SD-SDI signal output.

For details on the output signals, see "Setting the Camera Outputs" (page 31).

⓬ AUDIO IN CH1 and CH2 connectors (XLR 3-pin) and switches
Connect audio signals. An input select switch and microphone power switch are provided for each channel.

The figure shows HDC1500R.
CH1 audio input select switch
Microphone power switches
CH2 audio input select switch

AUDIO IN CH1 connector   AUDIO IN CH2 connector

CH1 audio input select switch
Set to the appropriate position according to the equipment connected to the AUDIO IN CH1 connector.
LINE: When a line-level (0 dBu) signal source is connected
FRONT MIC: When using the microphone connected to the MIC 1 IN connector
MIC: When an external microphone is connected

CH2 audio input select switch
Set to the appropriate position according to the equipment connected to the AUDIO IN CH2 connector.
LINE: When a line-level (0 dBu) signal source is connected
AES/EBU (HDC1500R/1400R only): When a digital audio signal is connected (The signal must be in synchronization with the camera output). The corresponding position on the HDC1550R/1450R is invalid (NC).
MIC: When an external microphone is connected

Microphone power switches
When a microphone is connected to the corresponding AUDIO IN connector, set whether or not to supply a power to the microphone.
+48V: To supply a power of +48 V
OFF: Not to supply a power
(No function has been assigned to the lowermost position. No power is supplied to the microphone.)
Note

To supply a power of +12 V, modification of the camera is required.

Preparations

Attaching a Lens

For information on handling lenses, refer to the lens' operation manual.

Attaching procedure

5 2 4 1,3

1 Push the lens fixing lever upwards and remove the lens mount cap from the lens mount.

2 Align the lens' alignment pin with the notch in the upper part of the lens mount and insert the lens into the mount.

3 While supporting the lens, push the lens fixing lever downwards to secure the lens.

4 Connect the lens cable to the LENS connector.

5 Secure the lens cable with the cable clamp.

Adjusting the Flange Focal Length

Adjustment of the flange focal length (the distance between the lens mount attachment plane and the imaging plane) is necessary in the following situations:
• The first time a lens is attached
• When changing lenses
• If the focus is not sharp at both telephoto and wide angle when zooming

The flange focal length can be more precisely adjusted by using the focus assist indicators.

See "Displaying the focus assist indicators" on page 30 for the focus assist indicators.

Note

The various parts of the lens used in adjusting the flange focal length are in different positions on different lenses. Refer to the operation manual for the particular lens.

Adjusting procedure

1 Set the iris control to manual, and open the iris fully.

2 Place a flange focal length adjustment chart approximately 3 meters from the camera and adjust the lighting to get an appropriate video output level.

3 Loosen the Ff (flange focal length) ring lock screw.

4 With either manual or power zoom, set the zoom ring to telephoto.

5 Aim at the flange focal length adjustment chart and turn the focus ring to focus the image.

About 3 meters (10 ft)
6 Set the zoom ring to wide angle.

7 Turn the Ff ring to bring the chart into focus. Take care not to move the distance ring.

8 Repeat steps **4** through **7** until the image is in focus at both telephoto and wide angle.

9 Tighten the Ff ring lock screw.

Attaching a Viewfinder

**Caution**

When the viewfinder is attached, do not leave the camera with the eyepiece facing the sun. Direct sunlight can enter through the eyepiece, be focused in the viewfinder and cause fire.

Attaching a viewfinder

The instructions are made using the HDVF-20A/200/C30WR/C35W viewfinder as an example.

For details on the viewfinder, refer to the instruction manual of the viewfinder.

VF connector
Viewfinder stopper
MIC 1 IN connector
1 Slide the viewfinder in the direction of the arrow.

The viewfinder stopper automatically pops down.

2 Loosen the viewfinder left-right positioning ring, slide the viewfinder side to side to the most convenient position and tighten the ring. *(See "To adjust the position to the left or right" below.)*

3 Connect the viewfinder cable to the VF connector of the camera.

4 Connect the microphone cable to the MIC 1 IN connector of the camera.

Adjusting the viewfinder position

The viewfinder position may be adjusted towards the front and rear and to the left and right to make it easy to see into it.

To adjust the position to the left or right

Viewfinder left-right positioning ring
1 Loosen the viewfinder left-right positioning ring.

2 Slide the viewfinder left or right to move it into a good viewing position.

3 Tighten the viewfinder left-right positioning ring.

To adjust the position forward or backward

LOCK knob
Viewfinder front-rear positioning lever
1 Loosen the viewfinder front-rear positioning lever and LOCK knob.

2 Slide the viewfinder towards the front or rear of the camera to move it into a good viewing position.

3 Tighten the viewfinder front-rear positioning lever and LOCK knob.

Detaching the viewfinder

Loosen the viewfinder left-right positioning ring, pull the viewfinder stopper, then pull out the viewfinder by sliding it in the direction opposite to that when attached.

Keeping the viewfinder from hitting your leg (using BKW-401)

To keep the viewfinder from bumping your leg when carrying the camera, install the BKW-401 Viewfinder Rotation Bracket (optional) and rotate the viewfinder upwards.
Note

Lock the viewfinder in a slightly forward position before rotating it upwards. If the viewfinder is in its rearmost

position, the arm of the viewfinder rotation bracket will strike the grip.

Attaching procedure of the BKW-401

1 Turn the arm of the rotation mechanism assembly of the BKW-401 in the direction of the arrow in the following illustration.
Next, using a hexagonal wrench 3 mm across flats, remove the bolts (M4 × 8) together with the washers, to separate the rotation mechanism assembly from the viewfinder front-back positioning mechanism assembly.
2 In the same manner as step **1**, remove the viewfinder shoe of the camera from the front-rear positioning mechanism.
3 Using the two bolts (M4 × 8) and the washers removed from the camera in step **2**, attach the rotation mechanism assembly of the BKW-401 to the camera.

Hexagon socket bolts (M4 × 8)
4 Adjust the front-rear position so that the camera handle does not interfere when you rotate the BKW-401 arm upwards.

Not to interfere
Attaching the Cable Clamp Belt (Supplied)

You can secure the camera cable to the camera by attaching the supplied cable clamp belt.

1 Insert the belt bracket into hole Ⓐ or Ⓑ of the cable clamp belt.

Belt bracket
Ⓑ
Ⓐ
2 Remove two +B3×5 screws and a blind screw shown in the figure below from the camera.

Blind screw

+B3×5 screws
3 Secure the cable clamp belt to the camera, using the two supplied +B3×8 screws.

+B3×8 screws
4 ① Release the buckle, ② bundle the cable with the belt, ③ then lock the buckle again.

Camera cable
5 Adjust the length by pulling down the end of the belt.
Adjusting the Shoulder Pad Position

You can shift the shoulder pad from its center position (factory setting) backward by up to 10 mm (3/8 inch) or forward by up to 25 mm (1 inch). This adjustment helps you get the best balance for shooting with the camera on your shoulder.

Adjusting procedure

Shoulder pad lock lever

1,3

Bottom of the camera **2** Shoulder pad
1 Raise the lever in the center of the shoulder pad to unlock the shoulder pad.

2 Slide the shoulder pad backward or forward until it is in the most convenient position.

3 Move the lever down to lock the shoulder pad in the selected position.

Mounting the Camera to a Tripod

Mount the camera to a tripod using a VCT-14 Tripod Adaptor.

Caution
- Select an appropriate hole from among those at the bottom of the tripod adaptor considering the balance of the weight of the camera and the tripod adaptor. If an inappropriate hole is selected, the camera may fall over.
- Check that the size of the selected hole matches that of the screw of the tripod. If they do not match, the tripod adaptor cannot be attached to the tripod securely.

Mounting procedure

1 Attach the tripod adaptor to the tripod and secure it with the screw.

Tripod adaptor

Platform of the tripod
2 Place the camera on the tripod adaptor, and slide forward it along the groove of the tripod adaptor until it clicks.
To remove the camera from the tripod adaptor

Hold down the red button and pull the lever in the direction of the arrow.
Lever

Red button

If the pin of the tripod adaptor does not return to its original position

After removing the camera, if the pin of the tripod adaptor does not return to its original position, hold down the red button and move the lever in the direction of the arrow to return the pin to its original position. It is not possible to mount a camera with the pin not seated.

Original position

Pin
Adjustments and Settings for Shooting

Adjusting the Black Balance and White Balance

In order to maintain high picture quality, it is necessary to set the black balance and white balance appropriately for the conditions.

> **Note**
>
> When a camera control unit or a remote control device, such as MSU-900/950 and the RCP-700/900-series Remote Control Panel, is connected, the black balance and white balance are controlled from the external control device and controls on the camera are disabled.

Black balance adjustment

The black balance needs adjustment in situations like the following:
• The first time the camera is used
• When the camera is used after a long period of disuse
• When the surrounding temperature changes greatly
• When the gain value is changed using the setup menus
Normally, there is no need to adjust the black balance every time the camera is turned on.

White balance adjustment

Always readjust the white balance when lighting conditions change.

About the viewfinder screen

After the process of adjusting the black balance or white balance begins, messages about the progress and results of the adjustment will be displayed on the viewfinder screen.

> **Note**
>
> Adjusted values set through automatic adjustment, and other settings, are stored in the camera's memory and preserved even when the camera power is turned off.

Adjusting the black balance

Push the AUTO W/B BAL switch toward BLK (downward).

AUTO W/B BAL switch
Automatic adjustment of black balance begins.
In automatic adjustment of black balance, both the black set and black balance are adjusted.

During adjustment, a message like the one in the figure below will be displayed on the viewfinder screen.

ABB:EXECUTING
When the adjustment process is completed, the message "ABB: OK" will be displayed. The adjusted value is automatically stored in memory.

> **Notes**
>
> • During black balance adjustment, the iris will be automatically closed.
> • During black balance adjustment, the gain switching circuit will work automatically, and the viewfinder screen will flicker several times. This is not a malfunction.

When automatic black balance adjustment fails

If the automatic black balance adjustment process does not end successfully, the error message "ABB: NG" will be displayed on the viewfinder screen for approximately three seconds.
If this error message is displayed, try black balance adjustment again.
If the error message continues to be displayed after several attempts, the camera requires internal inspection.

About black balance memory

The black balance values stored in memory will be preserved even when the camera power is turned off.

Adjusting the white balance

1 Set the WHITE BAL switch to A or B.

WHITE BAL switch
2 Select the filter setting according to the lighting conditions.

HDC1500R/1550R

To select the ND filter
Press the ND filter select button while holding the FILTER LOCAL button depressed.
Each press of the select button switches the available ND filters (clear, 1/4ND, 1/8ND, 1/16ND,1/64ND) in sequence.

To select the CC filter
Press the CC filter select button while holding the FILTER LOCAL button depressed.
Each press of the select button switches the available CC filters (cross, 3200K, 4300K, 6300K, 8000K) in sequence.

CC filter select button

ND filter select button

FILTER LOCAL button
ND Filter		Color temperature conversion filter	
1	clear	A	cross filter
2	1/4 ND	B	3200K (clear)
3	1/8 ND	C	4300K
4	1/16 ND	D	6300K
5	1/64 ND	E	8000K

HDC1400R/1450R

Press the filter select UP or DOWN button while holding the FILTER LOCAL button depressed.
Each press of the UP or DOWN button switches the available optical filters in sequence.

Filter select DOWN button

Filter select UP button

FILTER LOCAL button
Optical Filter	
1	clear
2	1/4 ND
3	1/16 ND
4	1/64 ND
5	cross

3 Place a white pattern in the same lighting conditions as the subject, and zoom in on it so that a white area is obtained in the screen to satisfy the positional and quantitative requirements illustrated below.

A white object (white cloth, a white wall, etc.) near the subject may be used in place of a white pattern.

A rectangle centered in the screen. The length of the sides must be at least 70% of the height and width of the screen.
Within this rectangle, there must be an area of white greater than 10% of the entire screen.

Note

Be careful not to have any spots of high illumination in the rectangle.

4 Adjust the lens iris opening.

With a manually adjusted lens: Set the opening to an appropriate value.
With a lens which has automatic iris control: Set the lens' automatic/manual iris control switch to automatic.

5 Push the AUTO W/B BAL switch to WHT and release the switch.

AUTO W/B BAL switch
The switch will return to the center position, and adjustment will be performed.

During adjustment, the message "AWB: EXECUTING" will be displayed on the viewfinder screen.
After about one second, a message like the one in the figure below will be displayed, and the adjustment process will complete. The adjusted value will be automatically stored in the memory (A or B) selected in step **1**.

AWB : OK

Note

When using a zoom lens with automatic iris control capability, hunting[1] may occur. Adjust the lens' iris gain control (labeled IG, IS, S, etc.).

1) Hunting: The automatic iris responds over and over, and the image repeatedly darkens and lightens.

For more information, refer to the lens' operation manual.

When automatic white balance adjustment fails

If the white balance adjustment process does not end successfully, the error message "AWB: NG" will be displayed on the viewfinder screen for approximately three seconds.
If this error message is displayed, try white balance adjustment again.
If the error message continues to be displayed after several attempts, the camera requires internal inspection.

When there is no time to adjust the white balance

Set the WHITE BAL switch to PRST. The white balance will be set automatically according to the filter settings.

About white balance memory

The white balance values stored in memory will be preserved even when the camera power is turned off.
There are two white balance memories, A and B. When the AUTO W/B BAL switch is pushed to the WHT side, the white balance will be adjusted automatically according to the filter settings. The adjusted value will be stored in the selected memory. Each memory can store up to five adjusted values, for a total of 10.

Setting the Electronic Shutter

This section explains the different modes which can be used for the electronic shutter and gives the procedures for setting the shutter mode and shutter speed.

Note

When a camera control unit or a remote control device, such as MSU-900/950 Master Setup Unit and RCP-700/900-series Remote Control Panel, is connected, the electronic shutter is controlled from the external control device and control on the camera are disabled.

About the shutter modes

The shutter modes that can be used with the electronic shutter of the camera and the shutter speeds that may be selected are as follows:

Shutter modes and speeds

Shutter mode	Shutter speeds [1]	Usage
Standard	1/100, 1/125, 1/250, 1/500, 1/1000, 1/2000 seconds	Use to obtain clear images of quickly moving subjects
ECS (Extended Clear Scan)	Continuously variable in the range of 60.00 Hz to 4300 Hz	Use to obtain images on video monitors without horizontal striping

1) The values in the table are those with 59.94i. With other formats, the available values may be different.

Note

With artificial lighting, particularly fluorescent lights and mercury vapor lamps, the brightness appears to be constant, but in fact the strength of the red, green, and blue components varies with the power supply frequency. This phenomenon is known as "flicker." When using the electronic shutter under these lighting conditions, there are certain cases in which the flicker is more noticeable. In particular, color flicker is evident when the power frequency is 60 Hz. In areas where the power frequency is 50 Hz, setting the shutter speed to 1/100 second will reduce the flicker.

Selecting the shutter mode and speed

The shutter mode, and the shutter speed in standard mode, are set using the SHUTTER switch.

Setting the shutter mode, and shutter speed in Standard mode

1 Push the SHUTTER switch from the ON position to the SEL position.
SHUTTER switch

The current shutter setting will be displayed in the setting change/adjustment progress message display area of the viewfinder screen for about three seconds. Example: "Shutter: 1/250"

2 Push the SHUTTER switch to the SEL position again before the display disappears. Repeat this action until the desired mode or speed is displayed.

When all modes and speeds are displayed, they will be displayed in the following order:

Example: with 59.94i

Standard mode

$$1/100 \rightarrow 1/125 \rightarrow 1/250 \rightarrow 1/500 \rightarrow 1/1000 \rightarrow 1/2000$$

ECS mode
Setting the Focus Assist Functions

Using the OPERATION menu, the assist functions for easier focusing on the viewfinder, can be activated.

Adding the VF detail signal

Adding the VF detail signal to sharp edges in the image on the viewfinder screen makes it easier to check the focusing condition by observing changes in the detail signal or in the color converted from the detail signal (color detail). The focus setting where the detail signal becomes strongest is the best focus setting.

1 Turn on the camera.

2 Set the the DISPLAY switch to MENU while holding the MENU SEL knob/ENTER button pressed.

The camera enters Menu mode, and "TOP" is displayed at the upper right corner of the screen.

3 Rotate the MENU SEL knob/ENTER button to align the arrow marker (➡) to "TOP" and push on the MENU SEL knob/ENTER button.

The TOP MENU screen is displayed.

```
<TOP MENU>

➡USER
 USER MENU CUSTOMIZE
 ALL
 ·OPERATION
 ·PAINT
 ·MAINTENANCE
 ·FILE
 ·DIAGNOSIS
```
4 Rotate the MENU SEL knob/ENTER button to align the arrow marker (➡) to OPERATION and push on the MENU SEL knob/ENTER button.

The CONTENTS page of the OPERATION menu is displayed.

```
    CONTENTS      00   TOP
↓↓
➡01.<VF DISPLAY>
 02.<'!'IND>
 03.<VF MARKER>
 04.<VF DETAIL>
 05.<FOCUS ASSIST>
 06.<ZEBRA>
 07.<CURSOR>
 08.<VF OUT>
 09.<SWITCH ASSIGN1>
 10.<SWITCH ASSIGN2>
```

5 Rotate the MENU SEL knob/ENTER buttonto align the arrow marker (➡) to <VF DETAIL> and push on the MENU SEL knob/ENTER button.

The <VF DETAIL> page is displayed.

```
<VF DETAIL>        ➡ 04 TOP

VF DETAIL :  ON      25%
 CRISP     :   0
 FREQUENCY:   9M
 FAT MODE :  OFF
 FLICKER  :  OFF
 AREA     :  70%
 ZOOM LINK:  100%
COLOR DETAIL :  ON   BLUE
 PEAK COLOR  :  ON
 CHROMA LEVEL:  100%
```
6 Rotate the MENU SEL knob/ENTER button to align the arrow marker (➡) to the item to be set and push on the MENU SEL knob/ENTER button.

To use the VF detail signal
Set VF DETAIL to ON to activate the VF detail function to add the detail signal to sharp edges in the image. You can adjust the signal level (strength) in the range of 0 to 100% (default 25%).
You can adjust the characteristics of the detail signal with the menu items below.
CRISP: Adjust to eliminate fine portions of the detail signal.
FREQUENCY: Change the detection band of sharp edges.
FAT MODE: Turn ON/OFF the function to thicken the detail signal.

FLICKER: Turn ON/OFF the function to flicker the detail signal, which makes it easier to check the signal on a CRT screen.

AREA: To limit the area where to display the detail signal.

ZOOM LINK: Set the VF detail level at the full WIDE position. (The VF detail level changes according to the zoom position.)

To use the color detail

Set COLOR DETAIL to ON to convert the VF detail signal to a specified color. This makes it easier to check the signal on an LCD screen, including the viewfinder screen. The display color can be selected at the column next to ON.

You can adjust the coloring with the menu items below.

PEAK COLOR: Turn ON/OFF the function to change the color where the detail signal is strongest.

CHROMA LEVEL: To reduce the chroma components of the video signal (only for video signals on the viewfinder).

7 Rotate the MENU SEL knob/ENTER button to display the desired setting and push on the MENU SEL knob/ENTER button.

8 To finish the adjustment, set the DISPLAY switch to OFF to exit Menu mode.

Displaying the focus assist indicators

The focus assist indicator function extracts the irregularities of a subject and converts the integrated values to a level indicator, which shows the focus condition.

Level indicator (its position and operations can be adjusted.)
Area marker to display the detection area of the focus (its size and position can be adjusted.)

The focus setting where the indicator shows the maximum level is the best focus setting. (The range of the indicator substantially changes depending on picture elements or shooting environments. Adjust it with GAIN and OFFSET as required.)

1 Display the CONTENTS page of the OPERATION menu (referring to step **1** to **4** in "Adding the VF detail signal").

2 Rotate the MENU SEL knob/ENTER buttonto align the arrow marker (➡) to <FOCUS ASSIST>and push on the MENU SEL knob/ENTER button.

The <FOCUS ASSIST> page is displayed.

```
<FOCUS ASSIST>    ➡ 05 TOP

INDICATOR  : OFF
 MODE      : BOX     BOTTOM
 LEVEL     : 3       QUICK
 GAIN      : 50
 OFFSET    : 50
AREA MARKER:  ON
 SIZE      : MIDDLE
 POSITION  : CENTER
 POSITION H: 50
 POSITION V: 50
```

3 Rotate the MENU SEL knob/ENTER button to align the arrow marker (➡) to the item to be set and push on the MENU SEL knob/ENTER button.

To use the level indicator

Setting INDICATOR to ON displays the level indicator on the viewfinder.

You can set the display format with the menu items below.

MODE: Set the type and position of the indicator.

LEVEL: Set the density and the response speed of the indicator.

GAIN: Set the sensitivity of the indicator.[1]

OFFSET: Set the offset of the focus detection value.[2]

1) Normally, the sensitivity of the indicator is automatically set to the optimum value in conjunction with the AREA MARKER SIZE set value. Use this setting when an optimum sensitivity value cannot be obtained, depending on the shooting environment.

2) Normally, the optimum offset is automatically set in conjunction with the AREA MARKER SIZE and MASTER GAIN set values. Use this setting when the optimum offset cannot be obtained, depending on the shooting environment.
To use the area marker

Setting AREA MARKER to ON displays the detection area of the focus as a marker on the viewfinder screen. You can set the size and position of the detection area with the menu items below.

SIZE: The size of the detection area can be changed. (If the area size is too large, both the subject and the background are included in the area, making the indicator display may easily deviate from the subject.)

POSITION: Roughly set the position of the detection area.

POSITION H: Finely adjust the position of the detection area in the horizontal directions.

POSITION V: Finely adjust the position of the detection area in the vertical directions.

4 Rotate the MENU SEL knob/ENTER button to display the desired setting and push on the MENU SEL knob/ENTER button.

5 To finish the adjustment, set the DISPLAY switch to OFF to exit Menu mode.

- When INDICATOR is ON, the effect area marker is disabled even if EFFECT is set ON on the <VF MARKER> page.
- When AREA MARKER is ON, the safety zone marker is disabled even if SAFETY ZONE is set ON on the <VF MARKER> page.
- When displaying the focus assist indicator, check that the flange focal length has been precisely adjusted.

  See "Adjusting the Flange Focal Length" on page 21 for the flange focal length.

Setting the Camera Outputs

You can specify video signals directly output from the camera, with menu operations.

Note

The MAIN (camera picture), RET (return video), or VF (the same picture as that displayed on the viewfinder screen) setting is common to SD-SDI and VBS. Different signals cannot be output.

The menu pages used for the output settings have been registered to the USER menu at the factory.
- <POWER SAVE>
- <OUTPUT FORMAT>
- <TEST OUT>
- <SDI-2 OUT>(HDC1500R)/<SDI OUT>(HDC1550R/ 1400R/1450R)
- <DOWN CONVERTER>

Set the following menu items to the settings shown in the table.

For details on menu operations and the USER menu, see "Menu Operations" on page 34.

Outputting the signal being shot (camera picture)

The same textual information as that displayed on the viewfinder screen can be added to the output signal by setting CHARACTER to "ON" on the <SDI-2 OUT> (<SDI OUT>) or <TEST OUT> page.

To output as HD-SDI

Menu page	Item	Setting
<POWER SAVE>	SDI-2 OUT (HDC1500R)/ SDI OUT(HDC1550R/ 1400R/1450R)	ACTIVE
<SDI-2 OUT>/<SDI OUT>	OUTPUT	MAIN

To output as SD-SDI

Menu page	Item	Setting
<POWER SAVE>	SDI-2 OUT (HDC1500R)/ SDI OUT(HDC1550R/ 1400R/1450R)	ACTIVE
	DOWN CONVERTER	ACTIVE
<DOWN CONVERTER>	OUTPUT SIGNAL	MAIN
<SDI-2 OUT>/<SDI OUT>	OUTPUT	SD-SDI

To output as VBS

Menu page	Item	Setting
<POWER SAVE>	DOWN CONVERTER	ACTIVE
<DOWN CONVERTER>	OUTPUT SIGNAL	MAIN
<TEST OUT>	OUTPUT	VBS

Constantly outputting a return video

- When a camera control unit is connected, one of the signals being supplied to the camera control unit can be output from the camera.
- The last selected return signal is output.
- The same textual information as that displayed on the viewfinder screen can be added to the output signal by setting CHARACTER to "ON" on the <SDI-2 OUT>(<SDI OUT>) or <TEST OUT> page.

To output as HD-SDI

Menu page	Item	Setting
<POWER SAVE>	SDI-2 OUT (HDC1500R)/ SDI OUT(HDC1550R/ 1400R/1450R)	ACTIVE
<SDI-2 OUT>/<SDI OUT>	OUTPUT	RET

To output as SD-SDI

Menu page	Item	Setting
<POWER SAVE>	SDI-2 OUT (HDC1500R)/ SDI OUT(HDC1550R/ 1400R/1450R)	ACTIVE
	DOWN CONVERTER	ACTIVE
<DOWN CONVERTER>	OUTPUT SIGNAL	RET
<SDI-2 OUT>/<SDI OUT>	OUTPUT	SD-SDI

To output as VBS

Menu page	Item	Setting
<POWER SAVE>	DOWN CONVERTER	ACTIVE
<DOWN CONVERTER>	OUTPUT SIGNAL	RET
<TEST OUT>	OUTPUT	VBS

Outputting the same image as that on the viewfinder screen

- With HD-SDI, you can obtain a signal that includes the same information as that being displayed on the viewfinder screen according to the settings of the VF MARKER, CHARACTER, VF DETAIL, ZEBRA, etc. The ON/OFF or other settings for adding information are common to those for the viewfinder. The output is synchronized with switching among Y, R, G, and B or switching to a return signal.
- With SD-SDI or VBS, the output is synchronized only with switching between a return signal and the camera image. It does not correspond to switching among Y, R, G, and B. Information other than CHARACTER (such as VF MARKER, VF DETAIL, ZEBRA) cannot be added to the output.

Note

With the settings for outputting the same image as that on the viewfinder screen, the output will be obtained in 1080i, even if the format setting is 720P.

To output as HD-SDI

Menu page	Item	Setting
<POWER SAVE>	SDI-2 OUT (HDC1500R)/ SDI OUT(HDC1550R/ 1400R/1450R)	ACTIVE
<SDI-2 OUT>/<SDI OUT>	OUTPUT	VF

To output as SD-SDI

Menu page	Item	Setting
<POWER SAVE>	SDI-2 OUT (HDC1500R)/ SDI OUT(HDC1550R/ 1400R/1450R)	ACTIVE
	DOWN CONVERTER	ACTIVE
<DOWN CONVERTER>	OUTPUT SIGNAL	VF
<SDI-2 OUT>/<SDI OUT>	OUTPUT	SD-SDI

To output as VBS

Menu page	Item	Setting
<POWER SAVE>	DOWN CONVERTER	ACTIVE
<DOWN CONVERTER>	OUTPUT SIGNAL	VF
<TEST OUT>	OUTPUT	VBS

Outputting via Dual Link (HDC1500R only)

The SDI-1 output is assigned to Link A, SDI-2 output to Link B.

Note

This function cannot be used when a camera control unit is connected.

To output in 1080/59.94P or 1080/50P

Menu page	Item	Setting
<OUTPUT FORMAT>	ACTIVE LINE	1080
	(Format)	59.94P or 50P
<POWER SAVE>	SDI-2 OUT	ACTIVE
<SDI-2 OUT>	OUTPUT	LINK-B

Viewfinder Screen Status Display

Besides the video image, the viewfinder can display text and messages showing the camera settings and operation status, as well as items such as a center marker or safety zone marker.

When the DISPLAY switch is set to ON

Items set to ON using the menu or related switches will be displayed on the upper and lower edges of the screen.
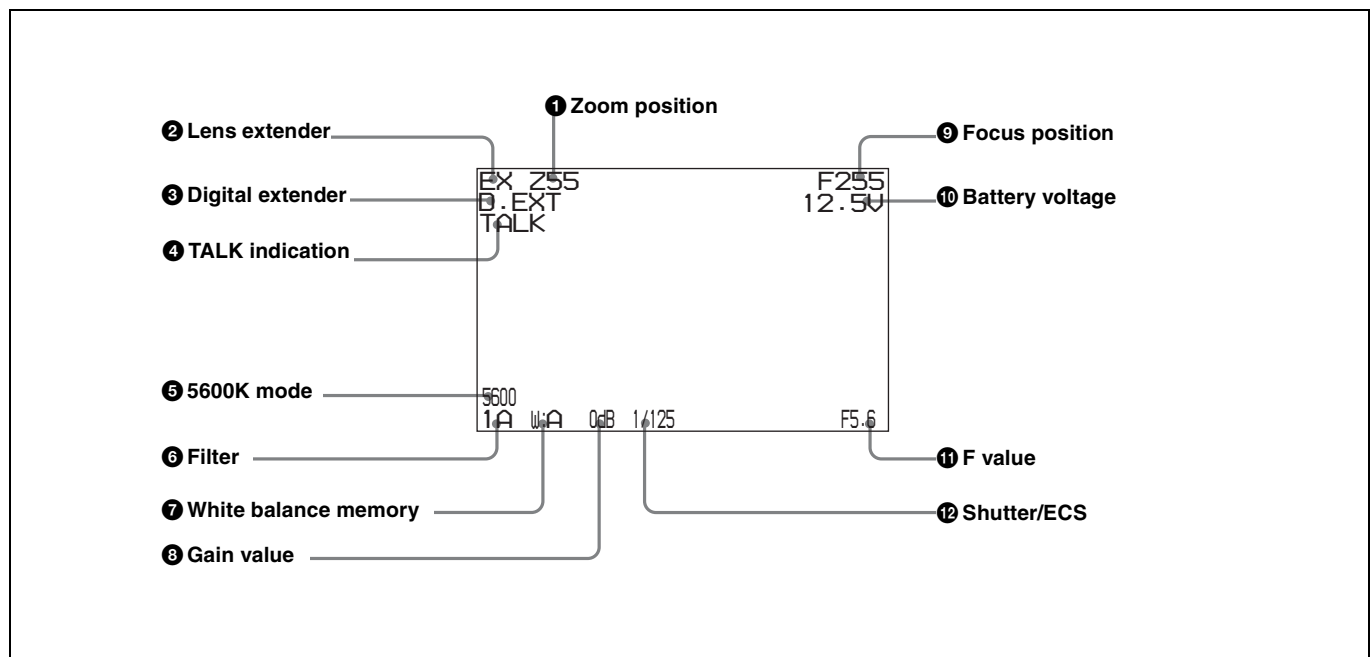

❶ Zoom position
Indicates the approximate position of the zoom lens variator between wide angle (0) and telephoto (99). Shows how close it is to the telephoto side.

❷ Lens extender
"EX" is displayed when a lens extender is in use.

❸ Digital extender
"D.EXT" is displayed when a digital extender is in use.

❹ TALK indication
Displayed when the intercom microphone is set to ON.

❺ 5600K mode
Displayed when 5600K is set to ON.

❻ Filter
Displays the type of filter currently selected. The number (1, 2, 3, 4, or 5) indicates the ND filter, and the letter (A, B, C, D or E) is for the CC filter (HDC1500R/1550R only).

❼ White balance memory
Displays the currently selected white balance automatic adjustment memory.

W:A: The WHITE BAL switch is set to "A"
W:B: The WHITE BAL switch is set to "B"
W:P: The WHITE BAL switch is set to "PRST"

❽ Gain value
Displays the video gain value (dB) set with the GAIN switch.

❾ Focus position
Shows the focus position of a zoom lens as a numeric value (0 to 255 (infinity)).

❿ Battery voltage
Displays the input voltage.

⓫ F value
Indicates the lens F (iris opening) value.

⓬ Shutter/ECS
Displays the shutter/ECS status. Nothing is displayed if the electronic shutter is set to OFF.

When you press the CANCEL/STATUS switch toward STATUS

The status display is changed to show the following items:

```
❶ Assignable switch indication
❷ Format indication

 ┌ FORMAT      :1080-59.94i
 └ ASSIGNABLE  :OFF

 ┌ !ND     :2
 │ !CC     :C
 │ !FAN    :MAX
 │ !EXT    :ON
 └ !FORMAT :1080-59.94i

 ┌ OPT LV CAM:□□■■■■■■■◄
 └        CCU:□□■■■■■■■◄

❹ Light-receiving level indications
❸ '!' indication area
```
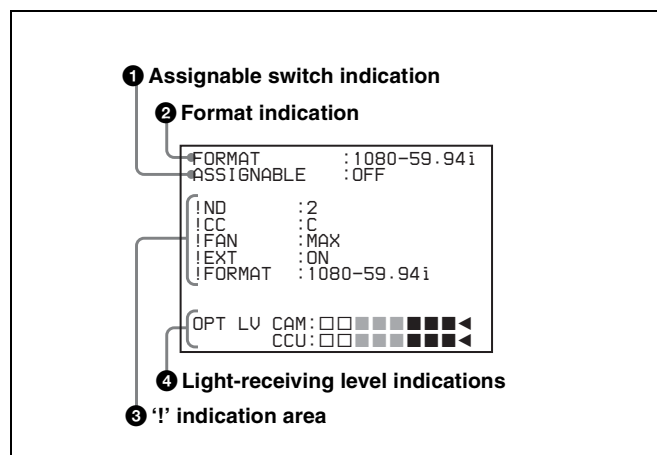

❶ Assignable switch indication

The function assigned to the assignable switch *(page 13)* is indicated.

For the functions that can be assigned, see OPERATION menu <SWITCH ASSIGN1> (page 43).

❷ Format indication

The current video format is displayed.

❸ '!' indication area

This area is used to display abnormal statuses, using the <'!' IND> function. Display options can be set, using the menu. (!CC is displayed for HDC1500R/1550R only.)

For details, see OPERATION menu <'!' IND> (page 41).

❹ Light-receiving level indications (HDC1500R/1400R only)

This area shows the light-receiving levels in segments.
CAM: Light-receiving level at the CCU connector *(page 16)* of the camera
CCU: Light-receiving level at the CAMERA connector of the CCU

Note

If a camera control unit other than an HDCU1000/1500 is connected, correct indications may not be obtained.

Menu Operations

The menus displayed on the viewfinder screen enable various settings of the camera.
The following controls are used to operate the menus.

DISPLAY switch

CANCEL/STATUS switch

Push on   Rotate

MENU SEL knob/ENTER button
Starting Menu Operations

To display a menu page

Set the DISPLAY switch from OFF to MENU.
The menu page that last operated will be displayed. (If it is the first time, the CONTENTS page of the OPERATION menu will be displayed.)

To display the TOP MENU screen

If you set the DISPLAY switch from OFF to MENU while holding the MENU SEL knob/ENTER button pressed, "TOP" is displayed at the upper right corner of the screen. Selecting it displays the TOP MENU screen, which lists the available menus, and you can select the menus on this screen.

TOP MENU screen

```
<TOP MENU>

➡USER
 USER MENU CUSTOMIZE
 ALL
 ・OPERATION
 ・PAINT
 ・MAINTENANCE
 ・FILE
 ・DIAGNOSIS
```
To disable the "TOP" indication

Turn the power once off then on again, or set the DISPLAY switch from OFF to MENU while holding the CANCEL/STATUS switch pressed toward CANCEL. This disables the TOP selection.

Available menus

USER menu

This menu can include menu pages selected from among the OPERATION, PAINT, MAINTENANCE, FILE, and DIAGNOSIS menus, for convenience. Changing, adding, and deleting pages can be performed with the USER MENU CUSTOMIZE menu.

USER MENU CUSTOMIZE menu

This menu allows you to edit the USER menu.

For details on the USER menu, see "Editing the USER Menu" on page 36.

ALL menu

This menu permits you to control all items of the OPERATION menu, PAINT menu, MAINTENANCE menu, FILE menu, and DIAGNOSIS menu as a single menu.

OPERATION menu

This menu contains items for camera operators to operate the camera. It mainly permits viewfinder, intercom, and switch settings.

PAINT menu

This menu contains items for making detailed image adjustments while using a waveform monitor to monitor the waveforms output from the camera. Support of a video engineer is usually required to use this menu.
Although you can also use an external remote control panel or master setup unit to set the items on this menu, the menu is effective when using the camera by itself outdoors.

MAINTENANCE menu

This menu contains items for performing camera maintenance operations, such as changing the system or setting infrequently used "paint" items.

FILE menu

This menu is for performing file operations, such as writing or clearing the reference file.

DIAGNOSIS menu

This menu enables you to confirm the self-diagnostic information.

To select a menu on the TOP MENU screen

1 Rotate the MENU SEL knob/ENTER button to align the arrow marker (➡) with the desired menu indication.

2 Push on the MENU SEL knob/ENTER button.

The CONTENTS page or the last operated page of the selected menu is displayed.

Selecting Pages

When selecting a page from a CONTENTS page

Example: CONTENTS page of the OPERATION menu

If the screen can be scrolled, arrows will indicate the direction of scrolling.

Arrow marker

```
     CONTENTS      00  TOP
↓↓
01.<VF DISPLAY>
02.<'!'IND>
03.<VF MARKER>
04.<VF DETAIL>
05.<FOCUS ASSIST>
06.<ZEBRA>
07.<CURSOR>
08.<VF OUT>
09.<SWITCH ASSIGN1>
10.<SWITCH ASSIGN2>
```
Rotate the MENU SEL knob/ENTER button to align the arrow marker (➡) with the desired page indication, then push on the MENU SEL knob/ENTER button.

The selected page is displayed.

Page number

```
<VF DETAIL>        ➡ 04  TOP

VF DETAIL :  ON       25%
 CRISP    :   0
 FREQUENCY:   9M
 FAT MODE :   OFF
 FLICKER  :   OFF
 AREA     :   70%
 ZOOM LINK: 100%
COLOR DETAIL :  ON   BLUE
 PEAK COLOR  :  ON
 CHROMA LEVEL: 100%
```
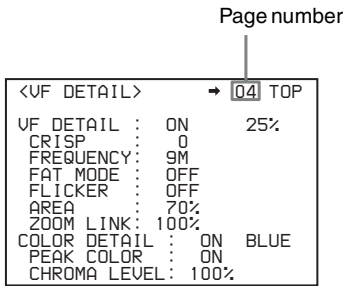

To change the displayed page

1 Check that the arrow marker (➡) is located at the left of the page number, then push on the MENU SEL knob/ENTER button.

The arrow marker (➡) changes to a flashing question (**?**) mark.

flash

```
<VF DETAIL>        ? 04  TOP

VF DETAIL :  ON       25%
 CRISP    :   0
 FREQUENCY:   9M
 FAT MODE :   OFF
 FLICKER  :   OFF
 AREA     :   70%
 ZOOM LINK: 100%
COLOR DETAIL :  ON   BLUE
 PEAK COLOR  :  ON
 CHROMA LEVEL: 100%
```

2 Rotate the MENU SEL knob/ENTER button to flip through the pages.

3 When the desired page is displayed, push on the MENU SEL knob/ENTER button.

The "**?**" mark will change back to the arrow marker (➜), and operations with the displayed page are enabled.

To return to the TOP MENU screen

Align the arrow marker (➜) with "TOP" at the top right of the menu page then press the MENU SEL knob/ENTER button.

```
<VF DETAIL>        04➜TOP

VF DETAIL :   ON      25%
CRISP     :    0
FREQUENCY:    9M
FAT MODE  :   OFF
FLICKER   :   OFF
AREA      :   70%
ZOOM LINK:   100%
COLOR DETAIL :   ON   BLUE
PEAK COLOR  :   ON
CHROMA LEVEL: 100%
```

The TOP MENU screen is resumed.

Setting the Menu Items

If a "**?**" mark is flashing at the left of the page number, push on the MENU SEL knob/ENTER button to change it to the arrow marker (➜). Setting on the displayed page is enabled.

1 Rotate the MENU SEL knob/ENTER button to align the arrow marker (➜) with the desired item.

2 Push on the MENU SEL knob/ENTER button.

The arrow marker (➜) will change to a flashing "**?**" mark.

3 Rotate the MENU SEL knob/ENTER button to change the setting value.

When the knob is rotated quickly, the values will change quickly; when rotated slowly, the values will change slowly.

To reset a changed value

If you press the CANCEL/STATUS switch toward CANCEL before pressing the MENU SEL knob/ENTER button, the setting will be returned to its previous value.

To interrupt settings

Set the DISPLAY switch to OFF to turn off the menu screen display.
The setting operation can be restarted by setting the DISPLAY switch back to MENU.

4 Push on the MENU SEL knob/ENTER button.

The "**?**" mark will change back to the arrow marker (➜), and the new setting will be registered.

5 To change other setting items on the same menu page, repeat steps **1** through **4**.

To specify a character string

When you press the MENU SEL knob/ENTER button with the arrow marker (➜) pointing to an item for which a character string, such as a file ID, is to be specified, a cursor and the list of selectable characters are displayed. The displayed cursor can be moved by rotating the MENU SEL knob/ENTER button.

1 Set the cursor to the position where you wish enter a character, then push on the MENU SEL knob/ENTER button.

Another cursor appears on the character list.

2 Set the cursor to the character to be entered and push on the MENU SEL knob/ENTER button.

Repeat steps **1** and **2**.

By selecting INS on the line below the character list, you can enter a space at the cursor position.
Selecting DEL deletes the character at the cursor position.
You can return to step **1** without changing the character by selecting RET.

If you enter the permitted maximum number of characters (up to the stop mark at the right end of the line), the cursor moves to ESC on the line below the character list.

To register the new string you have set, select END and push on the MENU SEL knob/ENTER button.

To restore the previous string, select ESC and push on the MENU SEL knob/ENTER button.

To end menu operations

Set the DISPLAY switch to OFF.

Editing the USER Menu

You can select desired pages and items from the OPERATION, PAINT, MAINTENANCE, FILE, and DIAGNOSIS menus and register them to the USER menu. If you specify pages or items frequently used for the USER menu, you can easily call and use them.

The following pages are included on the factory-set USER menu:

Menu page title	USER menu No.	Source menu / page No.	
<VF OUT>	U01	OPERATION	08
<VF DETAIL>	U02	OPERATION	04
<FOCUS ASSIST>	U03	OPERATION	05
<VF DISPLAY>	U04	OPERATION	01
<'!' IND>	U05	OPERATION	02
<VF MARKER>	U06	OPERATION	03
<CURSOR>	U07	OPERATION	07
<ZEBRA>	U08	OPERATION	06
<SWITCH ASSIGN1>	U09	OPERATION	09
<SWITCH ASSIGN2>	U10	OPERATION	10
<POWER SAVE>	U11	MAINTENANCE	M13
<LENS FILE>	U12	OPERATION	18
<HEAD SET>	U13	OPERATION	11
<INTERCOM LEVEL>	U14	OPERATION	12
<MIC GAIN>	U15	MAINTENANCE	M06
<OUTPUT FORMAT>	U16	MAINTENANCE	M09
<TEST OUT>	U17	MAINTENANCE	M11
<SDI-2 OUT> (HDC1500R) or <SDI OUT> (HDC1550R/1400R/1450R)	U18	MAINTENANCE	M12
<DOWN CONVERTER>	U19	MAINTENANCE	M10
<TRUNK>	U20	MAINTENANCE	M14
<UP TALLY>	U21	MAINTENANCE	M07
<ROM VERSION>	U22	DIAGNOSIS	D04

For the items on each page, see the corresponding source menu page in the table in "Menu List" on page 40.

The USER MENU CUSTOMIZE menu allows you to configure a USER menu that consists only of pages and items that you need, by your adding, deleting or replacing pages.

Creating a new page

The USER MENU CUSTOMIZE menu allows you to add a new page to the USER menu.
While the EDIT page contains factory-preset items, the USER 1 EDIT to USER 19 EDIT pages are all blank in their initial state. You can register up to 10 items, including blank lines, on each of these pages.
To create a new page, proceed as follows.

1 While holding the CANCEL/STATUS switch pressed toward STATUS, move the DISPLAY switch from the OFF position to the MENU position.

The TOP MENU screen appears.

2 Turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to "USER MENU CUSTOMIZE" then push on the MENU SEL knob/ENTER button.

If this is the first time the USER MENU CUSTOMIZE menu has been displayed, the CONTENTS page of the menu appears.

```
          CONTENTS    E00 TOP
 ↓↓
  01.EDIT PAGE
  02.USER 1 EDIT
➡ 03.USER 2 EDIT
  04.USER 3 EDIT
  05.USER 4 EDIT
  06.USER 5 EDIT
  07.USER 6 EDIT
  08.USER 7 EDIT
  09.USER 8 EDIT
  10.USER 9 EDIT
```

If the USER MENU CUSTOMIZE menu has been used before, the page last accessed appears.

3 If the CONTENTS page is displayed, turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to any of USER 1 EDIT to USER 19 EDIT then push on the MENU SEL knob/ENTER button to display the page.

If a different page is displayed, turn the MENU SEL knob/ENTER button until the desired page appears, then push on the MENU SEL knob/ENTER button to select the page.

Example: When you select the USER 2 EDIT page

```
          USER 2 EDIT  E03 TOP
 ➡
```

4 Move the arrow marker (➡) to the item to be added (this operation is unnecessary if no item exists on the page, as shown in the figure for step **3**) then push on the MENU SEL knob/ENTER button.

The EDIT FUNCTION screen appears.

```
          EDIT FUNCTION   ESC
 ➡INSERT
  MOVE
  DELETE
  BLANK
```

5 Move the arrow marker (➡) to "INSERT" and push on the MENU SEL knob/ENTER button.

The page with the last item added appears.

```
<SW STATUS>        P01 ESC

FLARE    :→ ON
GAMMA    :  ON
BLK_GAM  : OFF
KNEE     :  ON
WHT CLIP :  ON
DETAIL   :  ON
LVL DEP  :  ON
SKIN DTL : OFF
MATRIX   : OFF
```

6 Add the items.

① Turn the MENU SEL knob/ENTER button until the page that has the desired items appears then push on the MENU SEL knob/ENTER button.

② Turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to the desired item then push on the MENU SEL knob/ENTER button.
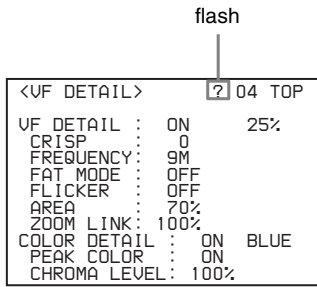

The USER 2 EDIT page appears again, displaying the newly added item.

7 Add the remaining items by repeating steps **4** to **6**.

You can add up to 10 items on one page.

To delete items from a page

Proceed as follows:

1 Move the arrow marker (➡) to the item to be deleted, and push on the MENU SEL knob/ENTER button.

The EDIT FUNCTION screen appears.

2 Select "DELETE," and push on the MENU SEL knob/ENTER button.

The previously displayed page appears again, and the message "DELETE OK? YES➡NO" appears at the upper right.

3 To delete, turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to "YES," and push on the MENU SEL knob/ENTER button.

To change the order of items on a page

Proceed as follows:

1 Turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to the item to be moved then push on the MENU SEL knob/ENTER button.

The EDIT FUNCTION screen appears.

2 Select MOVE then push on the MENU SEL knob/ENTER button.

The previously displayed page appears again.

3 Turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to the position where you wish to move the item then push on the MENU SEL knob/ENTER button.

```
    ITEM MOVE          ESC
↓↓
→VF OUT      : COLOR

 VF DETAIL   : OFF

 MARKER      :  ON
 CURSOR      : OFF
 ZEBRA SW    : OFF
                    1
●ASSIGNABLE  : OFF
```

The item selected in step **1** moves to the position that you selected in step **3**.
In the above example, "ASSIGNABLE" is moved to the top and the other items are moved down one line.

To insert a blank line

Proceed as follows:

1 Turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to the item above which you wish to insert a blank line.

The EDIT FUNCTION screen appears.

2 Select "BLANK" then push on the MENU SEL knob/ENTER button.

The previously displayed page appears again, and a blank line is inserted above the specified item.

Note

You cannot insert a blank line on a page where 10 items have already been registered.

Adding/deleting/replacing pages

You can add a new page to the USER menu, delete a page from the USER menu or replace pages, using the EDIT PAGE of the USER MENU CUSTOMIZE menu.

To add a page

Proceed as follows:

1 Select "USER MENU CUSTOMIZE" on the TOP MENU screen.

If this is the first time the USER MENU CUSTOMIZE menu has been displayed, the CONTENTS page of the menu appears. If the menu has been used before, the last accessed page appears.

2 If the CONTENTS page is displayed, turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to "EDIT PAGE" then push on the MENU SEL knob/ENTER button to display the EDIT PAGE screen.

If a different page is displayed, turn the MENU SEL knob/ENTER button until the EDIT PAGE screen appears, then push on the MENU SEL knob/ENTER button to select the page.

```
        EDIT PAGE     E01 TOP
↓↓
 01.<VF OUT>
→02.<VF DETAIL>
 03.<FOCUS ASSIST>
 04.<VF DISPLAY>
 05.<'!' IND>
 06.<VF MARKER>
 07.<CURSOR>
 08.<ZEBRA>
 09.<SWITCH ASSIGN1>
 10.<SWITCH ASSIGN2>
```

3 Turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to where you wish to add the page, then push on the MENU SEL knob/ENTER button.

The EDIT FUNCTION screen appears.

```
        EDIT FUNCTION    ESC

→INSERT
 MOVE
 DELETE
```

4 Select INSERT then push on the MENU SEL knob/ENTER button.

The selection screen appears.

```
        CONTENTS        ESC
↓↓
→01.USER 1
 02.USER 2
 03.USER 3
 04.USER 4
 05.USER 5
 06.USER 6
 07.USER 7
 08.USER 8
 09.USER 9
 10.USER 10
```

5 Turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to the desired page, then push on the MENU SEL knob/ENTER button.

This adds the number and name of the selected page above the item selected in step **3**.

To cancel addition of a page
Before pushing the MENU SEL knob/ENTER button in step **5**, turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to "ESC" at the top right of the screen, then push on the MENU SEL knob/ENTER button. The EDIT PAGE screen appears again.

To delete a page
Proceed as follows:

1 On the EDIT PAGE screen of the USER MENU CUSTOMIZE menu, move the arrow marker (➡) to the page to be deleted, and push on the MENU SEL knob/ENTER button.

The EDIT FUNCTION screen appears.

2 Select "DELETE" then push on the MENU SEL knob/ENTER button.

The previously displayed page appears again, and the message "DELETE OK? YES➡NO" appears at the upper right.

```
       ITEM DELETE      ESC
    DELETE OK?  YES→NO
 01.<VF OUT>
 02.<VF DETAIL>
 03.<FOCUS ASSIST>
●04.<VF DISPLAY>
 05.<'!' IND>
 06.<VF MARKER>
 07.<CURSOR>
 08.<ZEBRA>
 09.<SWITCH ASSIGN1>
 10.<SWITCH ASSIGN2>
```

3 To delete, turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to "YES," then push on the MENU SEL knob/ENTER button.

To move a page
Proceed as follows:

1 Display the EDIT PAGE screen of the USER MENU CUSTOMIZE menu. Turn the MENU SEL knob/ENTER button to move the arrow marker (➡) to the page that you wish to move.

The EDIT FUNCTION screen appears.

2 Select "MOVE" then push on the MENU SEL knob/ENTER button.

The EDIT PAGE screen appears again.

3 Turn MENU SEL knob/ENTER button to move the arrow marker (➡) to the position to which you wish to move the page selected in step **1**.

```
       ITEM MOVE        ESC
↓↓
 01.<VF OUT>
 02.<VF DETAIL>
 03.<FOCUS ASSIST>

```

4 Push on the MENU SEL knob/ENTER button.

The page selected in step **1** is moved to the position selected in step **3**.
In the above example, <SWITCH ASSIGN1> moves to the "04" position, and the <VF DISPLAY> and following pages move down one line.

Menu List

This section shows the menus to be displayed on the viewfinder screen in tables.

- For the pages that have been registered in the USER menu at the factory, the USER menu page numbers are indicated in parenthesis in the No. column of the tables.
- A CONTENTS page (numbered 00) is also provided for each menu.

OPERATION Menu

Page title	No.	Item	Default	Settings	Remarks
<VF DISPLAY>	01 (U04)	EX	ON	ON, OFF	
		ZOOM	OFF	ON, OFF	
		DISP	LEFT	LEFT, RIGT	
		FOCUS	OFF	ON, OFF	Valid only when a serial lens is used
		ND	ON	ON, OFF	
		CC	ON	ON, OFF	Valid with HDC1500R/1550R only
		5600K	ON	ON, OFF	
		IRIS	ON	ON, OFF	
		WHITE	OFF	ON, OFF	
		D.EXT	ON	ON, OFF	
		GAIN	ON	ON, OFF	
		SHUTT	ON	ON, OFF	
		BATT	OFF	ON, OFF	
		RETURN	ON	ON, OFF	
		TALK	ON	ON, OFF	
		MESSAG	ALL	ALL, WRN, AT, OFF	ALL: To display all messages WRN: To display warning messages and higher AT: To display Auto Setup information and higher

Page title	No.	Item	Default	Settings	Remarks
<'!' IND>	02 (U05)	ND	[IND] ON	ON, OFF	[IND]: Set whether to be included in the status indications on the viewfinder screen *(see page 34)*.
			[NORMAL] 1 – – – –	1, 2, 3, 4, 5 (combination allowed)	[NORMAL]: Specify the conditions under which the '!' indication is not to be displayed even if [IND] is ON. (By specifying the standard or normal conditions here, non-standard or abnormal conditions can be found with the '!' indication on the viewfinder screen.)
		CC	[IND] ON	ON, OFF	
			[NORMAL] – B – – –	A, B, C, D, E (combination allowed)	
		WHITE	[IND] ON	ON, OFF, - - -	
			[NORMAL] – A B	P, A, B (combination allowed)	
		5600K	[IND] ON	ON, OFF, - - -	
			[NORMAL] OFF	ON, OFF	
		GAIN	[IND] ON	ON, OFF, - - -	
			[NORMAL] – – L	L, M, H (combination allowed)	
		SHUTT	[IND] ON	ON, OFF, - - -	e.g.: With the default setting of ND, the '!' indication is displayed when an ND filter other than 1 is selected.
			[NORMAL] OFF	ON, OFF	
		FAN	[IND] ON	ON, OFF	- - - : When CCU connected (cannot be changed)
			[NORMAL] AUTO1	AUTO1, AUTO2, MIN, MAX	
		EXT	[IND] ON	ON, OFF	**Note**
		FORMAT	[IND] ON	ON, OFF	CC is available for HDC1500R/1550R only.
			[NORMAL] 59.94i or 50i (HDC1400R CED/E33 and HDC1450R CED models)	HDC1500R/1550R: 59.94i, 29.97PsF, 50i, 25PsF, 24PsF, 23.98PsF, 59.94P, 50P HDC1400R JN3/JN4 and HDC1450R UC7 models: 59.94i, 59.94P HDC1400R CED/E33 and HDC1450R CED models: 50i, 50P

FILE Menu

Five types of files can be used for easy adjustments of the camera; Operator, Reference, Scene, OHB, and Lens. You can store the items set with the OPERATION menu and customized USER menu in the Operator file.

For the specific items included in these files, refer to the Maintenance Manual.

Menu page	No.	Item⟋	Default	Settings	Remarks
<OPERATOR FILE>	F01	READ (MS→CAM)		Execute by ENTER.	To read the operator file from a "Memory Stick"
		WRITE (CAM→MS)		Execute by ENTER.	To write the current settings of the operator file items to a "Memory Stick"
		PRESET		Execute by ENTER.	To set the operator file items to the preset values in internal memory
		STORE PRESET FILE		Execute by ENTER.	To store the current settings of the operator file items in the operator file in internal memory.
		FILE ID		max.16 characters	Enter a comment for the operator file to be written to a "Memory Stick." *See "To specify a character string" on page 36.*
		CAM CODE	HDC1000/1500	Camera code	Display only
		DATE			Display only
<SCENE FILE>	F02	1			To store and read scene files (paint data): When storing a file in camera memory, specify the number before executing STORE. When reading, only specify the number.
		2			
		3			
		4			
		5			
		STORE		Execute by ENTER.	
		STANDARD		Execute by ENTER.	To read the standard paint data
		READ (MS→CAM)		Execute by ENTER.	To load five scene files from a "Memory Stick" to internal memory
		WRITE (CAM→MS)		Execute by ENTER.	To write five scene files in the camera's memory to a "Memory Stick"
		FILE ID		Max.16 characters	Enter a comment for the scene files to be written to a "Memory Stick." *See "To specify a character string" on page 36.*
		CAM CODE	HDC1000/1500	Camera code	Display only
		DATE			Display only

Menu page	No.	Item／	Default	Settings	Remarks
<REFERENCE>	F03	STORE FILE		Execute by ENTER.	To store the current settings of the reference file items in the reference file in internal memory.
		STANDARD		Execute by ENTER.	To read the standard values in the reference file in internal memory.
		ALL PRESET		Execute by ENTER.	To resume the factory-preset reference file
		READ (MS→CAM)		Execute by ENTER.	To load a reference file from a "Memory Stick"
		WRITE (CAM→MS)		Execute by ENTER.	To write the current settings of the reference file items as a reference file to a "Memory Stick"
		FILE ID		Max.16 characters	Enter a comment for the reference file to be written to a "Memory Stick." *See "To specify a character string" on page 36.*
		CAM CODE	HDC1000/1500	Camera code	Display only
		DATE			Display only
<LENS FILE>	F04	STORE FILE		Execute by ENTER.	
		No.	1	1 to 17	1 to 16: When using a non-serial lens 17: When using a serial lens
		NAME	xxxxx...		Changeable only when using a non-serial lens
		F NO	F1.7	F1.0 to F3.4	Changeable only when using a non-serial lens
		CENTER MARKER			To set and store the center marker position: H POS: Increasing the value moves it to the right. V POS: Increasing the value moves it downwards.
		H POS	0	−20 to +20	
		V POS	0	−20 to +20	
		STORE		Execute by ENTER.	
<OHB FILE>	F05	STORE FILE		Execute by ENTER.	To store the offset values of the items specific to the CCD (No repeated store operation is necessary even if the CCD is reattached)
<FILE CLEAR>	F06	PRESET OPERATOR		Execute by ENTER.	
		REFERENCE (ALL)		Execute by ENTER.	
		10 SEC CLEAR	OFF	ON, OFF	To activate/deactivate the function to clear the current menu item by holding the ENTER button pressed for more than 10 seconds.
		OHB WHITE SHAD (ALL)		Execute by ENTER.	
		OHB WHITE SHAD (3D)		Execute by ENTER.	To clear the 3D WHITE SHADING setting only
		OHB BLACK SHAD		Execute by ENTER.	
		OHB ND OFFSET		Execute by ENTER.	
		OHB MATRIX		Execute by ENTER.	
		M.S. FORMAT		Execute by ENTER.	To initialize a "Memory Stick"

Using a "Memory Stick"

When a "Memory Stick" is inserted in the camera, the file data can be stored on the "Memory Stick," which enables you to share data among cameras.

Usable types of "Memory Stick"

You can use a "Memory Stick," a "MagicGate Memory Stick," or a "Memory Stick PRO" with this product. However, the MagicGate[1] copyright protection is not valid with this product.

1) MagicGate is copyright protection technology that uses encryption technology.

Note

You cannot use a "Memory Stick Duo" or a "Memory Stick PRO Duo" without an appropriate adaptor.

Note on data read/write speed

Data read/write speed may vary depending on the combination of the "Memory Stick" and "Memory Stick" compliant product you use.

Inserting a "Memory Stick"

Insert a "Memory Stick" with the label side up into the "Memory Stick" slot until it clicks and the access lamp lights in red.

Label side

Access lamp   Memory Stick
Access lamp

If the access lamp is lit or is flashing, data is being read from or written to the "Memory Stick." At this time, do not shake the product or subject it to shock. Do not turn off the power of the product or remove the "Memory Stick." This may damage the data.

About a "Memory Stick"

Terminal

Write-protect tab

Labelling position
- When you set the "Memory Stick" write-protect tab to "LOCK," data cannot be recorded, edited, or erased.
- Data may be damaged if:
  —You remove the "Memory Stick" or turn off the unit while it is reading or writing data.
  —You use the "Memory Stick" in a location subject to the effects of static electricity or electric noise.
- We recommend that you make a backup copy of important data that you record on the "Memory Stick".

Notes

- Do not attach anything other than the supplied label to the "Memory Stick" labeling position.
- Attach the label so that it does not stick out beyond the labeling position.
- Carry and store the "Memory Stick" in its case.
- Do not touch the terminal of the "Memory Stick" with anything, including your finger or metallic objects.
- Do not strike, bend, or drop the "Memory Stick".
- Do not disassemble or modify the "Memory Stick".
- Do not allow the "Memory Stick" to get wet.
- Do not use or store the "Memory Stick" in a location that is:
  —Extremely hot, such as in a car parked in the sun
  —Under direct sunlight
  —Very humid or subject to corrosive substances

Precautions

- To prevent data loss, make backups of data frequently. In no event will Sony be liable for any loss of data.
- Unauthorized recording may be contrary to the provisions of copyright law. When you use a "Memory Stick" that has been pre-recorded, be sure that the material has been recorded in accordance with copyright and other applicable laws.
- The "Memory Stick" application software may be modified or changed by Sony without prior notice.
- Note that there are certain restrictions on recording stage performances and other entertainment events, even if they are recorded for personal use only.

Specifications

HDC1500R

General

Power requirements 240 V AC, 1.4 A (max.)
　　　　　　　　　　180 V DC, 1.0 A (max.)
　　　　　　　　　　12 V DC, 7 A (max.)
Operating temperature
　　　　　　　　　　−20°C to +45°C (−4°F to +113°F)
Storage temperature −20°C to +60°C (−4°F to +140°F)
Mass　　　　　　　　Approx. 4.5 kg (9 lb 15 oz) (camera head only)
Dimensions　　　　　*See page 64.*

Imager

Imager　　　　　　　2/3-type Progressive Scan CCD
Method　　　　　　　3-CCD, RGB
Effective resolution 1920 (horizontal) × 1080 (vertical)

Electrical characteristics

Sensitivity　　　　　f10.0 with 1080/59.94i
　　　　　　　　　　f11.0 with 1080/50i
　　　　　　　　　　(at 2000 lx with 89.9% reflectivity)
Image S/N　　　　　Typical −56 dB/−64 dB (NS MAX)
Horizontal resolution
　　　　　　　　　　1000 TV lines (at center of screen)
　　　　　　　　　　5% or higher modulation
Geometric distortion Negligible (not including lens distortion)

Optical system specifications

Spectral system　　　F1.4 prism
Built-in filters　　　Color temperature conversion filters
　　　　　　　　　　A: cross filter
　　　　　　　　　　B: 3200K (clear)
　　　　　　　　　　C: 4300K
　　　　　　　　　　D: 6300K
　　　　　　　　　　E: 8000K
　　　　　　　　　　ND filters
　　　　　　　　　　1: clear
　　　　　　　　　　2: 1/4 ND
　　　　　　　　　　3: 1/8 ND
　　　　　　　　　　4: 1/16 ND
　　　　　　　　　　5: 1/64 ND

Input/output connectors

CCU　　　　　　　　Optical/electrical multi-connector (1)

REMOTE	8-pin (1)
TRACKER	10-pin (1)
CRANE	12-pin (1)

Supplied accessories

Operation manual (1)
Cable clamp belt (1 set)
Switch label 1, 2 (1 each)

For the customers in the U.S.A., Canada, Europe, Australia, and New Zealand

Connectors for optical/electric composite cables:
- LEMO® PUW.3K.93C.TLCC96 (to the "CAMERA" connector on CCU)
- LEMO® FUW.3K.93C.TLMC96 (to the "CCU" connector on CAMERA)

Caution on the optical/electric composite cable:

For connection between the camera control unit and a camera, be sure to use an optical/electric signal composite cable with the connectors specified in this manual in order to comply with the limit for EMC regulations.

Pour les utilisateurs aux Etats-Unis, au Canada, en Europe, à l'Australie, et à la Nouvelle-Zélande

Connecteurs pour les câbles optiques/électriques composites:
- LEMO® PUW.3K.93C.TLCC96 (au connecteur «CAMERA» de l'unité de commande de caméra)
- LEMO® FUW.3K.93C.TLMC96 (au connecteur «CCU» de la caméra)

Attention concernant le câble optique/électrique composite:

Pour la connexion entre l'unité de commande de caméra et une caméra, utilisez un câble optique/électrique composite avec connecteurs spécifiés dans ce manuel pour assurer la conformité avec la réglementation EMC.

Für Kunden in USA, Kanada, Europa, Australien und Neuseeland

Anschlüsse für optische/elektrische FBAS-Kabel:
- LEMO® PUW.3K.93C.TLCC96 (an „CAMERA"-Anschluss an der Kamerasteuereinheit)
- LEMO® FUW.3K.93C.TLMC96 (an „CCU"-Anschluss an der KAMERA)

Vorsichtsmaßregeln für optische/elektrische FBAS-Kabel:

Für Verbindung zwischen Kamerasteuereinheit und Kamera verwenden Sie immer ein optisches/elektrisches FBAS-Kabel mit Steckern, wie in dieser Anleitung beschrieben, um die Grenzwerte der geltenden EMV-Vorschriften zu erfüllen.

Design and specifications are subject to change without notice.

For the customers in the U.S.A., Canada, Europe, Australia, and New Zealand

Connectors for optical/electric composite cables:
- LEMO® PUW.3K.93C.TLCC96 (to the "CAMERA" connector on CCU)
- LEMO® FUW.3K.93C.TLMC96 (to the "CCU" connector on CAMERA)

Caution on the optical/electric composite cable:

For connection between the camera control unit and a camera, be sure to use an optical/electric signal composite cable with the connectors specified in this manual in order to comply with the limit for EMC regulations.

Pour les utilisateurs aux Etats-Unis, au Canada, en Europe, à l'Australie, et à la Nouvelle-Zélande

Connecteurs pour les câbles optiques/électriques composites:
- LEMO® PUW.3K.93C.TLCC96 (au connecteur «CAMERA» de l'unité de commande de caméra)
- LEMO® FUW.3K.93C.TLMC96 (au connecteur «CCU» de la caméra)

Attention concernant le câble optique/électrique composite:

Pour la connexion entre l'unité de commande de caméra et une caméra, utilisez un câble optique/électrique composite avec connecteurs spécifiés dans ce manuel pour assurer la conformité avec la réglementation EMC.

Für Kunden in USA, Kanada, Europa, Australien und Neuseeland

Anschlüsse für optische/elektrische FBAS-Kabel:
- LEMO® PUW.3K.93C.TLCC96 (an „CAMERA"-Anschluss an der Kamerasteuereinheit)
- LEMO® FUW.3K.93C.TLMC96 (an „CCU"-Anschluss an der KAMERA)

Vorsichtsmaßregeln für optische/elektrische FBAS-Kabel:

Für Verbindung zwischen Kamerasteuereinheit und Kamera verwenden Sie immer ein optisches/elektrisches FBAS-Kabel mit Steckern, wie in dieser Anleitung beschrieben, um die Grenzwerte der geltenden EMV-Vorschriften zu erfüllen.

Design and specifications are subject to change without notice.

HDC1550R

General

Power requirements   180 V DC, 1.0 A (max.)
                        12 V DC, 7 A (max.)
Operating temperature
                        −20°C to +45°C (−4°F to +113°F)
Storage temperature   −20°C to +60°C (−4°F to +140°F)
Mass   Approx. 4.9 kg (10 lb 13 oz) (camera
                        head only)
Dimensions   *See page 64.*

Imager

Imager   2/3-type Progressive Scan CCD
Method   3-CCD, RGB
Effective resolution   1920 (horizontal) × 1080 (vertical)

Electrical characteristics

Sensitivity   f10.0 with 1080/59.94i
                        f11.0 with 1080/50i
                        (at 2000 lx with 89.9% reflectivity)
Image S/N   Typical −56 dB/−64 dB (NS MAX)
Horizontal resolution

                        1000 TV lines (at center of screen)
                        5% or higher modulation
Geometric distortion   Negligible (not including lens
                        distortion)

Optical system specifications

Spectral system   F1.4 prism
Built-in filters   Color temperature conversion filters
                        A: cross filter
                        B: 3200K (clear)
                        C: 4300K
                        D: 6300K
                        E: 8000K
                        ND filters
                        1: clear
                        2: 1/4 ND
                        3: 1/8 ND
                        4: 1/16 ND
                        5: 1/64 ND

Input/output connectors

HDCU/HDFX   Triax connector (1)
LENS   12-pin (1)
VF   20-pin (1)
MIC 1 IN   XLR 3-pin, female (1)
AUDIO IN CH1, CH2
                        XLR 3-pin, female (1 each)
                        For MIC: −60 dBu (may be selected
                        up to −20 dBu by menu or
                        HDCU1000/1500 operations),
                        balanced
                        For LINE: 0 dBu, balanced
INTERCOM1, INTERCOM2
                        XLR 5-pin, female (1 each)
EARPHONE   Stereo minijack (1)

DC IN   XLR 4-pin (1), 10.5 to 17 V DC
DC OUT   4-pin (1), 10.5 to 17 V DC, 1.5 A
                        maximum
                        It may be limited depending on the
                        load and input conditions.
SDI   BNC type (1)
TEST OUT   BNC type (1)
GENLOCK IN/RET IN/PROMPTER
                        BNC type (1), 1 Vp-p, 75 ohms
RET CTRL   6-pin (1)
REMOTE   8-pin (1)
TRACKER   10-pin (1)
CRANE   12-pin (1)

Supplied accessories

Operation manual (1)
Cable clamp belt (1 set)
Switch label 1, 2 (1 each)

Design and specifications are subject to change without notice.
