# **Overview**

The HDCU5000/5500 Camera Control Unit connects to an HDC5000/5500 Color Camera, via an optical fiber cable, and carries out signal processing, provides an interface with external equipment, and supplies power to the camera. The HDCU3500 Color Camera Control Unit connects to an HDC3500 Color Camera, HDC3100 Fiber Color Camera, or HDC2000-series<sup>1)</sup> HD Color Camera, via an optical fiber cable, and carries out signal processing, provides an interface with external equipment, and supplies power to the camera.

The unit is equipped as standard with a function for downconverting 4K signals (HDCU5000/5500 only) or HD signals<sup>2</sup>) to SD signals<sup>3</sup>) and a function for up-converting the image from another camera as the return video, which give the unit the flexibility to operate in 4K, HD, and SD camera systems.

The unit may be combined with an RCP-3000/1000 series Remote Control Panel (optional) to form a camera control system. In addition, by combining the unit with an MSU-1000/ 1500 Master Setup Unit (optional), you can form a system capable of controlling multiple cameras.

The unit can be mounted in a standard 19-inch EIA rack. The height is 3 units (use the RMM-301 Rack Mount Adaptor (option) for the HDCU5500/3500).

- 1) HDC2000 series: HDC2000/2580/2500/2400/1700
- 2) HD (high-definition) signals: Generic name for 1125-/750-line HDTV signals.
- SD (standard-definition) signals: Generic name for NTSC/PAL signals, 525/625 component signals, and 525/625 composite signals.
- \* Some models may not be available, depending on the country or region.

#### Note

Before operating the system, check that the software and ROM versions of this unit and system configuration devices are compatible versions.

You can expand the functionality by installing the following option products.

For details about installation of option products, contact a Sony service or sales representative.

# HKCU-FB50 UHB Transmission Board Kit (HDCU3500)

Upgrades the unit to the equivalent of the HDCU5500.

#### HKCU-SDI50 12G-SDI Extension Kit (HDCU5000)

Enables 12G-SDI output at 4K using a single system of four outputs.

# HKCU-SFP50 ST 2110 Interface Kit (HDCU5000/ 5500/3500)

Enables operation in an IP transmission system.

# HKCU-SM50 Single Mode Fiber Connector Kit (HDCU5000/5500/3500)

Enables connection with Sony cameras that support optical fiber transmission over a single-mode fiber cable. It can connect to HDC3500/3100 and HDC2000 series cameras.

\* The HDCE-100 Camera Extension Adaptor (option) is required for single-mode fiber connection.

# HZCU-CNFG50 Config Control Software (HDCU5000/5500/3500)

Enables configuration of the unit via the LAN-COM connector of the CCU using the EMBER+ protocol.

#### HZCU-SNMP50 SNMP Agent Software (HDCU5000/ 5500/3500)

Enables remote monitoring via the LAN-COM connector of the CCU using the SNMP protocol.

# HZCU-UHD35 4K/HDR Processor Software (HDCU5000/5500/3500)

Enables conversion of HD signals transmitted from a camera to 4K signals.

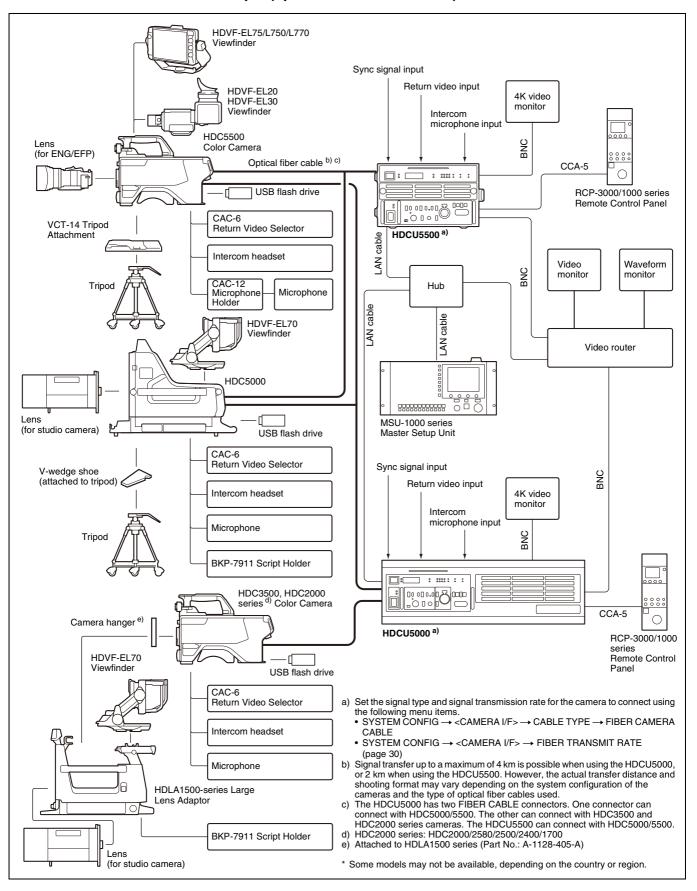

\* Supported on the HDCU5000/5500 when the HKCU-SM50 is installed.

## **System Configuration**

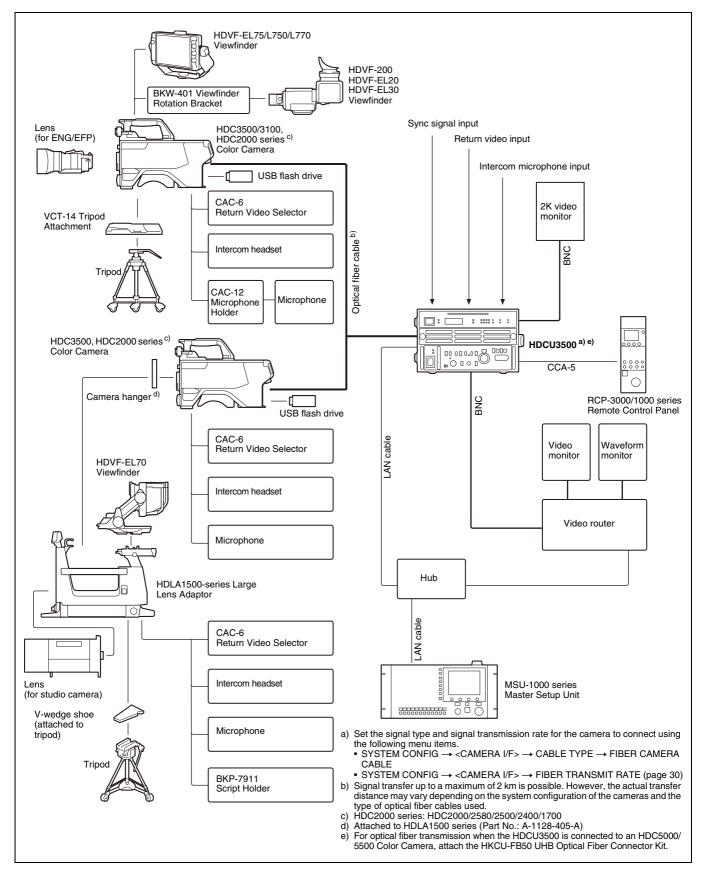

#### Note

Production of some of the peripherals and related devices shown in the figures may have been discontinued. For advice on choosing devices, please contact your Sony representative or dealer.

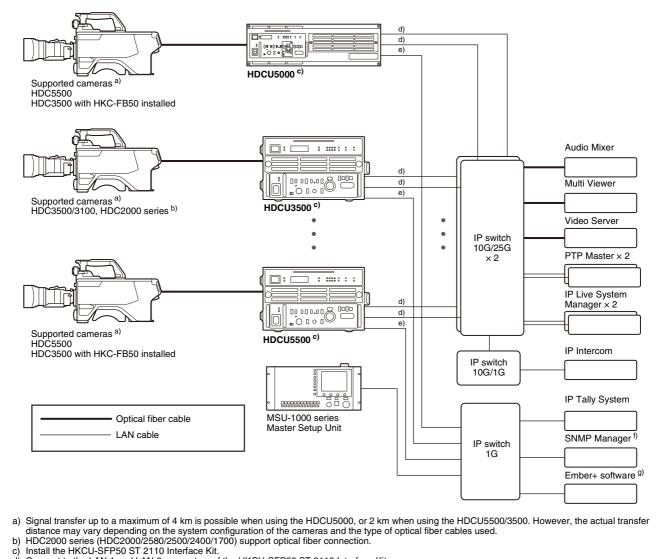

#### HDCU5000/5500 connection example (optical fiber transmission)

#### HDCU3500 connection example (optical fiber transmission)

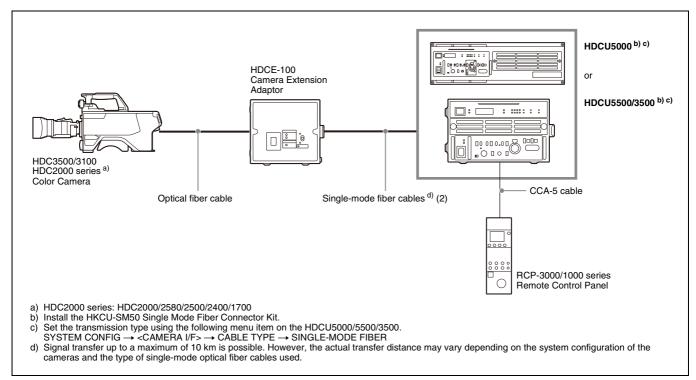

#### **Connection example (IP connection)**

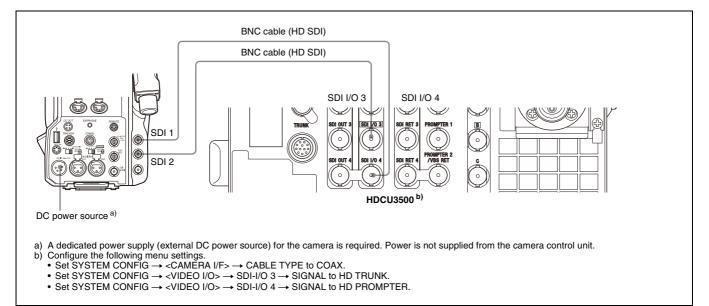

- c) d) d) Connect to the LAN 1 and LAN 2 connectors of the HKCU-SFP50 ST 2110 Interface Kit.
  e) Connect to the LAN COM connector of the HDCU5000/5500/3500.
  f) To support SNMP monitoring, install HZCU-SNMP50 SNMP Agent Software (option).
  g) To support Ember+ control, install HZCU-CNFG50 Config Control Software (option).

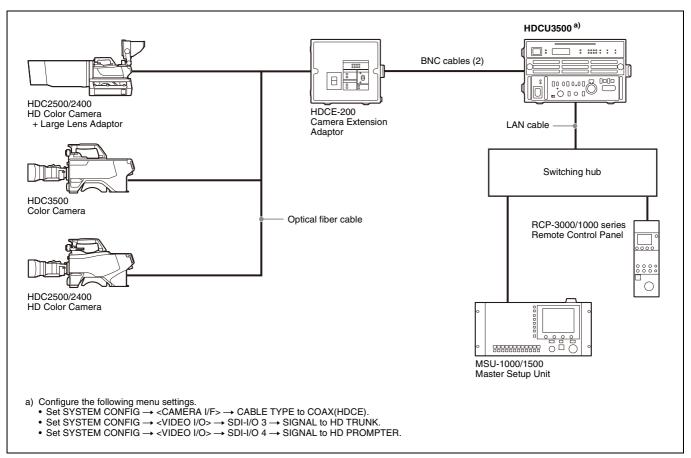

#### Connection example (single-mode fiber connection)

#### Connection example (coax connection)

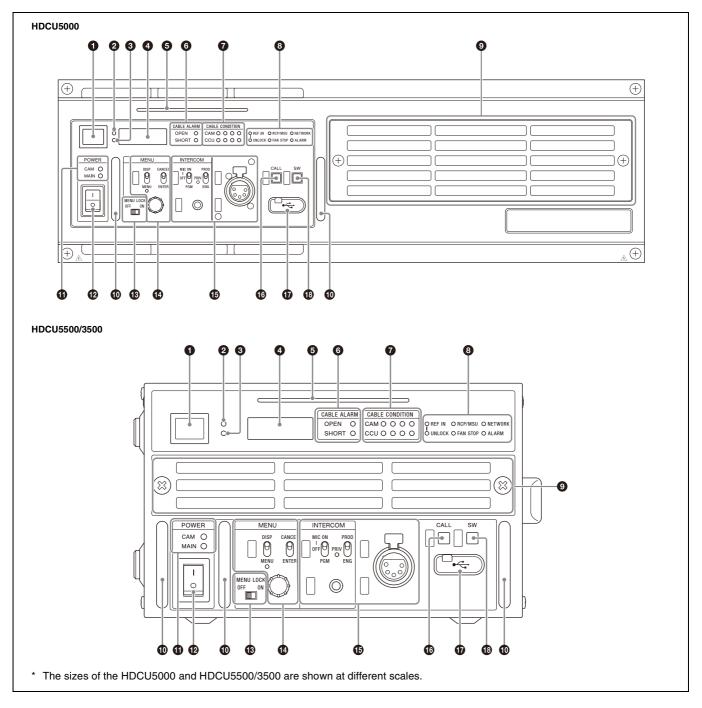

#### Connection example (coax (HDCE) connection)

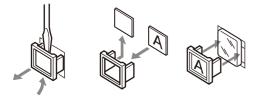

# **Location and Function of Parts**

## **Front Panel**

#### Red tally indicator

Lights in red when this unit receives a red tally signal. You can attach the supplied number plate here.

#### 2 Yellow tally indicator

Lights in yellow when this unit receives a yellow tally signal.

#### **③** Green tally indicator

Lights in green when this unit receives a green tally signal.

#### CCU number display

Displays the camera number set in the CCU menu. When the camera number is 0, the IP address and subnet mask of the LAN COM connector are displayed scrolling at regular intervals. When the camera number is not 0, the IP address and subnet mask of the LAN COM connector are displayed scrolling for a fixed time only when the DISP/MENU lever is held up in the DISP position for 3 seconds.

#### **SIGNAL BAR indicator**

Indicates the output status of the video signal.

#### During gray signal output: Off

- **During color bar output:** Lights in the color specified with the MAINTENANCE  $\rightarrow$  <FRONT PANEL>  $\rightarrow$  SIGNAL BAR  $\rightarrow$  READY COLOR menu item.
- During camera video output: Lights in a white flowing pattern.

#### **G** CABLE ALARM indicators

- **OPEN:** Lights up when a camera is not connected to the CAMERA FIBER connector on the rear panel of this unit via an optical fiber cable. Power is not supplied to the camera while this indicator is lit.
- **SHORT:** Lights up when an overcurrent flows the through the optical fiber cable. Power is not supplied to the camera while this indicator is lit.

#### CABLE CONDITION (signal reception status) indicators

Indicates the communication status of the camera (CAM) and camera control unit (CCU).

- When the two indicators on the right (green) are lit: Reception status is excellent.
- When the second indicator from the right (green) is lit: Reception status is good.
- When the second indicator from the left (yellow) is lit: Reception status is low.
- When the indicator on the left (red) is lit: Reception status is at the lowest level.

#### Status display indicator

- **REF IN (green):** Indicates presence of REFERENCE input signal.
- UNLOCK (red): Not locked to the REFERENCE input signal.
- **RCP/MSU:** Displays the status when there is a remote control panel connected.
- On: Indicates that external control equipment (MSU-1000/ 1500 Master Setup Unit, RCP-3000/1000 series Remote Control Panel, or other equipment) is connected.
- Off: Indicates that external control equipment is not connected.

For details, see "NETWORK Menu" (page 75).

NETWORK: Displays the network genlock status when using the HKCU-SFP50 ST 2110 Interface Kit. Low-speed flashing: PTP master not detected

High-speed flashing: Locking to PTP master Lit: Locked to PTP master

Not lit: Network genlock setting disabled

ALARM: Lights when various errors occur.

FAN STOP: Lights when the fan is stopped.

#### 9 Filter cover

Remove the screws on the left/right of the filter cover to remove the filter cover.

The filter (black sponge) is placed under the cover. If the filter becomes dirty, you can remove it and clean it with cold or warm water. When using a detergent, use a neutral solution.

Be sure to dry the filter thoroughly before replacing it on the unit.

#### Guard bar

#### Note

Do not pull the guard bar with excessive force.

#### POWER indicators

**CAM:** Lights when power is being supplied to the camera. **MAIN:** Lights when the unit is turned on. In addition, this flashes when a fan error occurs.

#### POWER switch

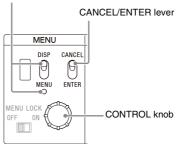

Turns the entire camera system on and off, including the unit, the camera, and the RCP-3000/1000 series Remote Control Panel connected to the REMOTE connector of this unit. Switch to "I" to turn the power on, and switch to " $\bigcirc$ " to turn the power off.

#### Menu lock switch

Locks out operation of the front panel menu operation area.

#### MENU control block

DISP/MENU lever and indicator

#### • DISP/MENU lever and indicator

Selects the status display or setup menu display. In setup menu mode, the indicator turns on.

When the camera number is not 0, the IP address and subnet mask of the LAN COM connector are displayed on the CCU number display scrolling for a fixed time only when the DISP/ MENU lever is held up in the DISP position for 3 seconds. When <OUTPUT FORMAT1>  $\rightarrow$  SDI-OUT4  $\rightarrow$  MONITOR is set to C, you can return to the M setting for MONITOR by holding the DISP/MENU level down in the MENU position for 3 seconds.

#### CANCEL/ENTER lever

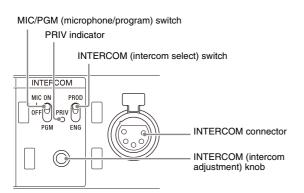

In setup menu mode, used to cancel and enter settings.

#### • CONTROL knob (rotary encoder)

In status screen mode, used to change the displayed page. In setup menu mode, used to move the cursor on a page and to change menu settings.

Pushing the knob has the same function as setting the CANCEL/ENTER lever to ENTER.

#### INTERCOM audio input/output and control block

#### • INTERCOM (intercom adjustment) knob

Adjusts the headset audio level.

#### • MIC/PGM (microphone/program) switch

**ON:** Turns the headset microphone on. **OFF:** Turns the headset microphone off. **PGM:** Selects program audio output.

#### • INTERCOM (intercom select) switch

Selects the intercom signal input/output connection source for the INTERCOM connector on the front panel. **PROD:** Connects the producer line.

### HDCU5000 Rear Panel

**PRIV:** Blocks the connection to the producer line or engineer line, allowing private intercom talk between the CCU and the camera.

ENG: Connects the engineer line.

• PRIV (private) indicator

Lights when the intercom is in private mode.

#### • INTERCOM connector (XLR 5-pin)

Connect the intercom headset.

#### Call button

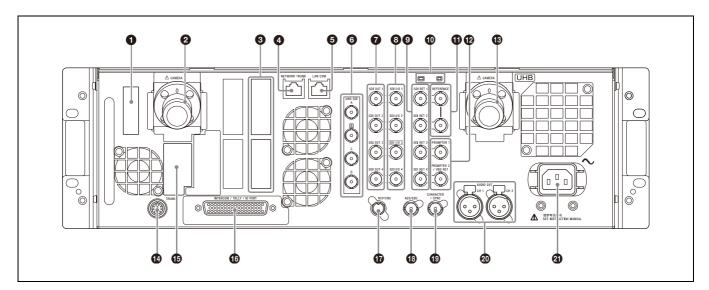

When pressed, this outputs a call signal to the camera or external control devices (the RCP-3000/1000 series Remote Control Panel, etc.) that are connected to this unit. Use this when you want to call and speak with the camera operator or external control device operator via intercom. This button lights in red when it is pressed or the call button of other equipment is pressed.

#### USB port

Used to connect to a USB device.

#### Assignable button

You can set a function for this button via the CCU menu.

#### Option kit mounting port

The HKCU-SFP50 ST 2110 Interface Kit (option) can be installed.

For an overview of option kits, see "Option Kits" (page 15).

#### CAMERA FIBER connector for HDC3500/3100 and HDC2000 series

Used to connect a video camera, using an optical fiber cable. All video camera signals, including power supply, control, video, and audio, are sent and received over one optical fiber cable.

#### Note

Dust on the connection surface of the optical fiber cable may result in transmission errors. When not connected, always cover the end of the connector with the supplied cap.

#### Option kit mounting port

Used to install HKCU-SDI50 12G-SDI Extension Kit. For an overview of option kits, see "Option Kits" (page 15).

#### NETWORK TRUNK connector (RJ-45 8-pin)

Used to connect the device connected to the NETWORK TRUNK connector of a camera with the network connection device.

#### **G** LAN COM connector (RJ-45 8-pin)

Used to connect to a LAN. Connect a LAN hub (10BASE-T/ 100BASE-TX/1000BASE-T), using a LAN cable (shielded type of category 5 or higher).

#### G UHD SDI A/B/C/D connectors (BNC-type)

The signal from the video camera is output as UHD (4K) SDI signals. The C and D connectors can also be used as input connectors.

For details on settings, contact a Sony service or sales representative.

#### SDI OUT (3G/HD/SD SDI output) 1/2/3/4 connectors (BNC-type)

The signal from the video camera may be output as 3G signals, HD-SDI signals, or SD-SDI signals. They can output signals with superimposed text characters and markers.

For details on settings, contact a Sony service or sales representative.

#### SDI I/O (3G/HD SDI input/output) 1/2/3/4 connectors (BNC-type)

These can be used as return video inputs, HD prompter inputs, camera video signal outputs, and HD-TRUNK outputs. Set them in NETWORK TRUNK on the <TRUNK/ PROMPTER> page of the MAINTENANCE menu according to the application.

#### SDI RET (3G/HD/SD SDI return video input) 1/2/3/4 connectors (BNC-type)

Four different 3G/HD/SD SDI return video input signals may be received independently. The selection of RET 1 to 4 is made by the return switch of the video camera. The aspect ratio can also be selected for an SD signal.

The type of input signal on RET 1 to 4 may be set individually using the setup menu, or using the MSU-1500 series Master Setup Unit.

For details on the setup menu, contact a Sony service or sales representative.

Refer also to the Master Setup Unit manual.

#### Rear indicator

Displays calls and statuses.

#### REFERENCE IN/OUT connectors (BNC-type)

Input an HD tri-level sync signal or SD reference signal (black burst signal, or black burst signal with 10-field ID) to the REFERENCE IN connector.

The input signal is output from the REFERENCE OUT connector as-is (loop-through). If loop-through output is not used, terminate the unused connector at 75 ohms.

#### INPUT area

# ① PROMPTER (tele-prompter input) 1/2 connectors (BNC-type)

Input the prompter signal of 1 channel or 2 channels depending on the setting of PROMPTER2/VBS-RET on the <REAR I/F> page of the SYSTEM CONFIG menu and PROMPTER CHANNEL MODE on the <TRUNK/ PROMPTER> page of the MAINTENANCE menu. When PROMPTER/VBS-RET is set to DISABLE, the input signal is output from the other connector as-is (loop-through). If loopthrough output is not used, terminate the unused connector at 75 ohms. When PROMPTER/VBS-RET is set to ENABLE, both connectors become inputs and they are terminated at 75 ohms inside the unit. If the signal used is a 1.0 Vp-p, 75-ohm analog signal, it may be output from the PROMPTER OUT connector of the video camera with a frequency bandwidth of 5 MHz, regardless of signal format.

#### Note

In the case of the HDC5500, connect to the PROMPTER1 connector. It is not supported by the PROMPTER2 connector.

#### ② VBS-RET (VBS return video input) connector\* (BNC-type)

A single VBS return video signal can be input independently.

\* This connector doubles as the PROMPTER 2 connector.

The RET selection is made by the return switch of the video camera. The type of input signal on each RET connector may be set individually using the setup menu, or using the MSU-1000 series Master Setup Unit. The aspect ratio may also be selected for SD signals.

For details on setup menu operations, contact a Sony service or sales representative.

Refer also to the Master Setup Unit manual.

For details on how to select the signal, contact a Sony service or sales representative.

#### CAMERA FIBER connector for HDC5000/5500

Used to connect a video camera, using an optical fiber cable. All video camera signals, including power supply, control, video, and audio, are sent and received over one optical fiber cable.

#### Note

Dust on the connection surface of the optical fiber cable may result in transmission errors. When not connected, always cover the end of the connector with the supplied cap.

#### TRUNK connector (round 12-pin)

Used to connect to the CCU connector on a camera via an RS-232C or RS-422A interface. Communication with up to two channels is available.

#### Option kit mounting port

The optional HKCU-SM50 Single Mode Fiber Connector Kit can be installed.

For an overview of option kits, see "Option Kits" (page 15).

#### INTERCOM/TALLY/IO (intercom / tally / input/output) connector (D-sub 50-pin)

Used to input and output intercom, tally, and program audio signals. Connect to the intercom/tally/program audio connector of the intercom system.

**REAR PREVIEW function:** Pin 35 is assigned for the output pin of the REAR PREVIEW function.

#### RCP/CNU connector (round 8-pin)

Used to connect to an MSU-1000 series Master Setup Unit, CNU-700 Camera Command Network Unit, or RCP-3000/ 1000 series Remote Control Panel via a CCA-5 connection cable. Control signals are sent and received via this connector. When using an RCP-3000/1000 series unit, power is also supplied.

#### AES/EBU connector (BNC-type)

Outputs the AES/EBU format digital audio signal that is input to the video camera.

#### CHARACTER (character output) / SYNC connector (BNC-type)

- **CHARACTER:** Outputs the self-diagnostic results or setup menu of the unit as an SD analog video signal.
- **SYNC:** Outputs an SD composite sync (without burst signal) or HD tri-level sync signal from the internal sync signal generator (default: SD composite sync signal).

For details on how to select the signal, contact a Sony service or sales representative.

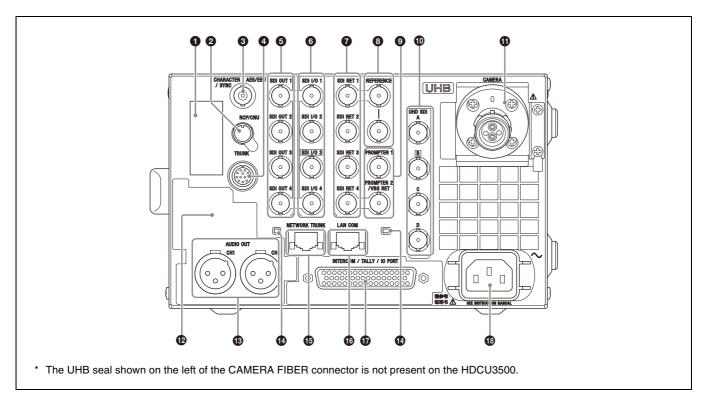

### HDCU5500/3500 Rear Panel

#### AUDIO OUT CH1, CH2 (audio output 1, 2) connectors (XLR 3-pin)

Used to output the audio signal to the AUDIO IN connectors of the video camera.

#### ${f O}\sim { m AC}$ IN (AC power input) connector

Use the specified AC power cord to connect to an AC power supply. The AC power cord can be secured to this unit using the plug holder (optional).

#### Option kit mounting port

The HKCU-SFP50 ST 2110 Interface Kit (option) can be installed.

For an overview of option kits, see "Option Kits" (page 15).

#### 2 RCP/CNU connector (round 8-pin)

Used to connect to an MSU-1000 series Master Setup Unit, CNU-700 Camera Command Network Unit, or RCP-3000/ 1000 series Remote Control Panel via a CCA-5 connection cable. Control signals are sent and received via this connector. When using an RCP-3000/1000 series unit, power is also supplied.

# CHARACTER (character output), AES/EBU, SYNC connector (BNC-type)

**CHARACTER:** Outputs the self-diagnostic results or setup menu of the unit as an SD analog video signal.

**AES/EBU:** Outputs the AES/EBU format digital audio signal that is input to the video camera.

**SYNC:** Outputs an SD composite sync (without burst signal) or HD tri-level sync signal from the internal sync signal generator (default: SD composite sync signal).

For details on how to select the signal, contact a Sony service or sales representative.

#### TRUNK connector (round 12-pin)

Used to connect to the CCU connector on a camera via an RS-232C or RS-422A interface. Communication with up to two channels is available.

#### SDI OUT (3G/HD/SD SDI output) 1/2/3/4 connectors (BNC-type)

The signal from the video camera may be output as 3G signals, HD-SDI signals, or SD-SDI signals. They can output signals with superimposed text characters and markers.

For details on settings, contact a Sony service or sales representative.

#### SDI I/O (3G/HD SDI input/output) 1/2/3/4 connectors (BNC-type)

These can be used as return video inputs, HD prompter inputs, camera video signal outputs, and HD-TRUNK outputs. Set them in NETWORK TRUNK on the <TRUNK/ PROMPTER> page of the MAINTENANCE menu according to the application.

# SDI RET (3G/HD/SD SDI return video input) 1/2/3/4 connectors (BNC-type)

Four different 3G/HD/SD SDI return video input signals may be received independently. The selection of RET 1 to 4 is made by the return switch of the video camera. The aspect ratio can also be selected for an SD signal.

The type of input signal on RET 1 to 4 may be set individually using the setup menu, or using the MSU-1500 series Master Setup Unit.

For details on the setup menu, contact a Sony service or sales representative.

Refer also to the Master Setup Unit manual.

#### **③** REFERENCE IN/OUT connectors (BNC-type)

Input an HD tri-level sync signal or SD reference signal (black burst signal, or black burst signal with 10-field ID) to the REFERENCE IN connector.

The input signal is output from the REFERENCE OUT connector as-is (loop-through). If loop-through output is not used, terminate the unused connector at 75 ohms.

#### INPUT area

# ① PROMPTER (tele-prompter input) 1/2 connectors (BNC-type)

Input the prompter signal of 1 channel or 2 channels depending on the setting of PROMPTER2/VBS-RET on the <REAR I/F> page of the SYSTEM CONFIG menu and PROMPTER CHANNEL MODE on the <TRUNK/ PROMPTER> page of the MAINTENANCE menu. When PROMPTER/VBS-RET is set to DISABLE, the input signal is output from the other connector as-is (loop-through). If loopthrough output is not used, terminate the unused connector at 75 ohms. When PROMPTER/VBS-RET is set to ENABLE, both connectors become inputs and they are terminated at 75 ohms inside the unit.

If the signal used is a 1.0 Vp-p, 75-ohm analog signal, it may be output from the PROMPTER OUT connector of the video camera with a frequency bandwidth of 5 MHz, regardless of signal format.

#### Note

In the case of the HDC5500, connect to the PROMPTER1 connector. It is not supported by the PROMPTER2 connector.

#### ② VBS-RET (VBS return video input) connector\* (BNC-type)

A single VBS return video signal can be input independently. \* This connector doubles as the PROMPTER 2 connector.

The RET selection is made by the return switch of the video camera. The type of input signal on each RET connector may be set individually using the setup menu, or using the MSU-1000 series Master Setup Unit. The aspect ratio may also be selected for SD signals.

For details on setup menu operations, contact a Sony service or sales representative.

Refer also to the Master Setup Unit manual.

For details on how to select the signal, contact a Sony service or sales representative.

#### HDCU3500: UHD SDI A/B/C/D connectors (BNC-type)

The signal from the video camera is output as 3G/1.5G SDI signals.

If replaced with the HKCU-FB50 UHB Transmission Board Kit (option), the specifications become equivalent to the HDCU5500 and support UHD (4K) output.

When HZCU-UHD35 4K/HDR Processor Software (option) is installed, the signal from the video camera is output as a UHD (4K) SDI signal. The C and D connectors can also be used as input connectors.

For details on settings, contact a Sony service or sales representative.

#### HDCU5500, or HDCU3500 with HKCU-FB50 installed: UHD SDI A/B/C/D connectors (BNC-type)

The signal from the video camera is output as UHD (4K) SDI signals. The C and D connectors can also be used as input connectors.

For details on settings, contact a Sony service or sales representative.

#### CAMERA FIBER connector

Used to connect a video camera, using an optical fiber cable. All video camera signals, including power supply, control, video, and audio, are sent and received over one optical fiber cable.

#### Note

Dust on the connection surface of the optical fiber cable may result in transmission errors. When not connected, always cover the end of the connector with the supplied cap.

#### Option kit mounting port

The optional HKCU-SM50 Single Mode Fiber Connector Kit can be installed.

For an overview of option kits, see "Option Kits" (page 15).

#### AUDIO OUT CH1, CH2 (audio output 1, 2) connectors (XLR 3-pin)

Used to output the audio signal to the AUDIO IN connectors of the video camera.

#### Rear indicator

Displays calls and statuses.

#### INTWORK TRUNK connector (RJ-45 8-pin)

Used to connect the device connected to the NETWORK TRUNK connector of a camera with the network connection device.

#### LAN COM connector (RJ-45 8-pin)

Used to connect to a LAN. Connect a LAN hub (10BASE-T/ 100BASE-TX/1000BASE-T), using a LAN cable (shielded type of category 5 or higher).

#### INTERCOM/TALLY/IO (intercom / tally / input/output) connector (D-sub 50-pin)

Used to input and output intercom, tally, and program audio signals. Connect to the intercom/tally/program audio connector of the intercom system.

**REAR PREVIEW function:** Pin 35 is assigned for the output pin of the REAR PREVIEW function.

#### $m I\!O$ $\sim$ AC IN (AC power input) connector

Use the specified AC power cord to connect to an AC power supply. The AC power cord can be secured to this unit using the plug holder (optional).

### **Option Kits**

#### Note

For safety, only a qualified technician with service training should perform tasks inside the unit.

For details about installation, contact a Sony service or sales representative.

#### **HKCU-FB50 UHB Transmission Board Kit**

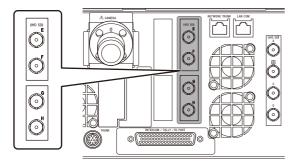

This unit is an option kit that replaces the **①** UHD SDI A/B/C/ D connectors on the rear of the HDCU3500 and enables 4K transfer on the HDCU3500.

#### Note

HZCU-UHD35 4K/HDR Processor Software (option) is required for 4K output.

#### **HKCU-SDI50 12G-SDI Extension Kit**

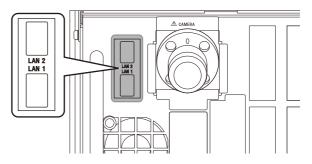

This unit is an option kit that can be installed in the option kit mounting port ③ on the rear of the HDCU5000 Camera Control Unit and enables support for 1-system quad 12G-SDI output at 4K.

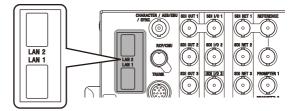

#### HKCU-SFP50 ST 2110 Interface Kit

This unit is an option kit that can be installed in the option kit mounting port **1** on the rear of the HDCU5000/5500/3500 Camera Control Unit and enables connection with SMPTE ST 2110 compliant devices.

#### For HDCU5000

#### For HDCU5500/3500

IP video signals and audio input/output, intercom, and network synchronization are performed using the LAN 1 and LAN 2 connectors (SFP+/SFP28). This enables one 4K and three HD IP inputs/outputs on the HDCU5000/5500/3500. For RCP/MSU device connection and IP tally input, use the

LAN COM connector.

The input/output signal format is set using <OUTPUT FORMAT IP> and <RETURN FORMAT IP> in the setup menu of the HDCU5000/5500/3500.

#### Note

An OTM-10GSR1 or other SFP+ module or SFP28 module is required to use IP output.

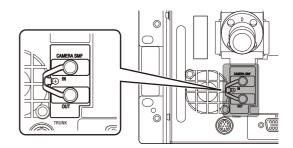

#### **HKCU-SM50 Single Mode Fiber Connector Kit**

This unit is an option kit that can be installed in the option kit mounting port (1) on the rear of the HDCU5000 Camera Control Unit or (2) on the rear of the HDCU5500/3500 Camera Control Unit, and enables single mode fiber transfer on the HDCU5000/5500/3500.

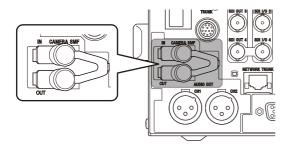

#### Note

It can only be used to connect with HDC3500/3100 and HDC2000-series cameras. It cannot be connected with the HDC5000/5500.

#### For HDCU5000

#### For HDCU5500/3500

The CAMERA SMF IN connector inputs the video signal from the camera, audio (microphone) signal, HD-TRUNK signal, and NETWORK TRUNK signal.

The CAMERA SMF OUT connector outputs the return video signal to the camera, prompter video signal, program audio signal, and NETWORK TRUNK signal. The RS-422A and RS-232C interfaces are also supported.

#### Note

Dust on the connection surface of the connector may result in transmission errors. When not connected, always cover the end of the connector with a cap.

# **Status Display**

The CCU system status can be monitored using a video monitor connected to the CHARACTER, SDI OUT 3, or SDI OUT 4 connector.

#### Note

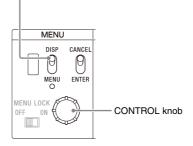

To use the SDI OUT 3 or SDI OUT 4 connector, set SYSTEM CONFIG  $\rightarrow$  <OUTPUT FORMAT1>  $\rightarrow$  SDI-OUT3 or SDI-OUT4  $\rightarrow$  MONITOR in the setup menu to M.

For information on monitoring and changing settings, see "Settings Using the Menu of the Unit" (page 19).

### **Displaying the Status Screen**

The menu screen is controlled using the knob and levers in the MENU control block on the front panel.

DISP/MENU lever

#### To display the status screen

Set the DISP/MENU lever to the DISP position. The most recently viewed status screen page is displayed (when first powered on, the camera settings page is displayed). Turning the CONTROL knob changes the displayed page.

#### To exit the status screen display

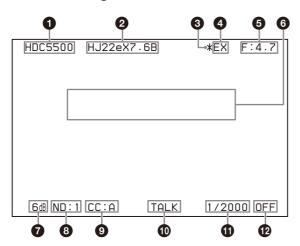

In status screen display mode, set the DISP/MENU lever to the DISP position.

### **Status Display Screen**

The following information is displayed on the status display screen.

- · System status
- Input/output signal format information of each SDI connector
- Camera and unit audio status
- · Camera and unit intercom status
- Warning display

#### **Camera settings**

#### Camera name indication

Displays the name of the connected camera.

#### **2** Lens file name indication

Displays the lens file name.

#### Is F drop indication

Displayed when an F drop occurs.

#### EX (lens extender) indication

Displayed during use of the lens extender.

#### F-stop value indication

Displays the lens F-stop value (iris value).

#### **6** Camera auto control information area

**Top:** Displays the Auto Setup type and execution status. **Bottom:** Displays the execution item.

#### **O** Gain value indication

Displays the video output signal gain setting value (dB).

#### 8 ND filter indication

Displays the currently selected ND filter type.

#### **9** CC filter indication

Displays the currently selected CC filter type.

#### Camera microphone status indication

Displayed when the camera microphone is on.

#### Shutter speed/Clear scan frequency indication

Displays the shutter speed. When ECS is on, displays the clear scan frequency.

#### Shutter/ECS indication

Displays the on/off state of the shutter/ECS.

#### Notes

- Items that are turned off using the <DISPLAY> page settings of the VIDEO/MONITOR menu are not displayed.
- A "-" mark is displayed for each item when a camera is not connected.

#### System status

RDS	:Connected	

LAN1: Link status of the LAN1 connector

**SPD1:** Link speed of the LAN1 connector

- FEC1: FEC setting for 25G of the LAN1 connector
- LSM1: Connection status of the LAN1 connector with Live System Manager

PTP1: Network genlock status of the LAN1 connector

- \* The above items are also shown for the LAN2 connector.
- Ref: Used reference format setting and genlock status

**RDS:** Connection status with NMOS Registration & Discovery System

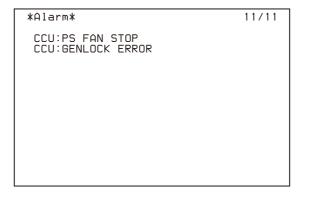

#### **IP stream status**

Displayed only when HKCU-SFP50 is installed.

*IP Stream*	10/11
OUT VIDEO1 VIDEO2 VIDEO3 	IN RETURN1 RETURN2 RETURN3 
AUDIO HD TRUNK AUDIO	PGM
INTERCOM	INTERCOM
META1 META2 META3 	

Displays the stream status during IP transmission. **OUT:** Outgoing IP stream **IN:** Incoming IP stream -----: No incoming/outgoing stream

#### Warning display

Displays any warning that occurs.

# Settings Using the Menu of the Unit

The CCU system and peripheral settings can be checked and modified using a video monitor connected to the CHARACTER, SDI OUT 3, or SDI OUT 4 connector.

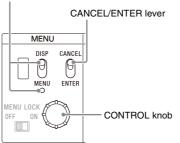

#### Note

To use the SDI OUT 3 or SDI OUT 4 connector, set SYSTEM CONFIG  $\rightarrow$  <OUTPUT FORMAT1>  $\rightarrow$  SDI-OUT3 or SDI-OUT4  $\rightarrow$  MONITOR in the setup menu to M.

## **Changing Menu Item Settings**

The menu screen is controlled using the knob and levers in the MENU control block on the front panel. Setting the CANCEL/ ENTER lever to the ENTER position and pressing the CONTROL knob perform the same function.

DISP/MENU lever and indicator

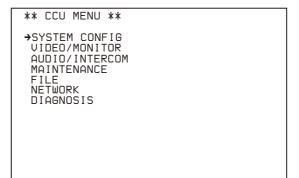

#### To display a menu page

Set the DISP/MENU lever to the MENU position. When first powered on, the CCU MENU page is displayed. When <OUTPUT FORMAT1>  $\rightarrow$  SDI-OUT4  $\rightarrow$  MONITOR is set to C (characters are not added), you can hold the DISP/ MENU lever in the MENU position for 3 seconds to force display of the CCU MENU.

### To display the CCU MENU page

In menu display mode, turn the CONTROL knob to move the pointer ( $\rightarrow$ ) to TOP in the upper right corner of the menu page, then press the CONTROL knob. The CCU MENU showing the menu configuration is displayed.

Menu name	Description
SYSTEM CONFIG	Input/output signal format and system-related settings
VIDEO/MONITOR	Video-related settings
AUDIO/INTERCOM	Audio- and intercom-related settings
MAINTENANCE	CCU configuration settings
FILE	CCU file-related settings
NETWORK	Network-related settings
DIAGNOSIS	Displays the unit status.

#### To select an item in the CCU MENU

Turn the CONTROL knob to move the pointer  $(\rightarrow)$  up/down to the desired menu item, then press the CONTROL knob. The most recently viewed page in the selected menu is displayed.

#### To change the displayed page

1 Turn the CONTROL knob to move the pointer (→) to the page number, then press the CONTROL knob.

The pointer  $(\rightarrow)$  changes to a flashing question mark (?).

Flashing	
	OP
CABLE TYPE: FIBER CAMERA CABLE FIBER TRANSMIT RATE : HIGH OPTICAL SIGNAL : OFF	
BARS : OFF TEST : TEST1	
STARTUP VIDEO SIGNAL: GRAY	

**2** Turn the CONTROL knob to change the displayed page to the desired page, then press the CONTROL knob.

The question mark (?) changes back to the pointer  $(\Longrightarrow)$ . Items on the page can now be selected and changed.

#### To change a menu item setting

If a question mark (?) is displayed beside the page number, press the CONTROL knob to restore the pointer ( $\rightarrow$ ). Items on the page can now be selected and changed.

**1** Turn the CONTROL knob to move the pointer to the desired item, then press the CONTROL knob.

The pointer  $(\Longrightarrow)$  changes to a flashing question mark (?).

2 Turn the CONTROL knob to change the setting.

#### To cancel a changed setting

Set the CANCEL/ENTER lever to the CANCEL position before pressing the CONTROL knob. The item is restored to its current setting.

To suspend menu changes

Set the DISP/MENU lever to the MENU position to exit the menu screen.

The DISP/MENU lever can be set to the MENU position again to restart the operation.

**3** Press the CONTROL knob.

The question mark (?) changes back to the pointer  $(\rightarrow)$ , and the item setting is registered.

**4** Repeat steps 1 to 3 to change other settings on the same page.

#### To enter a character string

Some menu items require a character string input. Moving the pointer (→) to an item with a character string input and pressing the CONTROL knob displays a rectangular cursor and a list of selectable characters. Turning the CONTROL knob moves the cursor between characters. The following menu item has character strings:

- VIDEO/MONITOR menu → BAR CHARACTER page → BAR CHARACTER
- **1** Move the text cursor to the input position, then press the CONTROL knob.

A second cursor is displayed in the character list.

**2** Turn the CONTROL knob to move the cursor to the desired character, then press the CONTROL knob.

Repeat steps 1 and 2 to enter other characters.

- Select INS to insert a space character at the cursor position.
- Select DEL to delete the character at the cursor position.
- Select RET to return to step 1 without changing the string.
- Entering the maximum number of characters (up to the right edge) moves the cursor to ESC on the lower right of the character list.
- **3** Turn the CONTROL knob to move the cursor to END, then press the CONTROL knob.

The new input string is registered.

**To cancel the character string setting** Turn the CONTROL knob to move the cursor to ESC, then press the CONTROL knob.

#### To exit the menu display

In menu display mode, set the DISP/MENU lever to the MENU position.

# Settings Using the Web Menu

You can configure the unit, execute functions, and monitor settings information using the web menu. You can also monitor tally information and monitor the front panel information of the CCUs (camera control unit) connected to a private network on the same subnet as the unit. The web menu is accessed using a web browser on a PC.

#### Note

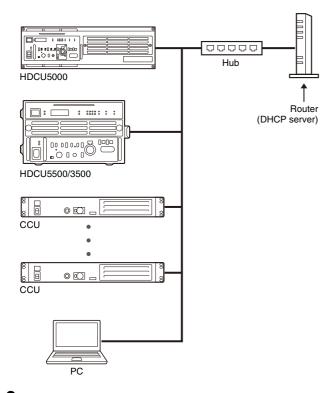

Use of a monitor with resolution 1000×720 or higher is recommended to display the web menu normally.

### Accessing the Web Menu

1 Referring to the following connection example, connect a PC which has a web browser installed and the unit on the same private network.

#### Note

The unit uses the multicast protocol for acquiring and updating information from other CCUs on the same subnet. Accordingly, use of a router that supports the IGMP Snooping function is recommended. If the IGMP Snooping function is not available, CCU information will be present on the network in the broadcasting state, increasing the load of devices on the same network. When <WEB MENU>  $\rightarrow$  SERVICE DISCOVERY is set to OFF in the NETWORK menu, the multicast protocol is not used and only the information for the local unit is acquired and displayed.

2 Check that the devices are turned on.

- 3 Check that <WEB MENU> → WEB MENU is set to ENABLE in the NETWORK menu.
- 4 Check the network settings of the unit using one of the following.
  - In the setup menu of the unit (page 19), set <IP ADDRESS> → PORT to LAN-COM in the NETWORK menu to display the IP address of the unit and the subnet mask on the menu display.
  - On the front panel of the unit, push and hold the DISP/ MENU lever up in the DISP position for 3 seconds to display the IP address and subnet mask in the CCU number display area.
- 5 Enter the IP address of the unit in the web browser.

The web menu is accessed.

### Web Browsers

The use of Chrome is recommended. Use of a web browser other than Chrome may corrupt the layout of the web menu or may cause some functions to operate incorrectly.

### Structure of the Web Menu

The web menu is comprised by an area showing the settings and information of the unit and an area showing a list view of the information for other CCU units on the same subnet.

#### **1** Unit settings/information display area

For details, see "Name and Function of Settings/Information Display Area" (page 23).

#### **2** Information about CCU units on the same subnet

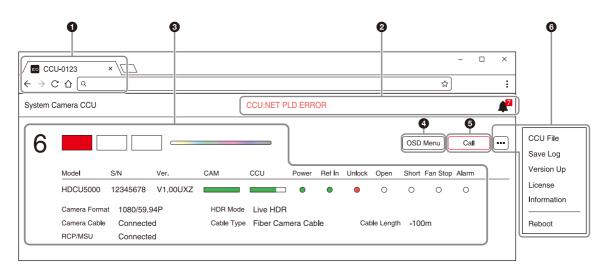

For details, see "CCU Information List Screen" (page 24).

#### Notes

- The web menu actually displays white text on a dark gray background. The illustrations in this document show the colors reversed for increased clarity.
- Information for CCU units on another VLAN cannot be displayed.
- When the menu lock switch of the unit is in the ON position, the unit cannot be configured from the web menu.
- If the IP address is changed by direct operation on the unit or OSD operation in the web menu, a dialog displaying the changed IP address information appears in the web menu. Click the link in the dialog to reconnect to the unit using the new IP address and display the web menu again.

• If connection with a CCU being accessed using the web menu is lost for 30 seconds, a dialog appears and an attempt is made to reconnect. If 30 minutes elapse without reestablishing a connection, a dialog appears that prompts you to reload. If a connection is not reestablished in this dialog, the connection process is aborted and connection with the CCU is lost.

## Name and Function of Settings/Information Display Area

#### Note

When a setting of the unit is changed using the setup menu, the display in the web menu is also updated.

#### Favicon / CCU number display

Displays the favicon and CCU number in a tab.

#### Error message display

Displays the number of current errors at the top right of the  $\clubsuit$  icon. Click the  $\clubsuit$  icon to display the error messages in a pull-down list.

Error messages are also displayed in the center of the header. If there are multiple error messages, the error messages are displayed alternately at a set interval while they are blinking.

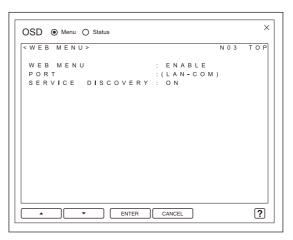

#### In the second second

Displays information about the front panel of the unit. The light sensor level of the camera and CCU are displayed in nine gradations of bar color and length.

Light sensor level	Bar display
High	(Bar color: green)
	(Bar color: yellow)
	(Bar color: yellow)
	(Bar color: red)
★ Low	(Bar color: red)
LOW	(No bar display)

#### OSD Menu button

Click to display the OSD menu screen of the unit. The configuration items displayed on the OSD menu screen are the same as those displayed in the setup menu of the unit. You can switch between the OSD menu screen display and the status screen display of the status of the unit.

Click the  $\Delta$  (up) button and  $\forall$  (down) button at the bottom of the screen to switch between screens. Clicking the ENTER button applies/executes a setting. Clicking the CANCEL button cancels a setting.

You can operate the unit using these buttons, the knobs and levers on the front panel, a mouse, or a keyboard.

OSD menu button	Front panel knob/lever	Mouse	Keyboard
$\Delta$ button	CONTROL knob	Scroll up	1
∇ button	CONTROL knob	Scroll down	Ļ
ENTER button	CANCEL/ENTER lever	Left-click	$\rightarrow$
CANCEL button	CANCEL/ENTER lever	Right-click	←

#### Note

When a setting of the unit is changed using the setup menu, the display in the OSD menu screen is also updated.

#### Help screen

Clicking the **?** icon at the bottom right of the screen displays a help screen describing how to operate the OSD menu.

#### G Call button

The call button of the unit lights up while the Call button is pressed using a mouse. Also, the display of the Call button on the screen changes to dark red while the Call button of the unit is pressed.

#### 6 \cdots button

Click to display a context menu containing a list of the functions that can be executed from the web menu.

CCU File: Executes the same functions as on the <CCU FILE> page of the FILE menu of the unit. You can upload a CCU file stored on a PC to the unit, or download a CCU file from the unit to a PC.

Save Log: Downloads the log file (log.zip) of the unit.

- Version Up: Store the package file on the PC used to access the web menu before updating the unit using this function. During the update process, a screen indicating that the unit is updating appears in the web menu. When the update is completed, the unit restarts automatically and the web menu connects again automatically.
- License: Downloads the device information file (DEVICE.DAT) required for license authentication to a PC via the web menu. It can also perform the following operations which are equivalent to functions on the <OPTION> page of the MAINTENANCE menu.
  ① Install license key (USB flash drive not required)
  ② Check the status of software licenses
  Information: Displays software license information
- (equivalent to the <OPTION> page of the MAINTENANCE menu), version information (equivalent to the <VERSION> page of the DIAGNOSIS menu), and camera diagnosis information (equivalent to the <CAMERA DIAGNOSIS> page of the DIAGNOSIS menu).

Reboot: Reboots the unit.

### **CCU Information List Screen**

This screen displays information about CCU units on the same subnet in list view sorted by CCU number. To display the CCU information list, set <WEB MENU> → SERVICE DISCOVERY to ON in the NETWORK menu.

CCU Li	st

#### Notes

- The information displayed in the CCU information list is acquired via the network. There may be a short delay before the information is reflected on the screen compared to the settings/information display area.
- If communication from a CCU is not received for 30 seconds, the corresponding CCU row becomes gray. When updated information is detected, the background color returns to normal.
- When the setting of a CCU displayed in the list changes, the display of the list is updated.
- Models supported by the CCU information list display are HDCU3100 V2.2 and later, HDCU3170 V2.2 and later, and HDCU5000/5500/3500 V1.0 and later.

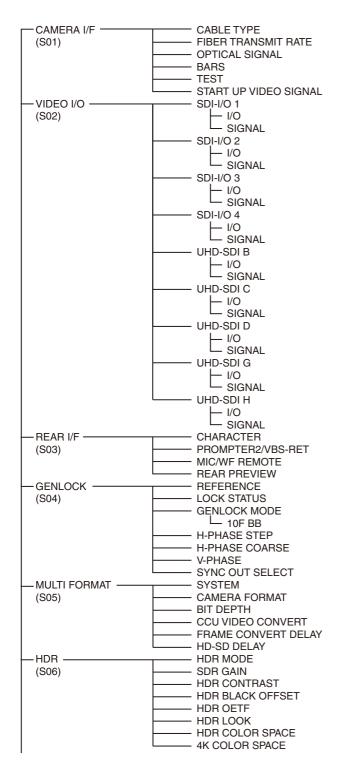

The front panel information of each CCU is displayed on each row. You can switch to the web menu of a CCU by clicking the 
to button.

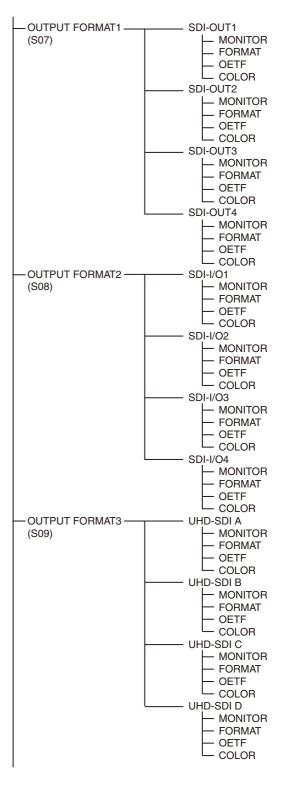

The 
button is not displayed in the row of the currently accessed CCU. The background color also differs from the other rows.

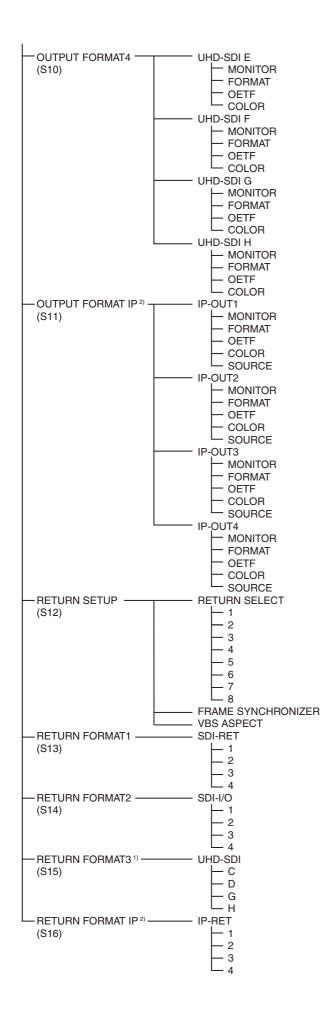

# Menu Tree

	UHD-SDI C		Sets UHD-SDI C.
	I/O	IN, <b>OUT</b>	Selects input or output.
	SIGNAL	When OUT is selected in I/O: SDI-OUT	Sets the signal function.
		When IN is selected in I/O:	
		SDI-RET	
	UHD-SDI D		Sets UHD-SDI D.
	I/O	IN, <u>OUT</u>	Selects input or output.
	SIGNAL	When OUT is selected in I/O: SDI-OUT	Sets the signal function.
		When IN is selected in I/O:	Note
		SDI-RET, UHD PROMPTER	UHD PROMPTER is available on the HDCU5000/ 5500 only.
	UHD-SDI G		Sets UHD-SDI G.
	I/O	IN, <u>OUT</u>	Selects input or output.
	SIGNAL	When OUT is selected in I/O: SDI-OUT	Sets the signal function.
		When IN is selected in I/O: SDI-RET	
	UHD-SDI H		Sets UHD-SDI H.
	I/O	IN, <u>OUT</u>	Selects input or output.
	SIGNAL	When OUT is selected in I/O: SDI-OUT	Sets the signal function.
		When IN is selected in I/O: SDI-RET	

SYSTEM CONFIG			
Page name Page No.	Item	Set value	Description
<rear f="" i=""> S03</rear>	CHARACTER	CHARACTER, AES/EBU, SYNC	Sets the function to assign to the CHARACTER, AES/EBU, SYNC connector.
			<b>CHARACTER:</b> Set to VBS output on which character superposition is performed.
			AES/EBU: Set to AES/EBU output.
			Note
			AES/EBU is available on the HDCU5500/3500 only. <b>SYNC:</b> Set to SD composite sync or HD tri-level reference sync signal output from the internal sync signal generator.
	PROMPTER2/ VBS-RET	ENABLE	Sets the function to assign to the PROMPTER2/ VBS-RET connector.
			Note
			Set to ENABLE (fixed).
			<b>ENABLE:</b> Set to both signal input for the second tele-prompter and VBS return signal input.
	MIC/WF REMOTE	MIC REMOTE, WF REMOTE	Switches the function of pins 36 to 43 when a D-Sub 50-pin board is mounted as the INTERCOM/TALLY, IO PORT connector.
	REAR PREVIEW	MOMENTARY, TOGGLE	Sets the operation mode of the REAR PREVIEW connector output.
<genlock> S04</genlock>	REFERENCE	NOT DETECTED, EXT IN, 1080/59.94I, 1080/23.98PsF, 720/59.94P, 1080/50I, 1080/24PsF, 720/50P	Signal input of the REFERENCE IN connector (Display only).
	LOCK STATUS	When HD or SD is selected in GENLOCK MODE:	Lock status of the external reference signal (Display only).
		LOCKED, NOT LOCKED	
	GENLOCK MODE	HD, <u>SD</u> , NETWORK	Sets the lock mode of the external reference signal.
			Notes
			NETWORK is displayed only when the HKCU-SFP50 ST 2110 Interface Kit is installed.
			Set to NETWORK if operating within an SMPTE ST 2110 compliant system.
			<ul> <li>When set to NETWORK, an external reference input on the REFERENCE IN connector is not required, and network synchronization operates using the LAN 1 and LAN 2 connectors of the HKCU-SFP50. The network synchronization setting is configured on the <network GENLOCK&gt; page of the NETWORK menu.</network </li> </ul>
	10F BB	<u>OFF</u> , ON	Sets whether to use the 10-field ID added to the external reference signal
			This can be selected when GENLOCK MODE is SE and <multi format=""> page <math>\rightarrow</math> SYSTEM is 1.001(525).</multi>
	H-PHASE STEP	When HD is selected in GENLOCK MODE: -3.01 to 3.45 µsec 0.00	
		When SD is selected in GENLOCK MODE: -8.29 to 9.48 µsec 0.00	
	H-PHASE COARSE	–99 to 99, <u>0</u>	Adjusts the horizontal lock phase in relation to the reference signal (fine adjustment)
	V-PHASE	<u><b>0</b></u> to 7	Adjusts the vertical lock phase in relation to the reference signal (line)
	SYNC OUT SELECT	SD SYNC, HD SYNC	Sets the output signal of the REFERENCE OUT connector.

### VIDEO/MONITOR Menu

VIDEO/MONITOR			
Page name Page No.	Item	Set value	Description
<color bar=""> V01</color>	4K/HD-BAR SELECT	BAR 16:9(100%), BAR 16:9(75%), SMPTE 16:9(BLACK), SMPTE 16:9(-I/Q), BAR 4:3(100%), BAR 4:3(75%), SMPTE 4:3(BLACK), SMPTE 4:3(-I/Q), MF-ARIB(75%), MF-ARIB(100%), MF-ARIB(+I), MF-SMPTE(-I,Q), MF-SMPTE(-I,Q), MF-SMPTE(100%,Q), MF-SMPTE(100%,Q), MF-SMPTE(+I,Q), HD-CUSTOM, SDI CHECK FIELD, Y-RAMP, Y/C-RAMP, HD-CUSTOM2	Selects the color bars for 4K output/HD output.
	MF-CB	MODIFY, EVEN	Sets the stripe width for multi-format color bar output.
			<b>MODIFY:</b> Stripe width adjusted to prevent colors mixing in 4:3 Edge crop mode.
			<b>EVEN:</b> Stripe width in accordance with standard.
	SLOPE	<u>WIDE</u> , NARROW	Sets the color difference signal band of the color bars.
			WIDE: Band not limited.
			<b>NARROW:</b> Band is limited to prevent ringing.
	SD		
	SOURCE	4K/HD BAR, <u>SD BAR</u>	Selects the color bar signal source for output to SD. <b>4K/HD BAR:</b> Down converts the 4K/HD color bars and then outputs it.
			<b>SD BAR:</b> Outputs the SD color bars selected in SELECT.
	SELECT	When SYSTEM CONFIG menu → <multi format=""> page → SYSTEM is set to 1.001(525): SMPTE, EIA, FULL, 95%, NTSC100%, Y/C-RAMP, Y-RAMP</multi>	Selects the SD color bars.
		When SYSTEM CONFIG menu → <multi format=""> page → SYSTEM is set to 1.000(625): <u>SMPTE</u>, EIA, FULL, 95%, PAL100%, Y/C-RAMP, Y-RAMP</multi>	
	BAR-CHARACTER	ON, <u>OFF</u>	Sets the character superimposition on the color bar signal.
	MOVING SYMBOL	ON, <u>OFF</u>	Sets symbol moving on the color bar screen.
	TYPE	0, 1, 2	Selects the symbol type.
	SIZE	<u>SMALL,</u> LARGE	Selects the symbol size.
	2SI DIAMOND MARK	ON, <u>OFF</u>	Sets the marker display for 4K 2SI output.
			This function is for displaying a test pattern like the following in the area at the bottom right of the 4K color bar during 4K 2-sample interleave output. OK is displayed if the connections for Links 1 to 4 are correct, and OK is not displayed if they are incorrect. This function can be used to check the connections.

Correct connections

VIDEO/MONITOR	Item		Set value	Description
Page name Page No.	nem		Set value	Description
<color bar=""> V01</color>	HFR CHANNE MARK	EL	ON, <b><u>OFF</u></b>	
<bar character=""> V02</bar>	BAR CHARACTER			Sets the character string to be displayed on each o lines 1 to 16.
	ALL CLEAR			Clears all the character strings set for BAR CHARACTER.
<ccu video=""></ccu>	MONO COLOR		ON, OFF	Turns the MONO COLOR function ON/OFF.
V03	PHASE		0 to 359, <u>0</u>	Sets the MONO COLOR function hue adjustment.
	SATURATI	ON	–99 to 99, <u>0</u>	Sets the MONO COLOR function color level adjustment.
<downconvert> V04</downconvert>	4K-HD DOWNCONV	ERT	<u>1</u> , 2, 3, 4, 1(V:0.3), 1(V:0.6)	Selects the type of filter for downconverting from 4 video signals to HD signals.
	FILTER			Enabled when CAMERA FORMAT is set to UHD/ 59.94P(4K/HDR) or UHD/50P(4K/HDR).
	SD ASPECT		SQUEEZE, <u>EDGE CROP</u> , LETTER BOX	Selects the aspect ratio for SD output.
	NTSC SETUP	)	<u>7.5,</u> 0 IRE	Sets the NTSC signal setup level.
<monitor></monitor>	CHARACTER	LEVEL	1, 2, 3, 4, <u>5</u>	Sets the brightness of text in menus, etc.
V05	LEVEL GATE		<b>OFF</b> , 1&2, 1, 2, ()	Sets level gate display.
				OFF: Level gate is not displayed.
				1: Displays level gate 1.
				2: Displays level gate 2.
				1&2: Displays level gate 1 & 2.
				(): Displayed when a camera is not connected (Display only).
	Y-LEVEL1	MIN	0 to 108% <u>49</u>	Sets the minimum detection level for level gate 1 display.
		MAX	0 to 108% <u>61</u>	Sets the maximum detection levels for level gate 1 display.
		LEVEL	–99 to 99 <u>–25</u>	Sets the zebra display level to be added to the detection area.
	Y-LEVEL2	MIN	0 to 108% <u>74</u>	Sets the minimum detection level for level gate 2 display.
		MAX	0 to 108% <u>108</u>	Sets the maximum detection levels for level gate 2 display.
	_	LEVEL	–99 to 99 <u>–25</u>	Sets the zebra display level to be added to the detection area.
	GATE MARKE	ER	<u>OFF</u> , ON, ()	Sets the display of the gate signal detected by the camera.
				<b>OFF:</b> Gate signal is not displayed.
				<b>ON:</b> Displays zebra in the area (skin gate, etc.) detected by the camera.
				(): Displayed when a camera is not connected (Display only).
	LEVEL		–99 to 99 <u>0</u>	Sets the zebra display level to be added to the detection area.
	ASPECT MARKER		<u>OFF</u> , ON	Sets aspect marker display.
	SELECT		4:3, 13:9, 14:9, EU VISTA, VISTA, CINEMA, FOLLOW DC	Selects the marker type.
	MODULAT OFF	ION ON/	<u>OFF</u> , ON	Sets the mask function for outside the marker fram
	MODULATI LEVEL	ION	–99 to 99 <u>0</u>	Sets the mask level.

VIDEO/MONITOR			
Page name Page No.	Item	Set value	Description
<spirit level=""></spirit>	INDICATOR	<u>OFF</u> , ON,	Sets spirit level display.
V06			This can be set when connected with a camera which has a lens that supports serial communication attached.
	REVERSE	<u>OFF</u> , ON	Selects the indicator move direction for tilting.
	H POSITION	0 to 99 <u>50</u>	Spirit level display position (horizontal)
	V POSITION	0 to 99 <u>50</u>	Spirit level display position (vertical)
<display> V07 Sets the items to be</display>	MESSAGE	ALL, WARNING, OFF	Sets the display of messages for the camera auto setup operation status, warnings that occur in the system, etc.
displayed on the camera			ALL: Displays all messages.
setting status page of the status display screen.			WARNING: Displays system warning messages and menu control messages.
			OFF: Displays only menu control messages.
	CAMERA	<u>ON</u> , OFF	Displays or hides the model name of the connected camera.
	LENS FILE	<u>ON</u> , OFF	Displays or hides the LENS FILE name.
	MASTER GAIN	<u>ON</u> , OFF	Displays or hides the master gain setting value.
	MODE	<u>STEP GAIN</u> , MASTER WHITE, F DROP GAIN, TOTAL GAIN	Switches the MASTER GAIN display mode.
			STEP GAIN: Displays the STEP GAIN value.
			MASTER WHITE: Displays the MASTER WHITE GAIN value.
			F DROP GAIN: Displays the F DROP GAIN value.
			<b>TOTAL GAIN:</b> Displays the total value of the STEP GAIN, MASTER GAIN, and F DROP GAIN values combined.
	MASTER WHITE IND	<u>ON</u> , OFF	Displays or hides the enabled status of the master white gain.
	SHUTTER	<u>ON</u> , OFF	Displays or hides the shutter speed/ECS frequency setting value.
	ND FILTER	<u>ON</u> , OFF	Displays or hides the ND filter type.
	CC FILTER	<u>ON</u> , OFF	Displays or hides the CC filter type.
	IRIS	<u>ON</u> , OFF	Displays or hides the iris status.
	EXTENDER	<u>ON</u> , OFF	Displays or hides the lens extender/digital extender status.
	F DROP IND	<u>ON</u> , OFF	Display or hides the F-drop status.
	MIC	<u>ON</u> , OFF	Displays or hides the camera microphone switch status.

## AUDIO/INTERCOM Menu

AUDIO/INTERCOM			
Page name Page No.	Item	Set value	Description
<mic gain=""></mic>	CAM MIC GAIN		Sets the camera microphone gain.
A01	CH1	(), 20, 30, 40, 50, <u>60</u> dB	Set according to the microphone used.
	CH2	(), 20, 30, 40, 50, <u>60</u> dB	<ul> <li>- (): Displayed when a camera is not connected (Display only).</li> </ul>
<audio out=""> A02</audio>	DELAY	0, 5, 11, 16, 21, 27, 32, 37, 43, 48, 53, 59, 64, 69, 75, 80 ms	Sets the camera microphone output phase.
	AES/EBU OUT	MIC1/2, AES/EBU	Selects the AES/EBU output.
			<b>MIC1/2:</b> Outputs the camera MIC1/2 input from the AES/EBU connector of the CCU.
			<b>AES/EBU:</b> Outputs the camera AES/EBU input from the AES/EBU connector of the CCU.
	ANALOG OUT	MIC1/2, AES/EBU	Selects the MIC OUT ANALOG output.
			<b>MIC1/2:</b> Outputs the camera MIC1/2 input from the AUDIO OUT connector of the CCU.
			<b>AES/EBU:</b> Outputs the camera AES/EBU input from the AUDIO OUT connector of the CCU.
	CH1 : LEVEL	–20, <u>0</u> , +4 dBu	Sets the AUDIO CH1 output level.
	CH1 : ADJUST	–99 to 99, <u>0</u>	_
	CH2 : LEVEL	–20, <b>0</b> , +4 dBu	Sets the AUDIO CH2 output level.
	CH2 : ADJUST	–99 to 99, <u>0</u>	_
<intercom></intercom>	INTERCOM CH	1CH(PROD), 2CH(PRODŊ)	Selects the intercom channel number to be used.
A03	PRODUCER INTERFACE	CLEAR COM, <u>4WIRE</u> , RTS	Sets the producer line intercom system.
	SIDE TONE CANCEL	–99 to 99 <u>0</u>	Sets the side tone cancel level. (Setting is possible when CLEAR COM or RTS is selected)
	TERMINATION	<u>OFF</u> , ON	Sets termination resistance (200 ohms). (Setting is possible when CLEAR COM or RTS is selected)
			<b>OFF:</b> Displayed when 4WIRE is selected in PRODUCER INTERFACE (Display only).
	ENGINEER INTERFACE	CLEAR COM, <u>4WIRE</u> , RTS	Sets the engineer line intercom system.
	SIDE TONE CANCEL	0 to 99 <u>0</u>	Sets the side tone cancel level. (Setting is possible when CLEAR COM or RTS is selected)
	TERMINATION	<u>OFF</u> , ON	Sets termination resistance (200 ohms). (Setting is possible when CLEAR COM or RTS is selected)
			<b>OFF:</b> Displayed when 4WIRE is selected in ENGINEER INTERFACE (Display only).
	PGM1 INPUT LEVEL	–20, <u>0</u> , +4 dBu	Sets the PGM1 input level.
	PGM2 INPUT LEVEL	–20, <u>0</u> , +4 dBu	Sets the PGM2 input level.
	PGM3 INPUT LEVEL	–20, <u>0</u> , +4 dBu	Sets the PGM3 input level.

AUDIO/INTERCOM			
Page name Page No.	Item	Set value	Description
<front intercom=""></front>	MIC/PGM	(PGM ON), (MIC OFF), (MIC ON)	Front panel MIC/PGM switch position (Display only)
A04	I/F	(PROD), (ENG), (PRIVATE)	Front panel INTERCOM switch position. (Display only)
	PRIVATE SW	ENABLE, DISABLE(SET TO ENG),	Operation when the INTERCOM switch on the front panel is set to the PRIV (private) position.
		DISABLE(SET TO PROD)	ENABLE: Private operation
			DISABLE(SET TO ENG): ENG line operation
	INTERCOM MIC	DYNAMIC, ECM, CARBON	Sets the headset microphone connected to the INTERCOM connector on the front panel.
			<b>CARBON:</b> Carbon microphone (power supply, 20 dB gain)
			<b>ECM:</b> Electret condenser microphone (power supply, 40 dB gain)
			<b>DYNAMIC:</b> Dynamic microphone (no power supply, 60 dB gain)
	INTERCOM MIC TYPE	BALANCED, <b>UNBALANCED</b>	Sets the headset microphone connected to the INTERCOM connector on the front panel.
			BALANCED: Balanced microphone
			<b>UNBALANCED:</b> Unbalanced microphone
	INTERCOM MIC GAIN	−6, <b>0</b> , +6 dB	Sets the microphone input gain.
	SIDE TONE LEVEL	0 to 99 <u>50</u>	Sets the side tone level.
	PGM MIX MODE	OFF, INCOM+PGM,	OFF: Signals are not mixed.
		L-INCOM/R-PGM	<b>INCOM+PGM:</b> INCOM and PGM signals are mixed.
			L-INCOM/R-PGM: Outputs INCOM signal through the left channel and PGM signal through the right.
	PGM SELECT	<u>PGM1</u> , PGM2, PGM3, PGM1+PGM2+PGM3	Selects the PGM audio output from the FRONT INTERCOM connector.
	PGM1 LEVEL	0 to 99, <u>50</u>	Sets the MIX level of PGM1.
	PGM2 LEVEL	0 to 99, <u>50</u>	Sets the MIX level of PGM2.
	PGM3 LEVEL	0 to 99, <u>50</u>	Sets the MIX level of PGM3.
<test tone=""></test>	SOURCE	1kHz	Sets the audio source of the test tone.
A05	LEVEL	0, –10, <u>–20</u> , –30, –40, –50, –60, –70 [dB]	Sets the level of the test tone.
	ANALOG OUT CH	NONE, ALL, MIC1, MIC2, AES/EBU1, AES/EBU2, INTERCOM ENG, INTERCOM PROD	Sets the analog output channel of the test tone.
	IP OUT CH	NONE, ALL, MIC1, MIC2, AES/EBU1, AES/EBU2, INTERCOM ENG, INTERCOM PROD	Sets the IP output channel of the test tone.

MAINTENANCE			
Page name Page No.	Item	Set value	Description
<trunk prompter=""> M01</trunk>	TRUNK LINE		
	CHANNEL MODE	<b>2CH(MAX 75Kbps)</b> , 1CH(MAX 150Kbps)	Sets the number of channels to be used.
	INTERFACE	<b>232C</b> , 422A	Sets the communication line mode.
	PROMPTER CH	<u>2CH</u> , 1CH	Sets the number of prompter lines.
			Note
			The number of lines will vary depending on the number of prompter lines of the connected camera.
<trunk prompter2=""> M02</trunk>	NETWORK TRUNK	OFF, NETWORK,	Sets the mode for the network trunk.
		NETWORK+VIDEO	OFF: NETWORK TRUNK is not used.
			<b>NETWORK:</b> Network Trunk is used (maximum 1 Gbps)
			<b>NETWORK+VIDEO:</b> Network trunk is used at the same time as HD Trunk/HD Prompter (maximum 100 Mbps)
			Note
			When <camera f="" i=""> → FIBER TRANSMIT RATE is set to ULTRA, this is set to NETWORK+VIDEO (fixed).</camera>
	DATA RATE	100Mbps, 1Gbps	Displays the data transfer rate.
			Note
			When <camera f="" i=""> <math>\rightarrow</math> FIBER TRANSMIT RATE is set to ULTRA, this item can be set.</camera>
	CAMERA	ENABLE, DISABLE	Displays whether the camera is enabled/disabled (Display only).
	HD/UHD TRUNK	ENABLE, DISABLE	Displays whether HD TRUNK is enabled/disabled (Display only).
	DATA RATE	<u>1.5G</u> , 12G	Displays the HD TRUNK data rate.
	HD PROMPTER	ENABLE, DISABLE	Displays whether HD PROMPTER is enabled/ disabled (Display only).
			Fixed to DISABLE when using SDI-RET on HDCU5000/5500.
	FRAME SYNC	OFF, ON, (ON)	Turns the frame synchronizer function ON/OFF.
	SOURCE	<u>SDI-I/O4</u> , IP-RET3	Sets the HD prompter signal source.
			IP-RET3 can be selected only when the HKCU-SFP50 ST 2110 Interface Kit is installed.
	UHD PROMPTER	ENABLE, DISABLE	Displays whether UHD prompter is enabled/disabled (Display only).
	DATA RATE	<u>1.5G</u> , 3G, 6G, 12G	Sets the UHD prompter data rate.
	FRAME SYNC	<u>OFF</u> , ON, (ON)	Turns the frame synchronizer function ON/OFF.
	SOURCE	UHD-SDI D	Sets the UHD prompter signal source.

<misc></misc>	OPTICAL SIGNAL	ENABLE, <b>DISABLE</b>	Sets whether to save the state of the OPTICAL
M10	BACKUP		SIGNAL setting on the <camera f="" i=""> page of the SYSTEM CONFIG menu for the next startup.</camera>

## FILE Menu

FILE			
Page name Page No.	Item	Set value	Description
<ccu file=""></ccu>	FILE INDEX	1 to 5, <u>1</u>	Selects the file number of the target for operation.
F01	RECALL		All menu settings of the unit can be saved to a CCU file. Use RECALL to load and apply the saved settings to simplify the setup operation.
			Note
			The IP address, subnet mask, and default gateway settings of the LAN COM connector are not loaded using RECALL.
	STORE		Saves a CCU file to the internal memory.
			Up to five CCU files can be saved in the unit. Select the file number on the STORE screen.
	EXPORT TO USB		Exports a CCU file to the USB flash drive. Exporting is also supported using the web menu.
			The path for the USB flash drive is "/MSSONY/PRO/ CAMERA/HDCU5000"
	IMPORT FROM USB	l .	Imports a CCU file from the USB flash drive. Importing is also supported using the web menu.
			The path for the USB flash drive is "/MSSONY/PRO/ CAMERA/HDCU5000"
	FILE NAME1 to 5	NO_FILE	Sets the CCU file name.
			ASCII code, 1 to 32 characters
	CLEAR ALL		Deletes all CCU files.
<log></log>	LOG	ENABLE, DISABLE	Enables or disables saving of log files.
F02	EXPORT TO USB		Saves logs to the USB flash drive (Execute using EXEC).
			The path of the USB flash drive is "/MSSONY/PRO/ CAMERA/HDCU5000"
	CLEAR		Deletes logs stored internally on the unit (Execute using EXEC).
			Note
			Logs for up to 30 days are stored. Logs are deleted when the 30-day maximum is reached, starting with the oldest.

## NETWORK Menu

NETWORK			
Page name Page No.	Item	Set value	Description
<ip address=""></ip>	PORT	LAN-COM, LAN1, LAN2	Selects the port for which to set the IP address.
N01	DHCP	<u>ON</u> , OFF	Enables or disables DHCP.
	IP ADDRESS	0.0.0.0 to 255.255.255.255	Sets the IP address.
			Note
			If there is no DHCP server available on the network when DHCP is set to ON, a unique Link-Local address (169.254.0.0/16) is assigned locally by the Auto IP function. If an IP address is assigned to the DHCP server, the Auto IP function will not be activated while the unit is operating (powered) in order to prevent incorrect operation, even if communication with the DHCP server is subsequently interrupted. This IP address may change if the unit is restarted, and should only be used for setup purposes. The Auto IP function applies only to the LAN COM connector. It does not apply to the LAN 1 and LAN 2 connectors of the HKCU-SFP50.
	SUBNET MASK	0.0.0.0 to 255.255.255.255	Sets the subnet mask.
	DEFAULT GATEWAY	<b>0.0.0.0</b> to 255.255.255.255	Sets the default gateway.
	SET	. <u></u>	A "SET OK?" message is displayed. Press ENTER again to confirm the change. (Execute using ENTER)
	COPY TO STATIC ADDRESS		Copies the IP ADDRESS, SUBNET MASK, and DEFAULT GATEWAY settings obtained with DHCP set to ON to the static settings when DHCP is set to OFF.
	MAC ADDRESS	0000000000000000 to fffffffffff	Displays the MAC address of each port.
	LINK SPEED	10G, <b>25G</b>	Displays the link speed. Displayed only when LAN1 or LAN2 is selected.
			<b>Note</b> Always set LAN1 and LAN2 to the same link speed. Normal operation will not occur if the settings are different.
	25G FEC	OFF, <b><u>RS-FEC(CL108)</u></b> , FC-FEC(CL74)	Sets the FEC mode for 25G. Displayed only when LAN1 or LAN2 is selected.
			Note Set to the port setting of the IP switch to be connected.
<cns settings=""></cns>	CNS MODE	LEGACY, BRIDGE, MCS	Sets the communication mode.
N02	MCS MODE	CLIENT	Indicates that the unit is the client when MCS mode is selected (Display only).
	CCU NO	When MCS is selected in CNS MODE: Blank, 1 to 96 When LEGACY or BRIDGE is selected in CNS MODE: Blank,	Sets the CCU number.
	MASTER IP ADDRESS	1 to 96, A to Z <u>0.0.0.0</u> to 255.255.255.255	Sets the master device IP address for MCS mode.
	SET		A "SET OK?" message is displayed. Press ENTER again to confirm the change. (Execute using ENTER)

NETWORK			
Page name Page No.	Item	Set value	Description
<web menu=""></web>	WEB MENU	ENABLE, DISABLE	Enables/disables the web menu.
N03	PORT	LAN-COM	Selects the connection port.
	SERVICE DISCOVERY	<u><b>ON</b></u> , OFF	Enables/disables the service discovery function. ON: Display the CCU list in the web menu. OFF: Do not display the CCU list in the web menu.
			Notes
			<ul> <li>Set this to OFF if the CCU list is not required or when you want to reduce the network load as much as possible.</li> </ul>
			• When set to OFF, the unit cannot be detected by the service discovery from other CCUs on the same subnet.
<network genlock=""></network>	PORT	LAN1, LAN2	Selects the port to use.
N04 Displayed only when	NETWORK GENLOCK	DISABLE, <u>ENABLE</u>	Enables/disables network genlock.
HKCU-SFP50 is installed.	PROFILE	ST2059-2	Displays the supported profile.
			Only the ST2059-2 profile is supported.
	DOMAIN NUMBER	0 to 127, <u>127</u>	Sets the domain number.
			Note
			Set to the domain number of the master device to be connected.
		MULTICAST MODE, MIXED	MIXED MODE: Unicast reply to the master.
	MODE	MODE	MULTICAST MODE: Multicast reply to the master.
	DELAY REQUEST INTERVAL	–7 to –1, <u>–3</u>	Displays the delay of the response to the PTP master.
	PTP MASTER INFO		Displays information obtained from the PTP master.
	IP ADDRESS	0.0.0.0 to 255.255.255.255	Displays the IP address of the currently synchronized PTP master device.
	SYNC INTERVAL	−7 to −1, <u>−3</u>	Displays the Sync Interval setting of the master device.
	PRIORITY 1	0 to 255, <u>128</u>	Displays the priority level of the PTP master.
	PRIORITY 2	0 to 255, <u>128</u>	The lower the number, the higher the priority.
	STEP	ONE-STEP, TWO-STEP	Displays the mode in which the timestamp is sent.
			<b>ONE-STEP:</b> Sent in Sync message.
			TWO-STEP: Sent in Follow-up message.
	LOCK STATUS	NOT IN USE, NO MASTER,	Displays the genlock operation status.
		LOCKING, LOCKED	NOT IN USE: PTP operation stopped
			NO MASTER: PTP master not found
			LOCKING: Synchronizing
			LOCKED: Synchronized

NETWORK			
Page name Page No.	Item	Set value	Description
<ptp status=""></ptp>	PTP NIC	LAN1, LAN2	Displays the port on which PTP is running.
N05	STATUS	NO MASTER, LOCKED,	Displays the PTP status.
Displayed only when		LOCKING, NOT IN USE	NOT IN USE: PTP operation stopped
HKCU-SFP50 is installed.			NO MASTER: PTP master not found
			LOCKING: Synchronizing
			LOCKED: Synchronized
	PORT	LAN1, LAN2	Selects the port for which to display the status.
	UTC Time	1970-01-01 00:00:00	Master time (displays the internal time when the master is Free-run or Disable).
	MasterID	000000000000000-0	Displays the master clock ID.
	GMClockID	00000000000000-0	Displays the grandmaster clock ID.
	Sync	0Hz (0pkts)	Displays the sync message rate.
	FollowUp	0Hz (0pkts)	Displays the follow-up message rate.
	DelayReq	0Hz (0pkts)	Displays the delay request message rate.
	DelayResp	0Hz (0pkts)	Displays the delay response message rate.
	Network Status	UNAVAILABLE, NOT GOOD, GOOD, VERY GOOD	Displays the network status.
	Delay	Ons	Displays the network delay.
	Jitter	Ons	Displays the network jitter.
<ip live=""></ip>	IP LIVE SYSTEM MAN	NAGER	
N06	PORT	DISABLE, LAN1&LAN2	Sets the IP Live System Manager (LSM).
Displayed only when			<b>DISABLE:</b> Does not communicate with LSM.
HKCU-SFP50 is installed.			LAN1&LAN2: Communicates with LSM using LAN and LAN2 (for redundancy).
			<b>Note</b> Restart the unit after changing the PORT setting.
	DHCP	OFF	Sets the IP address of the LSM (fixed OFF).
	PRIMARY IP	<b>0.0.0.0</b> to 255.255.255.255	Sets the IP address of LSM1.
	ADDRESS	<u>0.0.0.0</u> 10 200.200.200.200	Sets the IF address of LSM1.
	SECONDARY IP ADDRESS	0.0.0.0 to 255.255.255.255	Sets the IP address of LSM2.
	PRIMARY	DISCONNECTED, CONNECTING,	Displays the status of the connection with LSM1.
	CONNECTION	CONNECTED	DISCONNECTED: Disconnected.
	STATUS		CONNECTING: Establishing communication.
			CONNECTED: Communication established.
	SECONDARY	DISCONNECTED, CONNECTING,	Displays the status of the connection with LSM2.
	CONNECTION	CONNECTED	DISCONNECTED: Disconnected.
	STATUS		CONNECTING: Establishing communication.
			CONNECTED: Communication established.
	MULTICAST ADDRESS	AUTO, MANUAL	Sets the mode switching method for the multicast address setting of IP stream.
			Fixed to AUTO when PORT is set to LAN1&LAN2, and uses multicast addresses configured from the LSM.
			Fixed to MANUAL when PORT is set to DISABLE,
			and uses the addresses set manually using the MULTICAST ADDRESS 1 to 5 pages.

NETWORK			
Page name Page No.	Item	Set value	Description
<nmos></nmos>	PORT	DISABLE, LAN-COM	Selects the ports on which NMOS is enabled.
N07 Displayed only when			Can be selected only when $\langle IP \ LIVE \rangle \rightarrow IP \ LIVE$ SYSTEM MANAGER $\rightarrow$ PORT is set to DISABLE.
HKCU-SFP50 is installed.	PORT NUMBER (IS-04 NODE)	100 to 65535, <u>3001</u>	Sets the port number for the IS-04 Node API.
	PORT NUMBER (IS-05 CONNECTION)	100 to 65535, <b><u>3002</u></b>	Sets the port number for the IS-05 Connection API.
	RDS DISCOVERY	<u>ON</u> , OFF	Enables/disables auto detection using the Registration & Discovery System (RDS).
			When enabled, RDS discovery is enabled within the same subnet.
			Note
			If RDS is not available on the same subnet, disable the setting and set the IP address manually.
	RDS CONNECTION STATUS	DISCONNECTED, CONNECTING, CONNECTED	Displays the RDS connection status.
	RDS IP ADDRESS	<b><u>0.0.0.0</u></b> to 255.255.255.255	Displays the detected RDS IP address when RDS DISCOVERY is set to ON.
			Sets the RDS IP address manually when RDS DISCOVERY is set to OFF.
	RDS PORT NUMBER	100 to 65535, <b>18235</b>	Displays the detected RDS port when RDS DISCOVERY is set to ON.
			Sets the RDS port manually when RDS DISCOVERY is set to OFF.
<multicast address<br="">1&gt;</multicast>	MULTICAST ADDRESS	<u>AUTO</u> , MANUAL	Displays the mode of the multicast address setting of the IP stream.

	REAR FAN1/2	OK, STOP	Displays the operating status of rear panel fans 1 and 2 (HDCU5000 only).
	REAR FAN4	OK, STOP	Displays the operating status of rear panel fan 4 (HDCU5000 only).

# Appendix

## Precautions

If the unit is suddenly taken from a cold to a warm location, or if ambient temperature suddenly rises, moisture may form on the outer surface of the unit and/or inside of the unit. This is known as condensation. If condensation occurs, turn off the unit and wait until the condensation clears before operating the unit. Operating the unit while condensation is present may damage the unit.

The fan and battery are consumable parts that will need periodic replacement.

When operating at room temperature, a normal replacement cycle will be about 5 years. However, this replacement cycle represents only a general guideline and does not imply that the life expectancy of these parts is guaranteed. For details on parts replacement, contact your Sony representative.

The life expectancy of the electrolytic capacitor is about 5 years under normal operating temperatures and normal usage (8 hours per day; 25 days per month).

If usage exceeds the above normal usage frequency, the life expectancy may be reduced correspondingly.

### **Operating environment**

- Avoid high-temperature rooms and near sources of heat.
- Do not place in locations with strong electric or magnetic field.
- Dry location with good ventilation.
- · Avoid locations exposed to sunlight or strong lighting.

### Avoid violent impacts

Dropping the unit, or otherwise imparting a violent shock to it, is likely to cause it to malfunction.

### Do not cover with cloth

While the unit is in operation, do not cover it with a cloth or other material. This can cause the temperature to rise, leading to a malfunction.

#### After use

Set the POWER switch to the OFF position.

#### Care

If the body or panels of the unit become dirty, wipe them with a dry cloth. For severe dirt, use a soft cloth steeped in a small amount of neutral detergent, then wipe dry. Do not use volatile solvents such as alcohol or thinners, as these may damage the finish.

# To prevent electromagnetic interference from portable communications devices

The use of portable telephones and other communications devices near this unit can result in malfunctions and interference with audio and video signals.

It is recommended that the portable communications devices near this unit be powered off.

### **Error Messages**

When an error is detected in this unit or the camera, the ALARM indicator turns on and an error message is displayed on this unit.

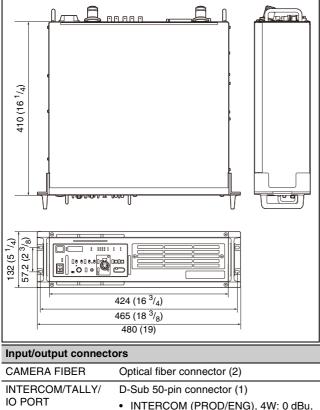

Error Messages	Description	
CCU:XXX POWER ERROR	Board power supply error (XXX	
	is the board name)	
CCU:XXX PLD ERROR	PLD error (XXX is the board name)	
CCU:XXX TEMP WARNING	Board temperature error (XXX is the board name)	
CCU:OPTICAL CONDITION OK	Light sensor level on CCU side	
CCU:OPTICAL CONDITION WARNING	dropped	
CCU:OPTICAL CONDITION CARE		
CCU:OPTICAL CONDITION ERROR		
CCU:PS FAN STOP	Power supply block FAN error	
CCU:PS CABLE SHORT	CAMERA connector optical fiber cable short-circuit connection error	
CCU:PS CABLE OPEN	CAMERA connector optical fiber cable open-circuit connection error	
CCU:PS RCP POWER SUPPLY ERROR	Remote control panel (connected to REMOTE connector) power supply error	
CCU:PS TEMP WARNING	Power supply unit temperature error	
CCU:PS POWER ERROR	Power supply unit input/output	
CCU:PS POWER WARNING	error	
CCU:FRONT FAN1 STOP	Front board fan 1 stopped	
CCU:PS REAR FAN STOP	Power supply block rear fan error	
CCU:GENLOCK ERROR	External reference sync error	
CCU:FORCE LEGACY	LEGACY is forcibly set for CNS MODE	
CCU:10FIELD-ID ERROR	10-field ID is not detected even though the 10F BB setting is On	
CCU:SET DATE&TIME	Invalid date	
CCU:LINK SPEED MISMATCH	The link speeds of LAN1 and LAN2 do not match.	

# Specifications

### HDCU5000

General	
Power requirements	100/120/220 to 240 V AC, 50/60 Hz
	(For details about switching the voltage, contact a Sony service or sales representative.)
Current consumption	7 A (max.)
Operating temperature	5 °C to 40 °C (41 °F to 104 °F)
Storage temperature	–20 °C to +60 °C (–4 °F to +140 °F)
Mass	Approx. 19.5 kg (43 lb)
External dimensions (Units mm (inches))

## HDCU3500

General	
Power requirements	100 V to 240 V AC, 50/60 Hz
Current consumption	4.5 A (max.)
Operating temperature	–10 °C to +40 °C (14 °F to 104 °F)
Storage temperature	–20 °C to +60 °C (–4 °F to +140 °F)
Mass	Approx. 6.3 kg (13 lb 14 oz)
	<i>a</i>

# HKCU-FB50

General			
Power consumption	40 W		
Operating temperature	–10 °C to +40 °C (14 °F to 104 °F)		
Storage temperature	–20 °C to +60 °C (–4 °F to +140 °F)		
Dimensions (w/h/d, excluding protrusions)	$310 \times 112 \times 39$ mm (12 $^{1}/_{4} \times 4 {}^{1}/_{2} \times 1 {}^{9}/_{16}$ inches)		
Mass	TX board: Approx. 0.6 kg (1 lb 5.2 oz)		
Input/output connectors			
Connectors	BNC		
Number of lines	4		
Signal type	SMPTE ST2082/ST2081/ST425/ST424/ ST292		
Supplied accessories			
UHB label (2)			
Operating Instructions	Operating Instructions (1)		

## HKCU-SDI50

General		
Power consumption	5 W	
Operating temperature	5 °C to 40 °C (41 °F to 104 °F)	
Storage temperature	–20 °C to +60 °C (–4 °F to 140 °F)	
Dimensions (w/h/d, excluding protrusions)	$21 \times 57 \times 230 \text{ mm}$ $({}^{27}/_{32} \times 2  {}^{1}/_{4} \times 9  {}^{1}/_{8} \text{ inches})$	
Mass	HIF board: Approx. 150 g (5.3 oz)	
Output connectors		
HIF board: BNC type (4)		
12G-SDI: SMPTE ST2082, 0.8 Vp-p, 75 ohms, 11.880 Gbps/ 11.868 Gbps		
6G SDI: SMPTE ST2081, 0.8 Vp-p, 75 ohms, 5.940 Gbps/ 5.934 Gbps		
3G SDI: SMPTE ST424/425 Level-A/B, 0.8 Vp-p, 75 ohms, 2.970 Gbps/2.967 Gbps		
HD SDI: SMPTE ST292, 0.8 Vp-p, 75 ohms, 1.485 Gbps/ 1.4835 Gbps		
Supplied accessories		
30-pin cable (2)		
Screws +2.6×5 (4)		

Operating Instructions (1)

## HKCU-SFP50

General		
Power consumption	43 W	
Operating temperature	–10 °C to +40 °C (14 °F to 104 °F)	
Storage temperature	–20 °C to +60 °C (–4 °F to +140 °F)	
Dimensions (w/h/d, excluding protrusions)	$258 \times 116 \times 41 \text{ mm}$ (10 $^{1}/_{4} \times 4 ^{5}/_{8} \times 1 ^{5}/_{8} \text{ inches}$ )	
Mass	Approx. 0.5 kg (1 lb 1.6 oz)	
I/O connectors		
Connectors	SFP+, SFP28	
Number of lines	2	
Signal type	10GBASE-**, 25GBase-** (depending on SFP+/SFP28 transceiver module)	
	For information about the supported SFP+ and SFP28 transceiver modules (e.g. OTM-10GSR1), contact your Sony sales or service representative.	
Supplied accessories		
Air divider plate (1)		
Rivet (3)		
60-pin harness (2)		
20-pin harness (1)		
Power supply harness (1)		
Screws M3×8 (6)		
Screws M2.6×5 (2)		
Bracket (1)		
Cover sheet (2)		
Operating Instructions (1)		

## HKCU-SM50

General		
Power consumption	1.2 W	
Operating	-10 °C to +40 °C (14 °F to 104 °F)	
temperature		
Storage temperature	–20 °C to +60 °C (–4 °F to +140 °F)	
Dimensions (w/h/d,	66 × 67 × 30 mm	
excluding protrusions)	$(2 \frac{5}{8} \times 2 \frac{3}{4} \times 1 \frac{3}{16} \text{ inches})$	
Mass	Approx. 0.1 kg (3.5 oz)	
Input/output connectors		
ST connectors for single-mode fiber cables (2)		
Supplied accessories		
SC-LC optical fiber cable (1)		
Optical module (1)		
Screws M3×8 (1)		
Bracket (1)		
Cover sheet (1)		
Operating Instructions	(1)	

Design and specifications are subject to change without notice.

#### Notes

- Always verify that the unit is operating properly before use. SONY WILL NOT BE LIABLE FOR DAMAGES OF ANY KIND INCLUDING, BUT NOT LIMITED TO, COMPENSATION OR REIMBURSEMENT ON ACCOUNT OF THE LOSS OF PRESENT OR PROSPECTIVE PROFITS DUE TO FAILURE OF THIS UNIT, EITHER DURING THE WARRANTY PERIOD OR AFTER EXPIRATION OF THE WARRANTY, OR FOR ANY OTHER REASON WHATSOEVER.
- SONY WILL NOT BE LIABLE FOR CLAIMS OF ANY KIND MADE BY USERS OF THIS UNIT OR MADE BY THIRD PARTIES.
- SONY WILL NOT BE LIABLE FOR THE TERMINATION OR DISCONTINUATION OF ANY SERVICES RELATED TO THIS UNIT THAT MAY RESULT DUE TO CIRCUMSTANCES OF ANY KIND.

SONY WILL NOT BE LIABLE FOR DAMAGES OF ANY KIND RESULTING FROM A FAILURE TO IMPLEMENT PROPER SECURITY MEASURES ON TRANSMISSION DEVICES, UNAVOIDABLE DATA LEAKS RESULTING FROM TRANSMISSION SPECIFICATIONS, OR SECURITY PROBLEMS OF ANY KIND.

Depending on the operating environment, unauthorized third parties on the network may be able to access the unit. When connecting the unit to the network, be sure to confirm that the network is protected securely.
