**[Description]**

The updated software files for the applicable models are released. Upgrade them as necessary.

**[Change Point]**

<Software> V2.30

1. Correct the error that the communication is disconnected when the load of the command is high.
2. Correct the error that the setting of the MultiMatrix would be "0" when the scene file transferring is performed.
3. When the F No. Disp is set to "Return" and the power is turned off and on with the iris closed, the iris would be closed even the close condition is released. This error is corrected.
4. Correct the name of the marker setting file of the Focus Position Meter.
5. Correct the error that the priority between the drawings of the marker and the display of the fit may not be the same when the multiple markers overlap each other for the Focus Position Meter.
6. Correct the errors related to the customized menu of the Focus Position Meter.

<PLD> DPR1:V2.30

Correct the error that the frame of the CAM/VF/CCU image drops in RGB4:4:4/24PsF format, and the image is not smooth.
