DESCRIPTION

When replacing the XLR microphone connector, use the following new connector:

Former Connector		New Connector
1-573-281-11	→	1-573-594-12
1-573-594-11		1-573-594-12
1-573-594-21 or -22		1-573-594-23

The new microphone connector uses beryllium copper for the contactor points, which is approximately ten times more durable than the copper alloy used in former connectors.

To distinguish between former and new connectors, inspect the lot number printed on the connector. (See Figure 1.)

Connector	Lot No.
1-573-281-11	No lot no. printed
1-573-594-11	No lot no. printed
1-573-594-21 or -22	Lot no. printed in black
1-573-594-12 or -23	Lot no. printed in white
