SPORTSNET

Lyric PRO 8 RU2 Build 1589

SPORTSNET has produced their new look using a version of software that has not been released. The new released version is coming out very shortly. They had to use this version because some of their design would be compromised. This is not normal for Chyron to release unreleased software but in this case the need was there. Until the released version of Lyric PRO 8.1 is released, please see that the following software is used for their broadcasts. Make sure you download the correct eFX Plugin depending on what system you are using. If unsure, please contact Chyron Customer Service.

1. Lyric PRO 8 RU2 build 1589
2. eFX Version eFX_1.9_245 for Altitude boards on HyperXClassic, HyperX2 and HyperX3.
3. eFX Version eFX2_1.9_245 for Altitude Express boards on the HyperX3.1
4. NVidia Driver 197.45 for HyperX Classic, HyperX2 and HyperX3
5. NVidia Driver 259.57 for HyperX3.1
6. For the Leitch Altitude Board - Leitch driver version (obtainable from the Leitch app in the Control Panel) Altitude hardware manager v1.3.0 build 140
7. For the Leitch Altitude Express Board - Leitch driver version (obtainable from the Leitch app in the Control Panel) Altitude hardware manager v2.0.0 build 139

Click the Logos below to download software.
