

RELEASE XFILE LITE 1.05.03

Previous release: 1.05.02 (Oct 2011)

New Feature:

- All files created by XFILE are supported.

Codec/Wrapper Support:

The files supported by XFILE and XFILE lite are:

- **EVS MXF** with SD codecs: MJPEG, IMX30-40-50, DVCPRO50; and with HD codecs: MJPEG, VC-3 100, Avid DNxHD 120-145-185-220, DVCPRO HD, Apple ProRes 422, Apple ProRes 422 (HQ) and Apple ProRes 422 (LT), AVC-Intra 100.
- **MXF OP1A** with SD codecs IMX30-40-50
- **Quick Time Movie** with SD codecs: MJPEG, IMX30-40-50, DVCPRO50; and with HD codecs: MJPEG std, VC-3 100, Avid DNxHD 120-145-185-220, DVCPRO HD, Apple ProRes 422, Apple ProRes 422 (HQ) and Apple ProRes 422 (LT), AVC-Intra 100.
- **Quick Time Reference** with SD codecs: IMX30-40-50, DVCPRO50; and with HD codecs: VC-3 100, Avid DNxHD 120-145-185-220, DVCPRO HD, Apple ProRes 422, Apple ProRes 422 (HQ) and Apple ProRes 422 (LT), AVC-Intra 100.
- **MXF OPAtom (Avid)** with SD codecs: IMX30-40-50 and DVCPRO; and with HD codecs: VC-3 100, Avid DNxHD 120-145-185-220, DVCPRO HD, AVC-Intra 100.
- **MXF OP1a (Std SMPTE)** with SD codecs IMX30-40-50 and DVCPRO; and with HD codec: DVCPRO HD, VC-3 100, Avid DNxHD 120-145-185-220, AVC-Intra 100.

Please note that:

- HD MPEG2 I field is no longer supported.
- The following codecs are not yet supported: DV25, DVCPRO25, MPEG-1 Proxy, MPEG-2, WM 7-8-9, H.264 AVC Proxy, MPEG-4 Proxy, XDCAM, P2, MPEG-2 Long GOP, H.264 AVC and JPEG 2000.

Software installation:

- The XFILE Lite installer includes XSecure manager. The software key previously generated by XSecure remains valid.

- The MME PLAYER is no longer available from the XFILE Lite GUI but still present in the installer for standalone installation.

Software restriction:

- The quality of audio monitoring for HD clips is directly linked to the performances of your PC system or PC laptop. Some audio defects or video freezes can occur during the preview. The audio monitoring for HD clips is disabled by default. To enable the HD monitoring parameter use the REG file: *XFile Lite EditDlg Audio HD Enabled*.
- The old files created with Multicam 8 cannot be transferred to AVID TM 2.1
- Sometimes, files sent to AVID TM 2.1 cannot be finalized: the transfer progression remains blocked at 99%.

List of dependencies:

- EvsEdit v4.09.15
- SoftwarePlayer .DLL v2.01.00129 (MMEP)
