

## ADDENDUM FOR VERSION 3.4.1

This is a brief description of the changes that have been made to Cattrax since the last Cattrax and PERC2000 manuals were published. These changes will be incorporated into the next versions of those manuals.

### **Touch 72 Panel**

A panel type for the Touch72 panel has been added to the list of panel types. The Touch72 manual describes how to configure at Touch72 panel.

### **Panel Configuration**

Several changes were made to simplify the configuration of panels. These apply to all panel types.

1. The Salvo Key List page has been removed. The Salvo Key list is now part of the Data Key List (for panels that support Data Key Lists).
2. On the Data Key List page, the Source, Destination, Level and other grids have been combined into one tabbed grid to save space.
3. On the Panels page, the Panels list on the left has been removed. All panel operations are now done using the Panels grid.
4. On the Panels page, changes to the panel configuration are now all made in Panel Detail grid below the Panels grid. Previously, some changes were made in the Panels grid and some were made in the Panel Detail grid.

### **Panel Configuration Mode Option**

A setting has been added to the General Settings dialog to allow the user to return to the "Old UI" for configuring panels.

*For a complete list of changes in version 3.4.1, see the Release Notes on the Setup CD.*
