

iAM-MIX(IP) Software Release Notes

RELEASE VERSION – 2.8-27

Release Date: **May 3rd, 2019**

RELEASE FEATURES

- Support for changing OLED brightness from Web.

KNOWN LIMITATIONS

- Since this is a major release it is requested to back-up the presets using import preset feature before applying this upgrade.
- The status for “Mute on Headphone insertion” on Web is not correct when license is disabled.
- If DHCP has been set and the LAN cable is not connected then in this scenario it will take longer time to boot.
- For iAm-MixIP 16, the 16th channel will be set as Master Volume. The master volume can be enabled/disabled from the web UI.
- Remote upgrade is expected to take 5 minutes for target unit to be upgraded. Avoid performing any operation on source or target unit during that time.
- Avoid pressing buttons on front panel and clicking buttons on web GUI simultaneously. Results may be inconsistent.
- Due to character size of the OLED display, some label strings may be truncated on the right edge.
- The unit supports 64-channel MADI with 48 KHz and 44.1 KHz sample rate only.
- Use FAT32 formatted USB disk for software upgrade and preset import/export.

RELEASE VERSION – 2.8-25

Release Date: **February 15th, 2019**

RELEASE FEATURES

- New preset creation page with Input Matrix for various inputs on the Web UI.
- Updated Dashboard on the Web UI.
