## MS2000 Master Station and Power Supply

### General Description

The MS2000 is a complete 2-channel master station and system power supply in a single unit. You simply plug it into any AC power outlet from 100 to 240 volts, add a microphone or headset, connect intercom stations to the back panel, and you're ready to communicate. It even has both 1-channel and 2-channel connectors, so you don't have to add a separate breakout box if you want to mix 1-channel and 2-channel intercom stations. The MS2000 fits in a standard 19-inch equipment rack and is 1 rack unit high.

### Features

- **Speaker Station or Headset Station.** Use the built-in speaker for listening and add an optional Telex MCP5 or MCP6 Gooseneck Panel Microphone for talk-back. Or, turn off the speaker volume, and plug in any of a variety of Telex headsets for private communication.
- **Voice Activated Microphone (VOX).** Separate controls adjust the voice activation level for the headset microphone and panel microphone inputs.
- **Public Address (PA) Output,** with PA key. Use your intercom microphone to talk over a PA system.
- **Back-lit Keys:** Improves visibility in low-light.
- **Incoming Call Indications:** Red flashing call light, with beep tone if desired.
- **Mic Kill Key:** You can turn off all microphones on a channel to quickly clear the channel.
- **Program Input for Each Channel.** Connect any line-level audio source for monitoring in the speaker or headset, or for routing to the intercom channel. The program audio to the channel can be set to interrupt while the MS2000 operator is talking on the channel.
- **Binaural (Stereo) Listening with External Powered Speakers.** You can connect external powered speakers and then monitor channel 1 and 2 as separate right and left audio.
- **Expandable.** Add more channels by connecting optional ES4000A Expansion Stations. Each ES4000A adds four additional channels (up to eighteen channels).
- **Clear-Com\* Compatible.**
